**Reconsidering a Century of Flight** Roger D. Launius, Janet R. Daly

Bednarek, 2015-12-01 On December 17, 1903, Orville and Wilbur Wright soared into history during a twelve-second flight on a secluded North Carolina beach. Commemorating the 100th anniversary of the first flight, these essays chart the central role that aviation played in twentieth-century history and capture the spirit of innovation and adventure that has characterized the history of flight. The contributors, all leading aerospace historians, consider four broad themes relating to the development of flight technology: innovation and the technology of flight, civil aeronautics and government policy, aerial warfare, and aviation in the American imagination. Through their attention to the political, economic, military, and cultural history of flight, the authors establish that the Wrights' invention--and all that followed in both air and space--was one of the most significant technologies of the twentieth century, fundamentally reshaping our world. Supported by the First Flight Centennial Commission The contributors are Janet R. Daly Bednarek, Tami Davis Biddle, Roger E. Bilstein, Hans-Joachim Braun, David T. Courtwright, Anne Collins Goodyear, Roger D. Launius, William M. Leary, David D. Lee, W. David Lewis, John H. Morrow, Dominick A. Pisano, and A. Timothy Warnock.

Made in the USA Vaclav Smil, 2015-08-21 An overview of the state of manufacturing in America—both past and present—and how this sector and the jobs it creates are essential to the American economy “There's no author whose books I look forward to more than Vaclav Smil.” —Bill Gates In *Made in the USA*, Vaclav Smil powerfully rebuts the notion that manufacturing is a relic of predigital history and that the loss of American manufacturing is

a desirable evolutionary step toward a pure service economy. Smil argues that no advanced economy can prosper without a strong, innovative manufacturing sector and the jobs it creates. Smil explains how manufacturing became a fundamental force behind America's economic, strategic, and social dominance. He describes American manufacturing's rapid rise at the end of the nineteenth century, its consolidation and modernization between the two world wars, its role as an enabler of mass consumption after 1945, and its recent decline. Some economists argue that shipping low-value jobs overseas matters little because the high-value work remains in the United States. But, asks Smil, do we want a society that consists of a small population of workers doing high-value-added work and masses of unemployed? Smil assesses various suggestions for solving America's manufacturing crisis, including lowering corporate tax rates, promoting research and development, and improving public education. Will America act to preserve and reinvigorate its manufacturing? It is crucial to our social and economic well-being; but, Smil warns, the odds are no better than even.

Jim Crow, Literature, and the Legacy of Sutton E. Griggs Tess Chakkalakal,Kenneth W. Warren,2013 *Imperium in Imperio* (1899) was the first black novel to countenance openly the possibility of organized black violence against Jim Crow segregation. Its author, a Baptist minister and newspaper editor from Texas, Sutton E. Griggs (1872-1933), would go on to publish four more novels; establish his own publishing company, one of the first secular publishing houses owned and operated by an African American in the United States; and help to found the American Baptist Theological Seminary in Tennessee. Alongside W. E. B. Du Bois and Booker T. Washington, Griggs was a key political and literary voice for black education and political rights and against Jim Crow. *Jim Crow, Literature, and the Legacy of Sutton E. Griggs* examines the wide scope of Griggs's influence on African American literature and politics at the turn of the twentieth century. Contributors engage Griggs's five novels and his numerous works of nonfiction, as well as his publishing and religious careers. By taking up Griggs's work, these essays open up a new historical perspective on African American literature and the terms that continue to shape American political thought and culture.

Empire of the Clouds James Hamilton-Paterson,2010-10-07 In 1945 Britain was the world's leading designer and builder of aircraft - a world-class achievement that was not mere rhetoric. And what aircraft they were. The sleek Comet, the first jet airliner. The awesome delta-winged Vulcan, an intercontinental bomber that could be thrown about the sky like a fighter. The Hawker Hunter, the most beautiful fighter-jet ever built and the Lightning, which could zoom ten miles above the clouds in a couple of minutes and whose pilots rated flying it as better than sex. How did Britain so lose the plot that today there is not a single aircraft manufacturer of any significance in the country? What became of the great industry of de Havilland or Handley Page? And what was it like to be alive in that marvellous post-war moment when innovative new British aircraft made their debut, and pilots were the rock stars of the age? James Hamilton-Paterson captures that season of glory in a compelling book that fuses his own memories of being a schoolboy plane spotter with a ruefully realistic history of British decline - its loss of self confidence and power. It is the story of great and charismatic machines and the men who flew them: heroes such as Bill Waterton, Neville Duke, John Derry and Bill Beaumont who took inconceivable risks, so that we could fly without a second thought.
