Constructing Survey Data Giampietro Gobo, Sergio Mauceri, 2014-04-22 Engaging and informative, this book provides students and researchers with a pragmatic, new perspective on the process of collecting survey data. By proposing a post-positivist, interviewee-centred approach, it improves the quality and impact of survey data by emphasising the interaction between interviewer and interviewee. Extending the conventional methodology with contributions from linguistics, anthropology, cognitive studies and ethnomethodology, Gobo and Mauceri analyse the answering process in structured interviews built around questionnaires. The following key areas are explored in detail: An historical overview of survey research The process of preparing the survey and designing data collection The methods of detecting bias and improving data quality The strategies for combining quantitative and qualitative approaches The survey within global and local contexts Incorporating the work of experts in interpersonal and intercultural relations, this book offers readers an intriguing critical perspective on survey research. The discipline breaks down traditional conceptions of knowledge as universal, neutral and ahistorical, and takes a more critical approach to science and technology as social embedded phenomena. This comprehensive textbook makes use of unique examples and case studies to illustrate theoretical debates and concepts. In addition, the reader acquires a unique vision of contemporary issues (such as the power of algorithms, the mystification of fake news, the role of experts within the decision-making process, for example). Each chapter incorporates pedagogically rich features, including interactive discussion points to be used individually or in class as prompts for debate.

Merged Methods Giampietro Gobo,Nigel G. Fielding,Gevisa La Rocca,Wander van der Vaart,2021-10-27 A new turn in mixed methods research is here: merged methods. This provocative book offers a novel analysis of current mixed methods research, complicating traditional approaches and challenging existing techniques. Moving beyond the binary quantitative-qualitative distinction, the book presents methodologically grounded ways to merge methods in social research and integrate interpretive and structural approaches in one instrument or procedure. The book: Considers the importance of merging both epistemologies and methodologies. Showcases eight merged methods research approaches, from the Delphi method to multimodal content analysis. Explores the opportunities for merging methods using computational techniques, such as text mining. This innovative book is a must-read for any postgraduate student or researcher across the social sciences wanting to develop their understanding of mixed methods research.

Qualitative Research Practice Clive Seale,David Silverman,Jaber F Gubrium,Giampietro Gobo,2006-11-15 'This book is jam-packed with a wide range of material related to qualitative research.... [T]his is a quality text and has much to offer the reader, especially the novice researcher' - Nurse Researcher `This comprehensive collection of almost 40 chapters - each written by a leading expert in the field - is the essential reference for anyone undertaking or studying qualitative research. It covers a diversity of methods and a variety of perspectives and is a very practical and informative guide for newcomers and experienced researchers alike' - John Scott, University of Essex `The best ways in which to understand the issues and processes informing qualitative research is to learn from the accounts of its leading practitioners. Here they come together in what is a distinctive and wide-ranging collection that will appeal to postgraduates and social researchers in general' - Tim May, University of Salford `This excellent guide engages in a dialogue with a wide range of expert qualitative researchers, each of whom considers their own practice in an illuminating and challenging way. Overall, the book constitutes an authoritative survey of current methods of qualitative research data collection and analysis' - Nigel Gilbert, University of Surrey This concise paperback edition of the best selling handbook, *Qualitative Research Practice*, is particularly aimed at the student reader. The chapters are written by leading, internationally distinguished qualitative researchers who recount and reflect on their own research experiences as well as others, past and present, from whom they have learned. It demonstrates the benefits of using particular methods from the viewpoint of real-life experience. This is also a good philosophy for students to adopt in planing research work: to begin from a practical conception of the research process and to treat a book like this as an opportunity to learn a valuable craft. From the outside, good research seems to be produced through practitioners learning and following standard theoretical, empirical and procedural formats. But from the inside we learn that qualitative research (like other forms of scientific endeavour) is also a biographical engagement, rendering its scholarly and practical contributions in its own terms. Standards take on practical meaning as the distinct activities of qualitative research resonate throughout the enterprise, complicating its accountability to itself and to others. In an authoritative yet accessible manner, *Qualitative Research Practice* reveals the special features of this engagement, teaching us that qualitative research is as much a craft and practice as it is a way of knowing. Presenting a comprehensive examination of contemporary and traditional varieties of qualitative research practice, *Qualitative Research Practice* will be an invaluable resource for advanced students and researchers in any discipline. It is an essential and definitive guide to the major forms of qualitative methods in use today, written by leaders in the relevant fields of research practice.
