The Gloster Gladiator Francis K. Mason, 1964 Beskriver det engelske Gloster Gladiator fly, der stadig var operativ ved RAF i begyndelsen af 2. verdenskrig. Bogen omtaler de lande, der benyttede flyet bl.a. Finland, Norge og Sverige

International Warbirds John C. Fredriksen, 2001-08-01 In depth descriptions and photographs of the aircraft of 21 nations presented with a unique human dimension that goes behind the machines to the people involved. Invaluable for specialists, accessible to enthusiasts, *International Warbirds: An Illustrated*

Guide to World Military Aircraft, 1914-2000 puts the most legendary fighter aircraft of the 20th century developed outside the United States on vivid display. It offers 336 illustrated biographies of the most significant warplanes used in squadron service from World War I to the Balkan conflict, including numerous models from Great Britain, France, Russia, and Japan, as well as notable machines from Israel, Canada, China, India, Brazil, and other nations. Entries span the history and scope of military aircraft from bombers and fighters to transports, trainers, reconnaissance craft, sea planes, and helicopters, with each capsule history combining nuts-and-bolts technical data with the story of that model's evolution and use. Together, these portraits offer an exciting, well-researched tribute to visionary designers and builders as well as courageous pilots and crews across the globe, and tell a vivid tale of how air power became such a decisive factor in modern warfare.

Fighter Command 1936-1968 Ken Delve, 2007-08-16 Beretter om den historiske udvikling inden for det britiske flyvevåbens Fighter Command gennem perioden 1936-1968, og beskriver bl.a. doktriner, organisation, opgaver, materiel og personel.

My Golden Flying Years D'Arcy Greig, Simon Muggleton, 2011-03-23 This lively, funny memoir by a World War I pilot is "recommended for its rare view of the RAF in its nascent years and beyond" (Over the Front). Annotated by aviation historian Norman Franks, this is the autobiography of an early RAF pilot that conveys the sense of giddy adventure that existed among these elite flyers. The story begins in France in late 1918, when D'Arcy Greig was flying FE2b night bombers, then through the early 1920s as he served in Iraq, piloting Bristol Fighters for three years, against rebel insurgents and dissident tribesmen. Back in England, Greig became an instructor at the Central

Flying School, and finally he records his experiences commanding the RAF's High Speed Flight, and participating in the 1929 Schneider Trophy Race. This is a highly entertaining and amusing read, with Greig being a master of practical joking, having fun with explosives and enjoying other hilarious exploits that could only be contrived in these early days of flying. He comes into contact with many airmen already famous or who gained future fame, and his tale is well illustrated with many new, often private family photographs of the time.

Combat Biplanes of World War II Peter C.

Smith, 2015-09-30 The era of the combat biplane is usually thought to have been between 1914 and 1938. By the outbreak of World War II, most of the advanced air forces of the world had moved on to monoplane aircraft for their front-line battle forces, both in bomber and fighter capacities. Yet despite this, many biplanes did still survive, both in front-line service and in numerous subsidiary roles, and not just as training machines but as fully operational warplanes. Thus in 1939 the majority of major European powers still retained some, albeit few, biplane aircraft. Sadly, and as an indictment of failed British Government defence policies, it was Great Britain who still had the bulk of such obsolescent combat aircraft, machines like the Gladiator, Swordfish, Walrus, Vildebeeste and Audax for example, while the inferior Albacore, meant to replace the Swordfish, was still yet to enter service! Germany had relegated most of her biplane designs to secondary roles, but they still managed to conduct missions in which biplanes like the He.50, He.51 and Hs.120 excelled. Both France and Italy had biplanes in active service, Mussolini's Regia Aeronautica attaching great importance to the type as a fighter aircraft as late as 1941, while the Soviet Union also retained some machines like the Po-2 in front-line service right through the war and beyond. In addition, a whole range of smaller nations utilised biplanes built for larger combatants in their own air forces. By the time Japan and the United States entered the war

two years later, they had mainly rid themselves of biplanes but, even here, a few specialised types lingered on. This book describes a selection of these gallant old warriors of all nations. They represent the author's own personal selection from a surprisingly large range of aircraft that, despite all predictions, fought hard and well in World War II.

British Aircraft Manufacturers Since 1909 Peter G. Dancey, 2017-01-24 British Aircraft Manufacturers since 1909 traces one hundred years of the British aviation industry, its history, origins, mergers and takeovers. It details the evolution of the British aviation industry and is an epitaph to household famous names such as Armstrong-Whitworth, de Havilland, Chadwick, Claude-Graham White, Sopwith, A. V. Roe, Mitchell, Hawker, Handley Page, Petter and Fairey to name but a few. Of more recent times, the likes of Sidney Camm, Hooker and Hooper, all of whom, made VTOL more than just a dream, are also covered in astonishing and exhausting detail. Of the major firms, most at some time or other have been absorbed, merged or reorganised to form a single conglomerate, BAe Systems and Rolls-Royce are chronicled from the outset to the mighty companies they are today. Only PBN-Britten Norman - who on several occasions escaped extinction due to financial difficulties - and Westland, now part of AgustaWestland, and Short Bros of Northern Ireland remain independent, although even the latter, are part of Canadian, Bombardier Co. British Aircraft Manufacturers since 1909 tells the complete and enthralling story of how Britain ruled the world in terms of manufacturing and aircraft design from nimble but fragile biplanes and majestic airliners that united the world to the advanced bombers and fighters of today.

The American Shorthorn Herd Book ,1915

An Eye in the Sky Bob Cossey, 2018-04-30 This is the biography of Henry Crowe whose career encompassed time as an infantryman with the Royal Irish Regiment during the First World

War, an observer with the RFC and fledgling RAF, a pilot in Ireland at the time of the Irish War of Independence, a photographic officer and flight commander in Iraq, and Commanding Officer of Nos. 23 and 74 Squadrons. His memories of time spent in Iraq and on the North West Frontier between the wars have a real resonance today, illustrating just how little has changed in some respects. Henry served at the Air Ministry in various positions and concluded his service with the RAF in India, retiring as an Air Commodore in 1945. He had a keen interest in photography and took hundreds of images of the places he served, the aircraft he flew and saw, and the people he met. With an early Bell and Howell cine camera he also captured film of Malta, Iraq and India between the wars. As a photographic record alone this book is fascinating. But Henry wrote about his experiences as well and it is his memoirs that form the backbone of this biography, written with the full backing of his family. Henry Crowe was highly decorated and especially well thought of during the course of his career; reading Bob Crossey's account of his fascinating life, it is clear to see why.

Moonlight Over England The Story of One Nightfighter Pilot

Eric P. Donald, 2013 I came across an old photo recently and pondered the people in it. The person in the centre was my late brother, Norman G. Donald of the RAF. The other figures in the photo I do not know, though I suspect they were his flight instructors at North Battleford, Canada. The photo bears my brother's script KING-PINS ALL!--N. BATTLEFORD. After qualifying as a pilot, he sailed back to England and was posted to RAF Hunsdon just north of London in 1942. He was soon flying Douglas Havocs and Bristol Beaufighters. Night fighters were a new school of defence, but it was hopeless finding enemy aircraft in the dark. The Turbinlite device was fitted to the Beaufighters and Havocs, and the idea was to find the enemy somehow, guided

by ground control using heavy ground radar units (too heavy to carry in aircraft), turn on the Turbinlite searchlight, and illuminate the enemy aircraft. A single-engined Hurricane fighter flying alongside then shot down the enemy aircraft. It did help to see the target as this same sky was full of thousands of Allied aircraft, all trying to avoid each other.

The Royal Air Force - Volume 2 Ian Philpott, 2006-07-20
Volume II of this mammoth reference work covers the years in which the League of Nations failed because of the emerging dictatorships in Germany and Italy and the expansionist policies adopted by Japan. Britain was still reeling from the consequences of World War I and the RAF was sadly far behind the other major world powers in aircraft design, still relying on bi-planes that were direct descendants of World War I thinking. It gradually became apparent that, despite UK government dithering, the RAF needed to develop new aircraft, engines and increase production to confront the bully-boy tactics of the Axis powers. As the turn of the decade approached extraordinary measures were taken to enable RAF to defend Britain's skies and this her freedom. As with Volume 1, this book covers every conceivable part of the RAF's history through these pre-War days. It looks at the development and invention of new equipment such as radar, monoplane fighters, metal construction and the heavy bomber. This was an era when science in aviation was rushing ahead and fortunately for Britain's freedom, it laid the foundations of victory in 1.945

RAF Fighter Command Pilot Mark Barber, 2012-09-20
The recent 70th anniversary of the Battle of Britain, combined with the threat of significant cuts to the current RAF, have highlighted the importance of Fighter Command in the early days of World War II once more. The role of the "few", as described by Churchill, during the Battle of Britain has been the subject of much mythologizing both at the time and in the years since. This title will put Fighter Command in context; describing the lack of

funding and attention which it received during the interwar period, until it was almost too late. The myth of the fighter pilot will be humanized, with first-hand accounts quoted which put nervous but brave human beings from all walks of life in the cockpit. Although the Battle of Britain may not have in itself been the decisive encounter that it has historically been portrayed as, the moral victory won by the RAF, the victory that proved that Germany could be defeated, was just as important as a military-strategic victory.

Heroes and Landmarks of British Aviation Richard Edwards, Peter J. Edwards, 2012-10-24 *Heroes and Landmarks of British Aviation* tells the dramatic story of a world leading aviation industry, from the sweat and grease of the workshop, to the board rooms and government nationalisations that ultimately fashioned its destiny. The heroes are Britain's most innovative aviation pioneers and their aircraft, the men and women who persevered to be the first into the air, to fly the fastest, the highest and the furthest. This broad and highly accessible book ranges from the first man to fly across the English Channel from England to France to the development of the Spitfire and from the disastrous R101 airship to the development of the jet engine and ultimately the world's first supersonic airliner. Each chapter looks at a different aviation pioneer and the flying machines that they designed, their engineering landmarks, their triumphs in the air and on occasion their disasters too. The book explores the great air races that were won and lost, the government contracts and political short-sightedness that cut short the development of leading aircraft designs and many of the dramatic air raids and sea battles from the First World War to the Falklands and the Middle East. Many of the industry's most prominent names are profiled, including Ernest Willows, the Short brothers, Geoffrey de Havilland, Vincent Richmond, George White, Thomas Sopwith, Harry Hawker, RJ Mitchell, Herbert Smith, Charles Rolls, Henry Royce, Reginald Pierson, Alliott Verdon-Roe, Frederick Handley

Page, Robert Watson-Watt, Robert Blackburn and Frank Whittle. Behind the personal stories are the histories of the aircraft companies that these pioneers created, from those that went bankrupt to those that lasted the test of time and have become indivisible from British aviation folklore, such names as Sopwith, Handley Page, Avro, Supermarine, Blackburn, Bristol, Fairey and Rolls-Royce. The book covers the mergers and acquisitions that led to the creation of two major aircraft manufacturers, Hawker Siddeley Group and the British Aircraft Corporation, and how barely two decades later, before the century was out, they were nationalised to form British Aerospace.

A Century of Triumph Christopher Chant, 2002 On December 17, 1903, on the windswept beaches of Kitty Hawk, North Carolina, Orville Wright piloted the world's first powered flight, in one of the most famous moments in history. Within a few short years, airplanes of various designs were lifting into the air over Europe and America. Soon, the entire world was caught up in the fevered advance of flight and airplanes, Zeppelins, autogyros and helicopters were making the world a much smaller place. To celebrate the first full century of powered flight premier aviation historian Christopher Chant and world-famous illustrator John Batchelor have joined forces to showcase an astonishing march of progress. From the early experiments of gliderman Otto Lilienthal to the moon walk of Neil Armstrong, it has indeed been A Century of Triumph. From the golden age of Zeppelins to the extreme design experiments of World War II to the fierce modernism of supersonic fighter jets, A CENTURY OF TRIUMPH demonstrates the full richness of mankind's flying craft. In addition to Batchelor's illustrations, the book features never-before-published vintage watercolour posters of pre-World War I aviation races and a treasure trove of photographs. Chant's text combines full histories of the planes themselves with biographical essays on some of the great figures of the twentieth century: the

Barnstormers, Igor Sikorsky, Amelia Earhart, Chuck Yeager, and the Apollo XVII astronauts, among others. A CENTURY OF TRUMPH is a visual and factual feast for anyone who marvels at the majesty of flying.

Enemy at the Gates Justo Miranda, 2019-12-08 When the Nazis started to threaten the world with their efficient machine of propaganda, the main concern of European governments was the overwhelming reaction of panic that the expected bombing of the Luftwaffe might cause within the civil population. During the Munich Agreement in 1938, the democracies were defended by old biplanes and a bunch of modern fighters: 50 Hurricanes, 20 Morane-405 and 5 Fokker D.XXI. France and Great Britain took up the production of USA airplanes and cancelled exports to small countries, which were forced to design and build their own PANIC FIGHTERS with the intelligence and skill that desperation provides. When nothing seemed able to contain the German advance, France, Great Britain and the USSR developed several programs of emergency fighters, as did Australia, to face the Japanese expansion. At the time the course of events switched, it was the Axis powers that had to create their own PANIC FIGHTERS, some of them suicidal. The present book includes several last resource designs of fighters that are practically unknown and that were developed in times of tribulation by Australia, Belgium, Bulgaria, Canada, Czechoslovakia, Denmark, Estonia, Finland, France, Germany, Great Britain, Hungary, Japan, Yugoslavia, Latvia, Netherland, Poland, Romania, Sweden and Switzerland.

Hurricane Squadron Ace Nick Thomas, 2014-11-30 Air Commodore Peter Malam 'Pete' Brothers CBE, DSO, DFC, and Bar (1917-2008) was one of the most heroic and highly praised pilots of the Second World War. Decorated extensively, he secured a total of 16 'kills' over the course of the conflict, with 10 of these occurring during the Battle of Britain. Pivotal moments in his career include the time, in August 1940, when his flight

encountered around a hundred enemy aircraft, including Messerschmitt 110's; he led the flight in attack against them, and soon found himself in a stalled position, out of which he spun, only to be confronted by a Dornier 215, which he shot down, before later destroying a Messerschmitt 109. Scores of these kind of risky manoeuvres and winning victories punctuated a career defined by great courage, leadership and initiative in the face of fierce opposition. ??This new and engaging biography profiles a pilot who, until now, hasn't been the subject of such a thorough book-length study. The story of his career is incredibly entertaining, featuring a number of hair-raising episodes, and is sure to appeal to fans of aviation history as well as the more general reader seeking out an action-packed biography offering fresh insights into one of the most pivotal conflicts of the twentieth century.
