Telematics Solutions in Maritime and Inland Waterway Transport Ryszard K. Miler,2019-04-24 This book contributes to the identification and systematisation of current telematics solutions applied in maritime and inland waterway transport. It represents the first time that most telematics systems currently applied in the modes of water transport have been described in detail. The volume details the massive scope of the application of telematics solutions in maritime transport, showing how it ranges from simple systems of navigation to unmanned systems which have resulted in the first attempts at launching fully autonomic vessels. The current challenges in the field involve the integration of the systems of maritime and inland waterway transport within the framework of multimodal transport operations.

In Pursuit of Giants Matt Rigney,2017-04-04 For millennia the great fish—marlin, bluefin tuna, and swordfish—have reigned over the world’s oceans and awed human beings. Naturalists, photographers, sportfishermen, and writers from Zane Grey to Ernest Hemingway have been inspired by their beauty, power, and sheer size. But like much other marine life today, these fish face perilous reductions in their populations due to destructive and illegal fishing, inept fisheries management practices, and dramatic changes in ocean ecology, including those wrought by climate change. *In Pursuit of Giants* is a moving elegy and a call to arms for the protection of these creatures, as well as a five-year, 75,000-mile global adventure story that takes author Matt Rigney on a quest to discover how once-thriving species are now threatened. Rigney’s pilgrimage to encounter these giants takes him from the sportfishing mecca of Cabo San Lucas, to the Great Barrier Reef, from New Zealand to Nova Scotia, Japan and the Mediterranean, as he joins commercial and sport fishermen, marine biologists, fish-farming pioneers, and ocean activists to investigate the dangers these species face, and the various efforts being made—not to protect them.
