German Machine Guns of World War I Stephen Bull, 2016-05-19 World War I's defining weapon for many, Germany's MG 08 machine gun won a formidable reputation on battlefields from Tannenberg to the Somme. Although it was a lethally effective weapon when used from static positions, the MG 08 was far too heavy to perform a mobile role on the battlefield. As the British and French began to deploy lighter machine guns alongside their heavier weapons, the Germans fielded the Danish Madsen and British Lewis as stopgaps, but chose to adapt the MG 08 into a compromise weapon – the MG 08/15 – which would play a central role in the revolutionary developments in infantry tactics that characterized the last months of the conflict. In the 1940s, the two weapons were still in service with German forces fighting in a new world war. Drawing upon eyewitness battlefield reports, this absorbing study assesses the technical performance and combat record of these redoubtable and influential German machine guns, and their strengths and limitations in a variety of battlefield roles.

German Machine Guns in the Second World War Hans Seidler, 2013-07-03 German Machine Guns of the Second World War is a highly illustrated record of the German war machine between 1939 – 1945. Many of the photographs, all from the authors collection, come originally from the albums of individuals who took part in the war.??Arranged by theatre chronologically, the book analyses the development of the machine gun and describes how the Germans carefully utilised weapons such as the MG34 and the much vaunted MG42 into both offensive and defensive roles. Supported by a host of other machine guns like the MP28, MP38/40 and the lethal Sturmgerher 44, it depicts how these formidable machine guns fought against an ever increasing enemy threat.??Using over 250 rare and unpublished photographs together with detailed captions and accompanying text, this book provides a unique insight into German weaponry from early Blitzkrieg campaigns to the final demise of the Nazi empire.

A British major offers to spare McQueen's father in exchange for a simple request: kill George Washington, leader of the rebel troops. Gun Fodder - Four Years Of War [Illustrated Edition] Major A. MG 34 and MG 42 Machine Guns Chris McNab, 2012-10-20 With the MG 34, the German Wehrmacht introduced an entirely new concept in automatic firepower – the general-purpose machine gun (GPMG). In itself the MG 34 was an excellent weapon: an air-cooled, recoil-operated machine gun that could deliver killing firepower at ranges of more than 1,000m. Yet simply by changing its mount

and feed mechanism, the operator could radically transform its function. On its standard bipod it was a light machine gun, ideal for infantry assaults; on a tripod it could serve as a sustained-fire medium machine gun. During World War II, the MG 34 was superseded by a new GPMG – the MG 42. More efficient to manufacture and more robust, it had a blistering 1,200rpm rate of fire. Nicknamed 'Hitler's buzzsaw' by Allied troops, it was arguably the finest all-round GPMG ever produced, and alongside the MG 34 it inflicted heavy casualties. Featuring specially commissioned full-colour artwork and drawing upon numerous technical manuals and first-hand accounts, this study explores the technological development, varied roles and lasting influence of the revolutionary MG 34 and MG 42 machine guns and their postwar successors.

Armored Units of the Russian Civil War David Bullock, 2013-02-20 By 1920 the Red Army of Russia fielded an overwhelming array of armored cars, armored trains and tank detachments. These armored units played an important part in consolidating the newly won Bolshevik empire in the early 1920s; as a consequence of the fact that railways were the strategic arteries that essentially controlled Russia, armored trains have never played such a significant role in military history as they did in the Russian Civil War. This title details the management, construction, repair, personnel, training and combat of the Red Army's armored units on all fronts, including such famous vehicles as Trotsky's armored train.
