Ancient Stones Marc Waelkens,Norman Herz,Luc Moens,1992 The meeting assembled an interdisciplinary group of nearly 50 archaeologists and art historians, geologists and geochemists from the U.S.A. and 14 European and Near Eastern countries to discuss the provenance, quarrying, transport and use of stone from prehistoric to early Christian times, both in Europe and in the Near East. The papers which reflect a merger between classicism and geotechnology, thus deal with (1) quarries from the Bronze Age to the Byzantine period, their technology and organization, (2) quarry prospection through satellite imaging, (3) dressing of artifacts near the quarries, (4) trade, availability and archaeological use of certain stones in antiquity, (5) determination of obsidian, flint, granite, marble, limestones, sandstones and arkoses from Europe, Asia Minor and the Near East by means of petrological and chemical analysis, trace element analysis, electron microprobe and stable isotope analysis, ESR spectroscopy, X-ray fluorescence and X-ray powder diffractometry, mercury porosimetry, cathodoluminescence, light diffusion from laser-irradiated stones, computer assisted assessment of coloured stones or a multi-method approach, and (6) provenance determination applied to ancient artifacts. The volume is highly recommended for those who wish to combine a journey into classical scholarship with geochemical sciences.

Burning Tower Larry Niven,Jerry Pournelle,2006-12-01 Return to the vivid and unusual (Kirkus Reviews) world of Larry Niven and Jerry Pournelle's *The Burning City*, where the fire god has retreated into myth, leaving the residents of Tep's Town unprotected for the first time in their history. Unfortunately, a fiery fate isn't the only danger the town is facing. From out of the desert come monsters -- great birds with blades instead of wings, driven by some unknown force. Although they can be killed, the threat these terror birds pose is worse than death. Danger on the roads means no trade. No trade means that Tep's Town will be no more. Sent by the Lords of Lordshills to discover the source of the terror birds, Lord Sandry and his beloved, Burning Tower, must travel into a world where magic is still strong -- and where someone or something waits to destroy them! Filled with the sweeping adventure, memorable characters, and imaginative world-building that have defined the novels of Larry

Niven and Jerry Pournelle, *Burning Tower* is another triumph.

The Floating Island ,2006-08-22 When Charles Magnus Ven Polypheme begins his long-awaited journey, he gets lost at sea, is attacked by pirates and then held captive by those who think he can lead them to a mystical island and the Water of Life.

13 Moons over Vietnam–1st Moon: Innocence Ben Thieu Long,2019-02-14 *13 Moons over Vietnam–1st Moon: Innocence* Why another memoir on Vietnam? There are already hundreds of publications on the Vietnam War. *13 Moons over Vietnam* captures a unique perspective of a soldier's experience of war, juxtaposing more than 150 stories between the lines of 280 uncensored letters to his wife, who was pregnant with their first child. These stories, describing actual experiences, are conveyed with raw emotions of anxiety and fear, refuting the nonchalant tone of his correspondence home. The effect is a stark and unsettling contrast between what is written home and what actually happens. *13 Moons over Vietnam* is organized as a series segmented by lunar cycles that symbolize the author's struggles with identity and faith as he confronts progressive incidents of social and emotional violence. Begin with *1st Moon: Innocence*, and witness a metamorphosis that spirals through a moral and spiritual minefield.

A Race So Different Joshua Chambers-Letson,2013-12-02 Winner of the 2014 Outstanding Book Award presented by the Association for Theatre in Higher Education Taking a performance studies approach to understanding Asian American racial subjectivity, Joshua Takano Chambers-Letson argues that the law influences racial formation by compelling Asian Americans to embody and perform recognizable identities in both popular aesthetic forms (such as theater, opera, or rock music) and in the rituals of everyday life. Tracing the production of Asian American selfhood from

the era of Asian Exclusion through the Global War on Terror, *A Race So Different* explores the legal paradox whereby U.S. law apprehends the Asian American body as simultaneously excluded from and included within the national body politic. Bringing together broadly defined forms of performance, from artistic works such as *Madame Butterfly* to the Supreme Court's oral arguments in the Cambodian American deportation cases of the twenty-first century, this book invites conversation about how Asian American performance uses the stage to document, interrogate, and complicate the processes of racialization in U.S. law. Through his impressive use of a rich legal and cultural archive, Chambers-Letson articulates a robust understanding of the construction of social and racial realities in the contemporary United States.

Collaborations in Architecture and Engineering Clare Olsen, Sinead Mac Namara, 2021-12-30 This new edition of *Collaborations in Architecture and Engineering* explores how to effectively develop creative collaborations among architects and engineers. The authors, an architect and an engineer, share insights gained from their experiences and research on fostering productive communication, engaging in interdisciplinary discussions, and establishing common design goals. Together, they share the tools, methods, and best practices deployed by prominent innovative architects and engineers to provide readers with the key elements for success in interdisciplinary design collaborations. The book offers engaging stories about prominent architect and engineer collaborations—such as those between SANAA and Sasaki and Partners, Adjaye Associates and Silman, Grafton Architects and AKT II, Studio Gang and Arup, Foster + Partners and Buro Happold, Steven Holl Architects and Guy Nordenson and Associates, and among the engineers and architects at SOM. In the second edition, the newly added case studies showcase extraordinary buildings across the globe at a range of scales and typologies, tracing the facets of high-quality collaborations. Through the examples of these remarkable synergies, readers gain insights into innovative design processes that address complex challenges in the built environment. The second edition of *Collaborations in Architecture and Engineering* is a terrific sourcebook for students, educators, and professionals interested in integrative design practice among the disciplines.
