Dynamics of Economic Spaces in the Global Knowledge-based Economy Sam Ock Park,2014-09-19 This book addresses how economic spaces dynamically change within the context of the global knowledge-based economy. Specifically, it centers the discussion on integrated views of understanding and conceptualizing dynamic changes of global economy under the global megatrends of globalization, knowledge-based economy, information society, service world, climate change, and population aging. Focusing on East Asia, especially on Korea, it deals with case studies regarding the processes and patterns of these global dynamics, looking at economic spaces of various spatial scales and types of economic actors. This book develops a theoretical model for understanding and analysing the dynamics of economic spaces that are being reshaped within the larger global economy. It also emphasizes the analysis of empirical studies at the level of firm, region, and state by considering an evolutionary perspective over time. In developing its theoretical framework, this book examines regional resilience, intangible assets, service innovation, path dependence, and other notions related to the evolution of economic spaces, and incorporates these elements into real-world case studies. The integrated theoretical framework examined here contributes a new perspective on spatial disparities in the global economy. An integral model of service innovation; the integration of path dependence and regional resilience; the interaction between firm and region for the accumulation of intangible assets; and the roles of governments and global firms: these are all essential to understanding the dynamics of economic spaces in East Asia. The theoretical model and case studies in this book suggest policy implications for developing countries, especially in the Asian and African regions, with regard to regional development and innovation policies.

The Crime Book DK, 2021-02-02 Investigate 100 of the world's most notorious crimes, including the Great Train Robbery, the Lindbergh kidnapping, and the murders of serial killer Jeffrey Dahmer. Were the perpetrators delusional, opportunist, or truly evil? Find out what really happened and how the cases were solved. Discover conmen with sheer verve, such as Victor Lustig who sold the Eiffel Tower to scrap dealers in 1925, adrenaline-fuelled escapes, and mind-bending exploits of pirates, kidnappers, and drug cartels. The Crime Book demystifies malware, cybercrimes, and Ponzi schemes and sets out the terrifying ploys of mass murderers from 16th-century Elizabeth Báthory who drained young girls' blood to the more recent exploits of Rosemary and Fred West. Like a virus, crime mutates and adapts. The Crime Book explains how pivotal moments in history opened up new opportunities for criminals, such as the smuggling of alcohol during the American Prohibition era. It also charts developments in justice and forensics including the Innocence Project, which used DNA testing to exonerate wrongly convicted convicts. It examines how the forces of law and order have fought back against crime, explaining ingenious sting operations such as tracking down the jewel thief Bill Mason and the final capture of murderer Ted Bundy. With a foreword from bestselling crime author Cathy Scott, The Crime Book is an enthralling introduction to humanity's darker side. Series Overview: Big Ideas Simply Explained series uses creative design and innovative graphics, along with straightforward and engaging writing, to make complex subjects easier to understand. The Politics of Islam in the Sahel Rahmane Idrissa, 2017-06-14 'Ideologies need enemies to thrive, religion does not'. Using the Sahel as a source of five comparative case studies, this volume aims to engage in the painstaking task of disentangling Islam from the political ideologies that have issued from its theologies to fight for governmental power and the transformation of society. While these ideologies tap into sources of religious legitimacy, the author shows that they are fundamentally secular or temporal enterprises, defined by confrontation with other political ideologies—both progressive and liberal—within the arena of nation states. Their objectives

are the same as these other ideologies, i.e., to harness political power for changing national societies, and they resort to various methods of persuasion, until they break down into violence. The two driving questions of the book are, whence come these ideologies, and why do they—sometimes—result in violence? Ideologies of Salafi radicalism are at work in the five countries of the Sahel region, Burkina Faso, Mali, Niger, (Northern) Nigeria and Senegal, but violence has broken out only in Mali and Northern Nigeria. Using a theoretical framework of ideological development and methods of historical analysis, Idrissa traces the emergence of Salafi radicalism in each of these countries as a spark ignited by the shock between concurrent processes of Islamization and colonization in the 1940s. However, while the spark eventually ignited a blaze in Mali and Nigeria, it has only led to milder political heat in Niger and Senegal and has had no burning effect at all in Burkina Faso. By meticulously examining the development of Salafi radicalism ideologies over time in connection with developments in national politics in each of the countries, Idrissa arrives at compelling conclusions about these divergent outcomes. Given the many similarities between the countries studied, these divergences show, in particular, that history, the behaviour of state leaders and national sociologies matter—against assumptions of ‘natural’ contradictions between religion (Islam) and secularism or democracy. This volume offers a new perspective in discussions on ideology, which remains—as is shown here—the independent variable of many key contemporary political processes, either hidden in plain sight or disguised in a religious garb.

Sovereign Rights and Territorial Space in Sino-Japanese Relations Unryu Suganuma, 2001-03-01 In September 1996, members of the right-wing Japan Youth Federation repaired a lighthouse on one of the Diaoyu (J. Senkaku) Islands, a small group of uninhabited islets north of Taiwan in the Liuqiu (J. Ryukyu) chain, known today as Okinawa. For months, outraged ethnic Chinese in Hong Kong and Taiwan protested Japan's presence in the islands, and violent confrontations between protesters and the Japanese Marine Self-Defense Force resulted. Tension over these incidents has subsided since 1996, but the sovereignty of the islands remains a concern for both China and Japan. The long and complex history of relations between the two countries has made the problem difficult to resolve. This volatile situation has been further complicated by the involvement of other countries, including the U.S. Although the Diaoyu/Senkaku matter may be characterized as a simple territorial dispute between two nations, it exposes complicated geopolitical relations among Japan, China, Taiwan, and the U.S. in the Asia-Pacific region. *Sovereign Rights and Territorial Space in Sino-Japanese Relations* is an investigation of the highly topical issues involved in the Diaoyu/Senkaku confrontation. It begins by addressing the issue of the historical development of

the dispute: To whom do the islands belong? When did China and Japan become involved? Does historical evidence prove who has sovereignty over the islands? How has irredentism (the claim to territory based on one or another historical "right") become a major state policy in both countries? Other issues center on Chinese views of sovereignty and methods of delimiting territorial boundaries during the Ming and Qing periods, the Chinese concept of hegemony, and the history behind the deep mistrust that permeates Sino-Japanese relations. Finally, the author discloses the interwoven relationship between geography and history in East Asia. Chinese and Japanese geographers have for centuries been engaged in historical analyses of the islands. Their work, which has been used in the development of national security and diplomatic policies, is an important resource and one that this book makes available to Western scholars for the first time. In addition to his careful examination of these and other sources, Suganuma utilizes theoretical writings on geographical irredentism to expose the biases of recent work on the Diaoyu/Senkaku dispute. This volume is the fullest scholarly treatment that the contested issue of the Diaoyu/Senkaku Islands has received to date in any language. It contains much of interest for historians of modern China and Japan as well as for political scientists looking for new insights into international relations and Sino-Japanese interactions. No one who reads it will look at sovereignty in the same way again.

Islamic Reform and Political Change in Northern Nigeria Roman Loimeier, 2011-08-31 The 1970s and 1980s were times of political and religious turmoil in Nigeria, characterized by governmental upheaval, and aggressive confrontations between the Sufi brotherhoods and the Izala movement. In *Islamic Reform and Political Change in Northern Nigeria*, Roman Loimeier explores the intermeshing of religion in the struggle for political influence and preservation of the interests of Nigerian Muslims. Loimeier's careful scholarship combines astute readings of the work of previous scholars--both published and unpublished--with archival material and the findings of his own fieldwork in Nigeria. His work fills a substantial gap in contemporary Nigerian studies. This book provides invaluable and essential reading for serious students of Nigerian politics and of Islamic movements in Africa.
