**The State of World Rural Poverty** Idriss Jazairy,Mohiuddin Alamgir,Theresa Panuccio,1992 Despite almost four decades and billions of dollars in development activities, we are barely in a position to track the changing dynamics of poverty or to define with conviction the processes that entrap the poor in their misery. Accounting for about 90% of global poverty, rural poverty, through transmigration, is also a main contributor to urban poverty. It is in the rural areas of the world where poverty is most severe in human terms, where the hunger, hopelessness, hardship, and despair commonly associated with entrenched poverty are most pronounced, where basic health

services, sanitation, educational opportunities, and other common amenities are most lacking. The alleviation of rural poverty is therefore tantamount to the alleviation of global poverty in its entirety. The State of World Rural Poverty offers the first comprehensive look at the economic conditions and prospects of the world's rural poor.
