Ghostbusters Janice Dreese,2020-04-03 Peter Venkman, Ray Stantz, and Egon Spengler are scientists at Columbia University investigating the paranormal. Following their first encounter with a ghost manifesting at the New York Public Library, the dean fires them and dismisses the credibility of their research. In response, they create Ghostbusters, a paranormal investigation and elimination service. They convert a disused firehouse, develop high-tech equipment to capture and contain ghosts, and convert a combination car into the Ectomobile to support their business. Seeing their television ad, a skeptical cellist, Dana Barrett, is initially dismissive but reluctantly calls them after a paranormal encounter in her kitchen. Recounting the event, she describes opening her refrigerator and seeing a creature that utters a single word: Zuul. Venkman reassures her and becomes romantically interested, while Ray and Egon research her claims. Business is slow until they are hired to remove a ghost from the Sedgewick Hotel. There, Egon warns the group never to cross the energy streams of their proton pack weapons, as this could cause a catastrophic explosion. They capture their first ghost and deposit it in a special containment unit in the firehouse. Soon their business booms as paranormal activity increases across New York City. To cope with demand, they hire a fourth member, Winston Zeddemore. Suspicious of their operation, Walter Peck, an Environmental Protection Agency inspector, asks to evaluate their equipment but leaves after Venkman insults him. Privately, Egon warns the team the increase in supernatural activity is becoming dangerous and their equipment is at risk of failing under the stress. Venkman meets with Dana. He shares that Zuul was a demigod worshiped as a servant to Gozer the Gozerian, a shape-shifting god of destruction. He convinces Dana to discuss her case further over dinner. However, when Dana returns home, she is supernaturally assaulted and possessed by Zuul. In a nearby apartment, a nearly identical entity manifests, then chases and possesses her neighbor, Louis Tully. Venkman arrives and finds the possessed Dana/Zuul claiming to be the Gatekeeper. Louis, also possessed, is found by police officers and claims he is Vinz Clortho, the Keymaster of Gozer. The Ghostbusters agree they need to regroup but keep the pair separated. Peck returns with law-enforcement and city workers to have the Ghostbusters arrested and orders the

deactivation of their ghost containment system. Stressed beyond capacity, the shutdown causes an explosion that releases the captured ghosts, and the Ghostbusters are detained. Louis/Vinz manages to escape in the confusion and makes his way to the apartment building where he meets Dana/Zuul. In jail, Ray and Egon reveal that Dana's building is the true source of the supernatural increase. The architect was a genius and cult leader of Gozer-worshippers, who designed it to channel ghosts for the purpose of ending the world. Faced with chaos in the city, the Ghostbusters convince the mayor to release them over Peck's protests.

Dead Famous Greg Jenner, 2021-08-19 Celebrity, with its neon glow and selfie pout, strikes us as hypermodern. But the famous and infamous have been thrilling, titillating, and outraging us for much longer than we might realise. Whether it was the scandalous Lord Byron, whose poetry sent female fans into an erotic frenzy; or the cheetah-owning, coffin-sleeping, one-legged French actress Sarah

Bernhardt, who launched a violent feud with her former best friend; or Edmund Kean, the dazzling Shakespearean actor whose monstrous ego and terrible alcoholism saw him nearly murdered by his own audience - the list of stars whose careers burned bright before the Age of Television is extensive and thrillingly varied. Celebrities could be heroes or villains; warriors or murderers; brilliant talents, or fraudsters with a flair for fibbing; trendsetters, wilful provocateurs, or tragic victims marketed as freaks of nature. Some craved fame while others had it forced upon them. A few found fame as small children, some had to wait decades to get their break. But uniting them all is the shared origin point: since the early 1700s, celebrity has been one of the most emphatic driving forces in popular culture; it is a lurid cousin to Ancient Greek ideas of glorious and notorious reputation, and its emergence helped to shape public attitudes to ethics, national identity, religious faith, wealth, sexuality, and gender roles. In this ambitious history, that spans the Bronze Age to the coming of Hollywood's Golden Age, Greg Jenner assembles a vibrant cast of over 125 actors, singers, dancers, sportspeople, freaks, demigods, ruffians, and more, in search of celebrity's historical roots. He reveals why celebrity burst into life in the early eighteenth century, how it differs to ancient ideas of fame, the techniques through which it was acquired, how it was maintained, the effect it had on public tastes, and the psychological burden stardom could place on those in the glaring limelight.
