Another Reason Gyan Prakash, 2020-06-16 Another Reason is a bold and innovative study of the intimate relationship between science, colonialism, and the modern nation. Gyan Prakash, one of the most influential historians of India writing today, explores in fresh and unexpected ways the complexities, contradictions, and profound importance of this relationship in the history of the subcontinent. He reveals how science served simultaneously as an instrument of empire and as a symbol of liberty, progress, and universal reason--and how, in playing these dramatically different roles, it was crucial to the emergence of the modern nation. Prakash ranges over two hundred years of Indian history, from the early days of British rule to the dawn of the postcolonial era. He begins by taking us into colonial museums and exhibitions, where Indian arts, crafts, plants, animals, and even people were categorized, labeled, and displayed in the name of science. He shows how science gave the British the means to build railways, canals, and bridges, to transform agriculture and the treatment of disease, to reconstruct India's economy, and to transfigure India's intellectual life--all to create a stable, rationalized, and profitable colony under British domination. But Prakash points out that science also represented freedom of thought and that for the British to use it to practice despotism was a deeply contradictory enterprise. Seizing on this contradiction, many of the colonized elite began to seek parallels and precedents for scientific thought in India's own intellectual history, creating a hybrid form of knowledge that combined western ideas with local cultural and religious understanding. Their work disrupted accepted notions of colonizer versus colonized, civilized versus savage, modern versus traditional, and created a form of modernity that was at once western and indigenous. Throughout,

Prakash draws on major and minor figures on both sides of the colonial divide, including Mahatma Gandhi, Jawaharlal Nehru, the nationalist historian and novelist Romesh Chunder Dutt, Prafulla Chandra Ray (author of *A History of Hindu Chemistry*), Rudyard Kipling, Lord Dalhousie, and John Stuart Mill. With its deft combination of rich historical detail and vigorous new arguments and interpretations, *Another Reason* will recast how we understand the contradictory and colonial genealogy of the modern nation.

**Tattva Gyan – Elements of Knowledge (eBook)** Gurushree Vidushii Luthra, 2015-01-01 In this book of elements, the mystic value attached to various symbols in Hindu culture and in nature has been deeply expounded by Gurushree Vidushii. The entire creation is self-filled and all elements in Srishti are fragments of a single elementary truth you call soul or the spirit. The voiceless sound of that infinite transcendental spirit which is the essence of all life and living beings will help you go beyond the perception of the senses and make you see the unseen background behind the objects of the world. Realize the inner you by observing the universality in the nature of the world.

This is a beginning place, and if studied and applied will provide a good grasp of your chart and a foundation for deeper study. **The Phenomenon of Knowing** Gyan Francis, 2017-11-06 The book attempts to present a new vision or view in the world of knowing. The query it poses is, What is it that we know? Our spontaneous assumption is, what we know is real, the existent as it is or exists. The attempt here is to find how far our claim that what we know is real or that what is there and what we know is the same is true. If not, what is it that we know? The theory of relativity claims, on the scientific evidence, that we do not know what is real because the real that which is changes. Einstein's theory of relativity throws the onus of relativity on the nature of the real. This attempt tries to find the cause of relativity, if there are any. One may be surprised to find a new vision of what we know and the cause of relative nature of knowledge.
