Airships Sam Witt,2003-03 While some choose to sail the seas and oceans seeking trade, adventure, and fame, others are more daring and sail the skies of their worlds. Discover the wonders of flight and the beauty of sailing the winds from many different methods and in many different forms. After all, no one race dominates the skies?save those that need no ships and jealously guard their skies. Like sea captains traversing dangerous waters and unknown menaces, airship captains must face the wrath of the aerial realms in the forms of dragons and other invisible dangers that pose great risk to their airships Airships provides all the rules necessary to bring flying ships into any campaign setting. Construction rules, combat, aerial and 3D movement, and other essential information is all covered. Also included are deck plans and specifications for a number of ships. Airships will bring new heroes to the fore when a village under siege cries Look! Up in the sky!

Advances in Focused Retrieval Jaap Kamps,Andrew Trotman,2009-09-03 This book constitutes the thoroughly refereed proceedings of the 7th International Workshop of the Initiative for the Evaluation of XML Retrieval, INEX 2008, held at Dagstuhl Castle, Germany, in December 2008. The aim of the INEX 2008 workshop was to bring together researchers who participated in the INEX 2008 campaign. Over the year leading up to the event, participating organizations contributed to the building of a large-scale XML test collection by creating topics, performing retrieval runs, and providing relevance assessments. The workshop concluded the results of this large-scale effort, summarized and addressed the issues encountered, and devised a work plan for the future evaluation of XML retrieval systems. The 49 papers included in this volume report the final results of INEX 2008. They have been divided into sections according to the seven tracks of the workshop, investigating various aspects of XML retrieval, from book search to entity ranking, including interaction aspects.
