US Patrol Torpedo Boats Gordon L. Rottman, 2011-12-20 ALSO AVAILABLE AS AN E-BOOK. Motor torpedo boat development began in the early 1900s, and the vessels first saw service during World War I. However, it was not until the late 1930s that the US Navy commenced the development of the Patrol Torpedo or PT boat. The PT boat was designed for attacking larger warships with torpedoes using its 'stealth' ability, high-speed and small size to launch and survive these attacks – although they were employed in a wide variety of other missions, including rescuing General MacArthur and his entourage from the Philippines. This book examines the design and development of these unique craft, very few of which survive today, and goes on to examine their role and combat deployment in World War II.

**Iron Butterfly** Ralph Christopher, Chief Jim Davy, 2010-06-08 The true story of an elite group of men who wrote a page in Naval history. They patrolled the waterways in thirty-one foot river patrol boats powered by Detroit diesel engines with water jet-propulsion. Armed with machineguns and grenade launchers, as well as sheer guts and determination, these sailors faced danger around every bend in the river. Working together, they became one of the finest weapons in Admiral Zumwalt's arsenal for turning back the tide of communist infiltration into Saigon, taking control of the inland waterways. These are true accounts of their bravery, which they proved time and again by spearheading operations into enemy controlled territory. United together in brotherhood, they accomplished all their missions and won their part of the Vietnam War.
