Most Terrible Conflict in History Thomas Herbert Russell,1914

The Cambridge Handbook of Intellectual Property and Social Justice Steven D. Jamar,Lateef Mtima,2023-12-31 Protection for intellectual property has never been absolute; it has always been limited in the public interest. The benefits of intellectual property protection are meant to flow to everyone, not just a limited population of creators and the corporations that represent them. Given this social-utility function, intellectual property regimes must address issues of access, inclusion, and empowerment for marginalized and excluded groups. This handbook defines an approach to considering social justice in intellectual property law and regulation. Top scholars in the field offer surveys of social justice implementation in patents, copyright, trademarks, trade secrets, rights of publicity, and other major IP areas. Chapters define Intellectual Property Social Justice theory and include recommendations for reforming aspects of IP law and administration

to further social justice by providing better access, more inclusion, and greater empowerment to marginalized groups.

Real Monsters, Gruesome Critters, and Beasts from the Darkside

Brad Steiger,2010-09-01 Spotlighing news articles, historical accounts, and firstperson interviews, this chronicle of human interactions with monsters will convince even the most hardened skeptic of the existence of the bogeyman, bigfoot, werewolves, and swamp creatures. Offering an array of wild reports—from the police officer who begrudgingly responded to a call about a longhaired woman flying over a suburban neighborhood only to find himself calling for backup when she attacked his patrol car to the motorist whose headlights illuminated a sevenfoot tall, wolflike creature that stood on its hind legs—this historical record highlights scary and unbelievable narratives. From slightly demented humans to spinetingling paranormal encounters, each outlandish occurrence is detailed with thorough research and recounted with a storyteller's crafted voice.

Intersections Control and Safety Antonio Pratelli,2013-05-22

Starting off a new series on Transport Systems and Traffic

Engineering the book aims to help bridge the gap between research and practice, encouraging a critical dialogue in different, specific, subjects spanning innovation, development and technology transfer.

Those who offer innovation often do not meet the immediate needs of practitioners, especially in the traditional field of civil engineering. Still, the adequate diffusion of research results and wisdom derived from practical experience are crucial to both theoretical underpinnings

and technical applications. The papers forming this book are devoted to intersection control and safety and have been selected bearing in mind the criteria stated above. That is, these papers provide both scholarly contribution as well as vision for application. As a general rule, about one-third of all highway crashes happen at intersections. This rule holds for many different countries. Intersection crashes also represent a significant portion of serious injury crashes, and by right are receiving considerable attention from researchers and practitioners alike. This book is therefore devoted to relevant safety aspects of road intersections and innovative features in design and operations that may address the intersection crash problem. The thirteen papers are more or less equally devoted to roundabouts and signals. These papers cover many of the most recent and emerging issues related to intersection control and safety. Topics range from design details to driver perception, from pedestrians behaviour to signal timing, and from capacity models to red-light running. The book will be useful for those wishing to expand their knowledge of this ever important subject area.

The UFO Singularity Micah Hanks, 2012-12-26 At the forefront of a new generation of UFOlogists, Micah Hanks is someone who isn't afraid to tackle new paradigms, ideas, and theories. The future of flying saucer seeking is in good hands! —Nick Redfern, author of *The NASA Conspiracies* Why and how are past unexplained phenomena changing our future? Where will transcending the bounds of current thinking lead? How near is the singularity? *The UFO Singularity* finally reveals what UFO phenomena can tell us about greater-than-human intelligence, and offers provocative theories of where such intelligence might originate. You'll explore the most challenging metaphysical questions and the latest scientific thoughts about them,

including: What is the singularity, and how does it relate to UFOs? Could some UFOs be from our plane? Could they actually be time travelers from our future? What current scientific trends are leading us to the kinds of advanced technology we've observed in various UFO reports? Are there other ways in which UFOs could be considered extraterrestrial visitors in our midst, even if they didn't get here in the way that most people think (via interplanetary space flight)?

Exposed, Uncovered & Declassified: UFOs and Aliens Michael Pye, Kirsten Dalley, 2011-06-15 What are UFOs? Why are they here? What is the Government not telling us? *Exposed, Uncovered, and Declassified: UFOs & Aliens* strives to address all of these questions--and more--by covering new evidence of famous sightings and contact with aliens, and uncovering classified files from world-class collections and archives--all courtesy of the world's leading experts on modern ufology. Nuclear physicist and world-renowned UFO expert Stanton T. Friedman discusses how close we really are to interstellar travel. Erich von Daniken, father of the ancient astronaut theory, discusses the possibility and evidence of ancient hybrid creatures created by visiting god-like aliens. Nick Pope, former member of the British Ministry of Defence, covers the latest UFO documents released by the UK's National Archives, including such fascinating information as: what Churchill knew, why the documents are being released now, what's in them, and what's still being withheld. Donald R. Schmitt, the former co-director of the J. Allen Hynek Center for UFO Studies, takes on the aftermath of the Roswell incident, discussing in detail the initial stages of the government's cover-up attempts. Air Force veteran Thomas J. Carey chronicles the military's attempts to

intimidate people into not telling their stories about what they have seen with their own eyes. The niece of Betty and Barney Hill, Kathleen Marden, gives a short history of cases of alien abduction, many which continue to baffle the American public and UFO investigators alike. Nick Redfern provides a fresh take on the famous 1953 UFO crash in Kingman, Arizona, and explores its possible connection to a government program to reverse-engineer alien spacecraft. Something is out there, and *Exposed, Uncovered, and Declassified: UFOs & Aliens* will help us find out exactly what--or who--it is.
