Bauhaus Effects in Art, Architecture, and Design Kathleen James-Chakraborty, Sabine T. Kriebel, 2022-04-21 Bringing together an international team of scholars, this book offers new perspectives on the impact that the Bauhaus and its teaching had on a wide range of artistic practices. Three of the fields in which the Bauhaus generated immediately transformative effects were housing, typography, and photography. Contributors go further to chart the surprising relation of the school to contemporary developments in hairstyling and shop window display in unprecedented detail. New scholarship

has detailed the degree to which Bauhaus faculty and students set off around the world, but it has seldom paid attention to its impact in communist East Germany or in countries like Ireland where no Bauhäusler settled. This wide-ranging collection makes clear that a century after its founding, many new stories remain to be told about the influence of the twentieth century's most innovative arts institution. The book will be of interest to scholars working in art history, design history, photography, and architectural history.

Blanton, Agnes Choi, Jinyu Liu, 2022 This volume introduces new perspectives on taxation policies in the Roman Empire, the Galilee, and Egypt, with unique insights into the economic effects of imperial pacification on local and regional microlevel economies in the Galilee both before and after the First Jewish Revolt against Rome. Through examining tax documents and other ancient texts in detail, this book offers innovative perspectives on the mechanisms, ideological justifications, and politically hierarchizing functions of taxation and tribute, particularly in the Roman Empire.
