Digital Assistants David Kent,2019-01-18 In recent years, disruptive technologies have seen how our students interact with us as teachers change, and transformed how we as teachers prepare and provide learning opportunities. For teachers too, it may also lead to changes in terms of with 'whom' we will teach, and how best we might begin to integrate robots and AI-based digital assistants into the classroom as teaching aides or personal learning companions for students. Speaking to machines, and seeing or hearing appropriate responses actioned, provides learners with a reason to speak that is not contrived and one that is inherently motivating and meaningful. To this end, the pedagogical affordances offered by digital assistants are explored, along with the pedagogical theory behind their effective implementation with learners for the teaching of English to speakers of other languages (TESOL). The actions/skills best suited for use are covered, as are effective techniques for integrating them into the classroom. This is supported by tutorials for Action/Skills creation, photocopiable material, and a comprehensive list of resources. A means for evaluating the appropriateness and viability of Actions/Skills for enhancing language learning is also provided.

Remembering and Disremembering the Dead Floris Tomasini,2017-08-01 This book is open access under a CC BY 4.0 licence. This book is a multidisciplinary work that investigates the notion of posthumous harm over time. The question what is and when is death, affects how we understand the possibility of posthumous harm and redemption. Whilst it is impossible to hurt the dead, it is possible to harm the wishes, beliefs and memories of persons that once lived. In this way, this book highlights the vulnerability of the dead, and makes connections to a historical oeuvre, to add critical value to similar concepts in history that are overlooked by most philosophers. There is a long historical view of case studies that illustrate the conceptual character of posthumous punishment; that is, dissection and gibbetting of the criminal corpse after the Murder Act (1752), and those shot at dawn during the First World War. A long historical view is also taken of posthumous harm; that is, body-snatching in the late Georgian period, and organ-snatching at Alder Hey in the 1990s.

The Ablest Navigator J. Wandres,2010-09-15 This action-packed tale focuses on a young U.S. Naval Academy graduate who helped create the Israeli Navy and led it into battle at the onset of Israel's War of Independence in 1948. J. Wandres's book is the first to record the crucial role played by Paul Shulman in the formation of the new nation, and in doing so, he provides a unique window on Israel's history and its relations with the United States. Following his WWII service on a U.S. Navy destroyer, Shulman resigned his commission to help smuggle Holocaust survivors into Palestine, and by early 1948, at the age of twenty-six, was training officers for a new Israeli Navy. The author draws on interviews and correspondence with those who knew Shulman, Israeli and American archives, and declassified secret U.S. State Department documents to tell the story.
