Piece of Cake Derek Robinson,2013-11-05 From the Phoney War of 1939 to the Battle of Britain in 1940, the pilots of Hornet Squadron learn their lessons the hard way. Hi-jinks are all very well on the ground, but once in a Hurricane's cockpit, the best killers keep their wits close. Newly promoted Commanding Officer Fanny Barton has a job on to whip the Hornets into shape before they face the Luftwaffe's seasoned pilots. And sometimes Fighter Command, with its obsolete tactics and stiff doctrines, is the real menace. As with all Robinson's novels, the raw dialogue, rich black humor and brilliantly rendered, adrenaline-packed dogfights bring the Battle of Britain, and the brave few who fought it, to life.

Hampden squadrons of World War II Mark Postlethwaite,2003 Beretter om RAF enheder, der under 2. verdenskrig fløj bombeflyet Handley Page Hampden.

Handley Page Hampden & Hereford ,1980

5 Group Bomber Command Chris Ward,2007 During the immediate period before World War

Two, the RAF modified its command structure to rationalize for rapid expansion. Bomber Command was divided into six operational groups, each flying the same type of aircraft. In 1939 5 Group was flying the Handley Page Hampden, a fast, modern aircraft that carried a large payload. However, during the early daylight raids into enemy occupied Europe it suffered great losses due to its defensive armament leaving too many blind spots. The Group now turned to night bombing and mine-laying operations. During November 1940, the first Avro Manchesters entered service but were to prove dangerously unreliable. It was not until the Avro Lancaster began arriving in strength that the Group began its proud history of successful and often highly dangerous raids into the Reich, the most famous of which was No 617 Squadron's attack on the Mohne, Eder and Sorpe dams. Between 1939 and 1945 the Group flew 70,351 sorties with the loss of 1,888 aircraft. This book contains a lengthy narrative of the group's operations and contains individual squadron statistics, their commanding officers, stations and aircraft losses. It provides a detailed reference for one of the RAF's most important and successful operational groups.

Bomber Command Gordon A. A. Wilson, 2021-11-15 A complete history of Bomber Command, including its crucial role in WWII and later nuclear role in the Cold War.

Bomber Boy Dereck French, 2020-01-15 A vivid and insightful account of the early World War Two air war from a bomber pilot's perspective.

International Warbirds John C. Fredriksen, 2001-08-01 In depth descriptions and photographs of the aircraft of 21 nations presented with a unique human dimension that goes behind the machines to the people involved. Invaluable for specialists, accessible to enthusiasts, *International Warbirds: An Illustrated Guide to World Military Aircraft, 1914-2000* puts the most legendary fighter aircraft of the 20th century developed outside the United States on vivid display. It offers 336 illustrated biographies

of the most significant warplanes used in squadron service from World War I to the Balkan conflict, including numerous models from Great Britain, France, Russia, and Japan, as well as notable machines from Israel, Canada, China, India, Brazil, and other nations. Entries span the history and scope of military aircraft from bombers and fighters to transports, trainers, reconnaissance craft, sea planes, and helicopters, with each capsule history combining nuts-and-bolts technical data with the story of that model's evolution and use. Together, these portraits offer an exciting, well-researched tribute to visionary designers and builders as well as courageous pilots and crews across the globe, and tell a vivid tale of how air power became such a decisive factor in modern warfare.

Enemy Coast Ahead Guy Gibson,2002 Wing Commander Guy Gibson writes affectionately about his beloved aircrews.

Torpedo Bombers, 1900-1950 Jean-Denis Lepage,2020-01-27 The torpedo-bomber was a very short-lived weapon system, operational for scarcely half a century from just prior WWI to the 1960s. Yet during its brief existence it transformed naval warfare, extending the ship-killing range of ships and coastal defences to hundreds of miles. The Royal Navy and Fleet Air Arm led the way, recording the first sinking of a ship by aerial torpedo in August 1915 but all major navies eagerly developed their own torpedo bomber forces. The torpedo-bomber reached its zenith in WWII, particularly from 1940-42, with notable successes at the Battle of Taranto, the sinking of the Bismarck and Pearl Harbor. It was the weapon of choice for both the US and Japanese in the big Pacific battles such as Midway. In the latter stages of the war, increasingly effective anti-aircraft fire and interceptor aircraft

started to render it obsolete, a process completed post-war by long-range anti-ship missiles. Jean-Denis Lepage traces the development of torpedo bombers worldwide, describing their tactics, operational history and the aircraft themselves, including such well-loved types as the Swordfish, Beaufighter and Avenger. Over 300 aircraft are beautifully illustrated.

Bomber Offensive Arthur Harris, 2005-03-01 Sir Arthur Harris - Bomber Harris - remains the target of criticism and vilification by many, while others believe the contribution he and his men made to victory is grossly undervalued. He led the men of Bomber Command in the face of appalling casualties, had fierce disagreements with higher authority and enjoyed a complicated relationship with Winston Churchill. Written soon after the close of World War 2, this collection of Sir Arthur Harris's memoirs reveals the man behind the Allied bombing offensive that culminated in the destruction of the Nazi war machine but also many beautiful cities, including Dresden.

Empire of the Clouds James Hamilton-Paterson, 2010-10-07 In 1945 Britain was the world's leading designer and builder of aircraft - a world-class achievement that was not mere rhetoric. And what aircraft they were. The sleek Comet, the first jet airliner. The awesome delta-winged Vulcan, an intercontinental bomber that could be thrown about the sky like a fighter. The Hawker Hunter, the most beautiful fighter-jet ever built and the Lightning, which could zoom ten miles above the clouds in a couple of minutes and whose pilots rated flying it as better than sex. How did Britain so lose the plot that today there is not a single aircraft manufacturer of any significance in the country? What became of the great industry of de Havilland or Handley Page? And what was it like to be alive in that marvellous post-war moment when innovative new British aircraft made their debut, and pilots were the rock stars of the age? James Hamilton-Paterson captures that season of glory in a compelling book that fuses his own memories of being a schoolboy plane spotter with a ruefully realistic history of

British decline - its loss of self confidence and power. It is the story of great and charismatic machines and the men who flew them: heroes such as Bill Waterton, Neville Duke, John Derry and Bill Beaumont who took inconceivable risks, so that we could fly without a second thought.

Aircraft Wrecks Nick Wotherspoon, Alan Clark, Mark Sheldon, 2009-01-01 This book gives readers a direct link to crash sites that can be visited, with accurate grid references, site description and current photographs. It covers some 450 selected sites with emphasis given to those on open access land. The areas covered are: Southern England: Dartmoor and Exmoor - 20 entries * Wales - 120 entries * Isle of Man - 20 entries Peak District - 75 entries * Yorkshire Moors: Eastern - 20 entries * Lake District - 25 entries Pennines: East Lancashire & West Yorkshire * Scotland: Central and Southern - 30 entries Scotland: Highlands & Islands * Ireland - 20 entries Each area includes a preamble describing the local geography and historical notes. Individual site entries include exact location, details of the aircraft and crew and the circumstances of the loss.

Bomber Command 1936-1968 Ken Delve, 2005-09-29 This is a comprehensive reference to the structure, operation, aircraft and men of Bomber Command from its formation on 1936 to 1968 when it became part of Strike Command. It includes descriptions of many notable bombing raids, the many types of aircraft used, weapons and airfields. The five main sections of the book include a general historical introduction and overview, operations, operational groups, aircrew training and technical details of each aircraft type. Lengthy Annexes cover personnel, the squadrons in World War II, accuracy of attacks, orders of battle for each wartime year, maps of airfields locations, tonnage of bombs dropped and nuclear weapons carried in the post-war years.

Bloody Paralyser Rob Langham, 2017-03-13 *Bloody Paralyser: The Giant Handley Page Bombers of the First World War* tells the story of the largest British bombers of the First World War and the men

who flew them. In 1915, the biggest plane ever seen in Britain took flight for the first time a twin-engine monster with a 100- foot wingspan, designed to be a Bloody Paralyser to the Germans. Operating mainly at night, the Handley Page bombers attacked Germany and Germanoccupied towns and cities, disrupting the enemy s industry and transport and targeting U-boats that were causing heavy losses to merchant shipping. The men that flew in the Bloody Paralysers were the forerunners of the crews of Bomber Command in the Second World War, and now their story is told in their own words.

Florida Warplanes Harold A. Skaarup, 2010-11-01 This aviation handbook is designed to be used as a quick reference to the classic military heritage aircraft that have been restored and preserved in the state of Florida. The aircraft include those flown by members of the United States Air Force, the United States Navy, the United States Army, the United States Marine Corps, the United States Coast Guard, the Air and Army National Guard, and by various NATO and allied nations as well as a number previously operated by opposition forces in peace and war. The interested reader will find useful information and a few technical details on most of the military aircraft that have been in service with active flying squadrons both at home and overseas. 160 selected photographs have been included to illustrate a few of the major examples in addition to the serial numbers assigned to American military aircraft. For those who like to actually see the aircraft concerned, aviation museum locations, addresses and contact phone numbers have been included, along with a list of aircraft held in each museums current inventory or on display as gate guardians throughout the State of Florida. The aircraft presented in this edition are listed alphabetically by manufacturer, number and type. Although many of Floridas heritage warplanes have completely disappeared, a few have been carefully collected, restored and preserved, and some have even been restored to flying condition.

This guide-book should help you to find and view Floridas Warplane survivors.

GWR Collett Castle Class Keith Langston,2015-03-30 The 'Castle' class 4-6-0 locomotives designed by Charles Collett and built at Swindon Works were the principal passenger locomotives of the Great Western Railway. The 4-cylinder locomotives were built in batches between 1923 and 1950, the later examples being constructed after nationalisation by British Railways. ??In total 171 engines of the class were built and they were originally to be seen at work all over the Great Western Railway network, and later working on the Western Region of British Railways. ?The highly successful class could be described as a GWR work in progress, because further development took place over almost all of the locomotives working lives. In addition to inspiring other locomotive designers the 'Castle' class engines were proved to be capable of outstanding performances, and when introduced were rightly described as being 'Britain's most powerful passenger locomotives'. Some of the 'Castles' survived in service for over 40 years, and individually clocked up just a little short of 2 million miles in traffic. ??In this book, Keith Langston provides a definitive chronological history of the iconic class together with archive photographic records of each GWR 'Castle' locomotive. Many of the 300 plus images are published for the first time. In addition background information on the origin of the names the engines carried, including details of the many name changes which took place, are also included. The extra anecdotal information adds a fascinating glimpse of social history. ??Collett CASTLE Class is a lavishly illustrated factual reference book which will delight steam railway enthusiasts in general and in particular those with a love of all things Great Western!

Taming the Skies Peter Pigott,2003-07-01 It is a cruel irony of history that as we celebrate the centenary of flight on December 17, 2003, aviation is in a tailspin and airlines are disappearing in Canada. Yet flight itself remains one of humanity's most spectacular triumphs, and Canada especially

has much to be proud of. Contained within these covers is a complex portrait of Canadian aviation, from the Silver Dart to the Cormorant. Packed with photographs as colourful as the details that accompany them, it bursts with unforgettable aircraft trivia.
