Counter-Globalization and Socialism in the 21st Century Thomas Muhr, 2013-06-26

Framed by critical globalisation theory and David Harvey's 'co-revolutionary moments' as a theory of social change, this book brings together a multi-disciplinary team of researchers to empirically analyse how socialism is being constructed in contemporary Latin America and the Caribbean, and beyond. This book uses the case of the Bolivarian Alliance for the Peoples of Our America - Peoples' Trade Agreement (ALBA-TCP) to invite to a re-thinking of resistance to global capitalism and the construction of socialism in the 21st century. Including detailed theory-based ethnographic case studies from Bolivia, Cuba, El Salvador, Nicaragua, Venezuela and the USA, the contributors identify social and structural forces at different levels and scales to illuminate politics and practices at work. Centred around the themes of democracy and justice, and the more general reconfiguration of the state-society relations and power geometries at the local, national, regional and global scales, ALBA and Counter-Globalization is at the forefront in the trend of interdisciplinary approaches to the study of social phenomena of global relevance. *Counter-Globalization and Socialism in the 21st Century* will be of interest to students and scholars of Latin American politics, global governance, global regionalisms and rising powers.

Autophagy - A Double-Edged Sword Yannick Bailly, 2013-04-17 The chapters in this book review the latest advances in the molecular mechanisms of autophagy, highlighting

some of the most challenging research topics. The focus is mainly on how this basic cell defense mechanism comes into play in various pathologies, including liver diseases, myopathies, infectious diseases, cancers and neurodegenerative diseases. In these diseases, the contradictory autophagy roles of cell survival versus cell death emphasize the necessity of taking into account this double-edged nature in future development of already promising, autophagy- modulating, therapies.

Sialobiology: Structure, Biosynthesis and Function. Sialic Acid

Glycoconjugates in Health and Disease Joe Tiralongo,Ivan Martinez-

Duncker,2013-02-13 This ebook presents a summary of central aspects of sialobiology (i.e., the study of sialic acid and its relevance to biology). The importance of substitution by the sugar sialic acid and the role played by sialylated structures (eg. glycoproteins, glycolipids, glycoconjugates) in immune recognition, neural cell growth, embryogenesis and disease development including microbial pathogenesis and cancer progression, has become well-established. Since 1995, the field of sialobiology has expanded greatly as many of the key enzymes involved in sialic acid biosynthesis, as well as the vast majority of sialic acid binding lectins involved in immune recognition, have only been cloned, characterised and structural elucidated after the publication of earlier works on the subject. This e-book also covers these recent developments. Chapters in this e-book have been contributed by eminent sialobiologists. Therefore, a book of this nature is timely and will prove to be a definitive volume with a high impact in this field for glycobiochemists and cell biologists.

Flood Forecasting Using Machine Learning Methods Fi-John Chang, Kuolin Hsu, Li-Chiu Chang, 2019-02-28 Nowadays, the degree and scale of flood hazards has been massively increasing as a result of the changing climate, and large-scale floods jeopardize lives and properties, causing great economic losses, in the inundation-prone areas of the world. Early flood warning systems are promising countermeasures against flood hazards and losses. A collaborative assessment according to multiple disciplines, comprising hydrology, remote sensing, and meteorology, of the magnitude and impacts of flood hazards on inundation areas significantly contributes to model the integrity and precision of flood forecasting. Methodologically oriented countermeasures against flood hazards may involve the forecasting of reservoir inflows, river flows, tropical cyclone tracks, and flooding at different lead times and/or scales. Analyses of impacts, risks, uncertainty, resilience, and scenarios coupled with policy-oriented suggestions will give information for flood hazard mitigation. Emerging advances in computing technologies coupled with big-data mining have boosted data-driven applications, among which Machine Learning technology, with its flexibility and scalability in pattern extraction, has modernized not only scientific thinking but also predictive applications. This book explores recent Machine Learning advances on flood forecast and management in a timely manner and presents interdisciplinary approaches to modelling the complexity of flood hazards-related issues, with contributions to integrative solutions from a local, regional or global perspective.
