**Goggomobil R.M. Clarke**,1996-07-27 First offered to the public in 1955 this four-wheel microcar featured a fiberglass two-door, four-seat body with a 247cc two stroke engine that suited the German license concessions. A coupT was introduced in 1957 and two larger engines, 293cc and 392cc, were also available. The company was taken over by BMW in 1966. This is a book of contemporary road tests, specification and technical data, new model introductions, driver's impressions. Models covered include: saloon, coupT, TS 300, 293, 400, T600, ISAR 35, TS 400, T 700, Dart, Estate.

**Glas Goggomobil TS 250** Ernie Ruben,2020-01-02 120 pages with 20 lines you can use as a journal or a notebook .8.25 by 6 inches.

**Million Cars for Billion People** Gautam Sen,2014-10-11 Can one car transform a nation? The Ford Model T did do so a century ago when it replaced the horse, brought about a revolution in agriculture, became a stimulus to urbanization that eventually changed the landscape of America. Though the Maruti 800, the Tata Indica, the Hyundai Santro and the Maruti Alto, became engines of growth for India, these cars neither drove away the cow nor changed the way Indians travelled. Tata's Nano was expected to change all that and become the ultimate people's car, capturing the imagination of the middle class across nations and cultures. In spite of its petite dimensions, the Nano was meant to stand tall. Yet it did not. What caused it to fail and fall from grace despite being lauded as the 'right product at the right time' and 'the most significant new car since the Ford Model T was introduced 100 years ago'? But is it really all over or is there still hope for India's 'little wonder'? What will the people's cars of tomorrow be like? A Million Cars for a Billion People delves into the questions, concerns and doubts, as well as the many misconceptions and myths, that have gathered momentum over the years about India's automotive history and the industry's mission to create a true 'people's car'. The very first cars that came to India; the early beginnings of the industry; the nascent history of the automobile across nations like Germany, France, US, the UK, Italy, Japan and South Korea, is narrated with authority and charm, from the viewpoint of the quest for the ultimate people's car.

**The A-Z of popular Scooters & Microcars** Mike Dan,2015-08-24 This is mainly a photographic reference book to classic scooters and microcars with specification data presented in A to Z order of manufacturer. There are also nostalgic recollections by the author based on ownership and personal experience. In the middle 1950s as a teenager Mike Dan became interested in these then newly-arrived forms of transport. Eventually Mike owned a series of scooters and a microcar. He became involved in Scooter and Microcar Clubs and took part in many local and national sporting events gaining a collection of awards and trophies. In the mid 1980s he had time again to visit many indoor and outdoor classic vehicle shows. Eventually this led to a renewed personal involvement in the restoration of a series of over twenty classic scooters and three classic microcars. This highly entertaining book and reference source is therefore written with the authority of a lifetime enthusiast.

*Scenes from an Automotive Wonderland* Gregory A. Cagle,2018-01-23 Gregory Cagle was a 10-year-old car fanatic when his family moved from New Jersey to Germany in 1956. For the next five years he photographed unusual, rare and sometimes bizarre automobiles throughout Europe. This book features 105 specimens of auto exotica, captured with Cagle's Iloca Rapid-B 35mm camera--not showpieces in museums but daily drivers in their natural habitats. In the background can be glimpsed, here and there, the mood of postwar Europe. The story behind each photo is told, with dates and locations, information and history about the cars and some of their owners, along with Cagle's personal anecdotes.

More Bubblecars & Microcars Colour Family Album Andrea Sparrow,2017-09-29 A colourful and informative look at some of the more unusual and/or little known bubble and micro cars. Includes the BMW 600, Frisky, Goggomobil and many more.

*Champion of the Lark* Robert R. Ebert,2013-08-22 A career engineer at Studebaker, Harold E. Churchill became president of the recently merged Studebaker-Packard Corporation in 1956, at a time when finances were shaky and an aging product line was losing ground to the Big Three. Quickly launching a program of realism and common sense, he focused the company's energies on a few selected market segments where he saw opportunities for gain. His vision for a compact economy car led to the Lark, the hit model that Studebaker desperately needed. This thorough examination of Churchill's leadership of Studebaker-Packard draws upon Board of Directors minutes, internal documents, oral histories and media reports in constructing a detailed account of these crucial years. In addition to covering the cars and trucks produced under Churchill in detail, it closely traces Churchill's actions as president and analyzes his motivations, the pressures he faced, his leadership style and the success or failure of his tenure.

Literary Characters in Intellectual Property Law Jani McCutcheon,2023-03-02 This ground-breaking book critically interrogates how literary characters are regulated under copyright, moral rights, and trademark law, challenging important foundations that underscore engagement with literary characters. Using interesting examples, and referencing literary theory, Literary Characters in Intellectual Property Law offers an in-depth

exploration of both the law and the diverse and conflicting interests that are impacted by literary character appropriation, incorporating the perspectives of owners, authors, appropriators, and consumers.

*The Macro World of Micro Cars* Kate Trant, Austin Williams, 2004-06 Once a common sight in our towns and cities, microcars were ingenious solutions to the post war demand for economical and accessible motoring. Nowadays they are making a celebrated comeback with all of the big car manufacturers featuring at least one flagship small car, from DaimlerChrysler's Smart and BMW's Mini to Nissan's Micra. But what are the factors, now and then, that turned the microcar into a viable alternative to the 'normal' car? How have the aspirations and ideas behind the microcar changed over the decades? The cars themselves have undoubtedly undergone a radical transformation. Whereas the current trend in small cars is led by environmental concerns, the first phase of the microcar phenomenon was determined by economic necessity: many manufacturers of planes, trains, and white goods had to re-invent themselves as producers of automobiles. The result was a proliferation of small, cheap and extraordinary looking three- and four-wheeled vehicles. This book looks at the social and cultural conditions behind the rise, the fall and the ultimate resurrection of the small car, and features some of the most fascinating and best-loved examples. With the debate over transport, sustainability, congestion, fuel consumption, taxation and the environment high on the agenda, there has never been a better time than now to examine the role of the microcar.--BOOK JACKET.

*Cars with 2-Stroke Engines* Mark Telford, 2018-11-21 This book covers what I consider to be the best cars (& vans) with 2-Stroke engines that were made by conventional car makers. The marques covered are D.K.W, Saab, Subaru, Suzuki, Wartburg, Trabant, I.F.A, Framo, Barkas, F.S.O, Lloyd, Goliath, Goggomobil and Melkus. I have tried to stick to cars with enough room for a small family as well as small commercial vehicles. This means I didn't include very many microcars. I had to draw the line somewhere! 2-Stroke cars were made from 1928 to 1990 and the book is a celebration of a bygone era when cars were a lot simpler and easier to maintain. The book covers the history, specifications, road tests, model changes, buyers guides, period adverts, prototypes and often the political climate that was prevalent at the time. It is not meant to be a workshop manual. It includes my own experiences buying and owning a number of these cars and the stories are told in a light-hearted and conversational style. 2-Stroke cars today make a highly entertaining choice of classic car that's somewhat different from more mainstream choices. Some are still very affordable too. Formerly published as Two Stroke Cars Of The Past in 2012, the book has been edited, proof-read, revised and has had a new layout in November 2018. What used to be an A4 size book has been resized to 6x9 which is large paperback size. It now has 464 pages. This has reduced the printing costs, so the book is now cheaper to buy. It is also available on Kindle at half the price of the printed book. The only difference in the two is that the Kindle version has a mixture of both colour and black and white photos and the printed copy has only black & white due to the high cost of colour printing. Early criticisms of the original book largely concerned typos, and bad layout. These issues have been addressed and the whole book has had a thorough going over. I hope you enjoy it!

**Microcars at large!** Adam Quellan, 2015-10-12 This book celebrates an exciting period in motoring history. In the period following the Second World War, materials were in short supply and many people couldn't afford a proper car. Economies were struggling and several motor manufacturers turned their hand to building basic transportation for motorists. These little cars were noisy, often crude and not over-reliable but provided transport for thousands of impoverished motorists. Due to their shape, many of these vehicles earned the nickname 'bubblecar' and ensured a place in people's hearts. The role they played has crucial role in motoring history. They have overcome design challenges and many have reached iconic status. Discover the spherical Isetta and the wedge shaped Bond Bug. As prized collectors items, some microcars now enjoy cult status. Full of original colour illustrations, this volume charts the history and development of bubblecars and microcars from the middle of the twentieth century to the present day. This is a lavishly illustrated guide to the weird and wonderful world of microcars from the basic bubblecars of the 1950s to the sophisticated models of today.

German Memory Contests Anne Fuchs, Mary Cosgrove, Georg Grote, 2006 Since unification in 1990, Germany has seen a boom in the confrontation with memory, evident in a sharp increase in novels, films, autobiographies, and other forms of public discourse that engage with the long-term effects of National Socialism across generations. Taking issue with the concept of Vergangenheitsbewältigung, or coming to terms with the Nazi past, which after 1945 guided nearly all debate on the topic, the contributors to this volume view contemporary German culture through the more dynamic concept of memory contests, which sees all forms of memory, public or private, as ongoing processes of negotiating identity in the present. Touching on gender, generations, memory and postmemory, trauma theory, ethnicity, historiography, and family narrative, the contributions offer a comprehensive picture of current German memory debates, in so doing shedding light on the struggle to construct a German identity mindful of but not wholly defined by the horrors of National Socialism and the Holocaust. Contributors: Peter Fritzsche, Anne Fuchs, Elizabeth Boa, Stefan Willer, Chloe E. M. Paver, Matthias Fiedler, J. J. Long, Dagmar C. G. Lorenz, Cathy S. Gelbin, Jennifer E. Michaels, Mary Cosgrove, Andrew Plowman,

Roger Woods. Anne Fuchs is Professor of modern German literature and Georg Grote is Lecturer in German history, both at University College Dublin. Mary Cosgrove is Lecturer in German at the University of Edinburgh.

Ruins to Riches Raymond G. Stokes,2024-05-09 In 1945, Germany and Japan lay prostrate after total war and resounding defeat. By 1960, they had the second and fifth largest economies in the world respectively. This global leadership has been maintained ever since. How did these 'economic miracles' come to pass, and why were these two nations particularly adept at achieving them? Ray Stokes is the first to unpack these questions from comparative and international perspectives, emphasising both the individuals and companies behind this exceptional performance and the broader global political and economic contexts. He highlights the potent mixtures in both countries of judicious state action, effective industrial organisation, benign labour relations, and technological innovation, which they adapted constantly – sometimes painfully – to take full advantage of rapidly growing post-war international trade and globalisation. Together, they explain the spectacular resurgence of Deutschland AG and Japan Incorporated to global economic and technological leadership, which they have sustained to the present.
