Heinkel He162 Robert Forsyth,Eddie J. Creek,2009-05-21 If it can be said that adversity generates creativity, then the story of the Heinkel He 162 jet fighter is testimony to such a precept. From the summer of 1944, the adversity facing the leadership of the Third Reich was formidable. Ironically however, the very existence of such adversity prompted many inventive designs for the air defence of the Reich on a determined and even manic scale. The pinnacle of these accomplishments was the so-called Volksjäger (the 'People's Fighter') project which was, and still is, regarded as a 'miracle of production'.Created in desperation by the Nazi leadership in mid-1944, and powered by a BMW turbojet, the He 162 was known to its pilots as the 'Spatz' (the 'Sparrow'). It represented an unprecedented aeronautical and engineering achievement, with the aircraft going from drawing board to prototype flight in just three months, often at considerable human cost.In this book, aviation historians Robert Forsyth and Eddie J. Creek draw, for the first time, on hundreds of previously unused Heinkel company papers to offer a unique insight into the workings of the Nazi production system in the late-war period, as well as other German and Allied documents. Their work is supported by many rare photographs and accompanied by line drawings and facsimile documents as well as highly detailed colour artwork by He 162 specialist, Simon Schatz.Heinkel He 162 Spatz offers the whole history of the Volksjäger project, and is the first major history of this fascinating aircraft to be published in the English language. A natural accompaniment to the other detailed German aircraft monographs published by Classic Publications, it is certain to find a ready audience and will form an essential reference work to all those interested in the airpower of World War 2.

He 162 Volksjäger Units Robert Forsyth,2016-11-17 With the Third Reich on the brink of defeat Hitler's instructions to his designers were clear. He wanted a Volksjäger – a People's Fighter that was quick to produce and used minimal quantities of strategic materials. Heinkel rose to the challenge with the He 162, a fighter constructed of wood and metal that was designed, built and flown in the staggeringly short time of ten weeks. Professional pilots were in short supply, and so the Luftwaffe was ordered to man the He 162 with hastily trained members of the Hitler Youth – a flawed plan that fortunately never came to fruition. Detailed aircraft profiles and never before seen photographs perfectly complement the analysis of the revolutionary Heinkel He 162 as author Robert Forsyth traces its entire history, from the early design and production through to its limited combat experience.

Heinkel He 162 Dan Sharp,2020-04-19 The history of the Luftwaffe's last minute single-jet fighter, the Heinkel He 162, is neither standard nor straightforward. Originally conceived as the jet fighter anyone could fly into combat, the He 162 was designed and built in under five months - an astonishing and unparalleled feat of engineering. But what emerged was not a simple jet fighter but a tricky 'widow-maker' which killed far more of its own pilots than it ever did those of the enemy. Going back to the original wartime documentation, author Dan Sharp examines the story of this remarkable aircraft in detail.

Heinkel HE 162 Volksjäger Peter Muller,2010-01-01 The primary objective of this source edition is to provide readers with original documents, allowing them to form their own impression of the development, manufacture and operation of the Heinkel He 162. By linking this accumulated data with the historical situation of those times, we hope to have facilitated a more objective assessment of the Volksjäger project.

He 162 Salamander Chris Meadows,2010-08 The Salamander, He 162, was designed, constructed and produced all within 3 months. Within another 3 months it was operational in the field. The story is close to an industrial masterpiece, all happening within seven months of the end of the war. The He 162 worked and could have been a quite effective fighter. This is the story of a desperate last ditch weapon system that after its creation, became a huge success as an innovation and could have become an effective easy-to-use weapon, had the war lasted longer... This is the He 162s story

Thunder Over the Reich Wolfgang Wollenweber,2014-06 This is a vividly told story and an important inside account not just of the revolutionary He162, but also the changing fortunes of the Luftwaffe.

Aircraft of the Luftwaffe, 1935Ð1945 Jean-Denis G.G. Lepage,2009-01-29 One of the most significant innovations in modern warfare has been the appearance and development of air power, a technology which demanded technical and financial investment on a whole new scale and which ultimately changed the fundamental nature of war itself. This book covers the history and development of the German air force from 1935 to 1945, with descriptions and illustrations of almost all of the Luftwaffe's airplanes, including fighters, jet fighters, dive-bombers, ground attackers, medium and heavy bombers, jet bombers, seaplanes, flying boats and carrier planes, transport and gliders, reconnaissance and training aircrafts, helicopters, and many futuristic projects and other rarities.

Fighting Hitler's Jets Robert F. Dorr,2013-11-15 Fighting Hitler's Jets brings together in a single, character-driven narrative two groups of men at war: on one side, American fighter pilots and others who battled the secret “wonder weapons” with which Adolf Hitler hoped to turn the tide; on the other, the German scientists, engineers, and pilots who created and used these machines of war on the cutting edge of technology. Written by Robert F. Dorr, renowned author of Zenith Press titles Hell Hawks!, Mission to Berlin,

and Mission to Tokyo, the story begins with a display of high-tech secret weapons arranged for Hitler at a time when Germany still had prospects of winning the war. It concludes with Berlin in rubble and the Allies seeking German technology in order to jumpstart their own jet-powered aviation programs. Along the way, Dorr expertly describes the battles in the sky over the Third Reich that made it possible for the Allies to mount the D-Day invasion and advance toward Berlin. Finally, the book addresses both facts and speculation about German weaponry and leaders, including conspiracy theorists’ view that Hitler escaped in a secret aircraft at the war’s end. Where history and controversy collide with riveting narrative, *Fighting Hitler’s Jets* furthers a repertoire that comprises some of the United States’ most exceptional military writing.

Bombs Away! John R. Bruning,2011-05-22 *Bombs Away!* covers strategic bombing in Europe during World War II, that is, all aerial bombardment of a strategic nature which took place between 1939 and 1945. In addition to American (U.S. Army Air Forces) and British (RAF Bomber Command) strategic aerial campaigns against Germany, this book covers German use of strategic bombing during the Nazi’s conquest of Europe: the Battle of Britain, Operation Barbarossa, and the V 1 and V 2, where the Luftwaffe targeted Warsaw and Rotterdam (known as the Rotterdam Blitz). In addition, the book covers the blitzes against London and the bombing of other British industrial and port cities, such as Birmingham, Liverpool, Southampton, Manchester, Bristol, Belfast, Cardiff, and Coventry bombed during the Battle of Britain. The twin Allied campaigns against Germany—the USAAF by day, the RAF by night—built up into massive bombing of German industrial areas, notably the Ruhr, followed by attacks directly on cities such as Hamburg, Kassel, Pforzheim, Mainz, Cologne, Bremen, Essen, Düsseldorf, Hanover, Dortmund, Frankfurt, and the still controversial fire-bombing of Hamburg and Dresden. In addition to obvious targets like aircraft and tank manufacturers, ball bearing factories and plants that manufactured abrasives and grinding wheels were high priority targets. Petroleum refineries were a key target with USAAF aircraft based in North Africa and later Italy, bombing the massive refinery complexes in and around Ploesti, Romania, until August 1944 when the Soviet Red Army captured the area. Other missions included industrial targets in southern Germany like Regensburg and Schweinfurt. Missions to the Nazi capital, Berlin, started in 1940 and continued through March 1945. Throughout the war there were 314 air raids on Berlin. All of this is covered in detail with authoritative text and hundreds of archival photographs, many rare or never before published.

Modelling Luftwaffe Jets and Wonder Weapons Brett Green,2012-11-20 While the Allies largely relied on mass production to help them win World War II, Germany put a great deal of their limited resources into new technologies and wonder weapons. In addition to these tangible assets, which were used with varying degrees of success, the drawing boards of Germany were littered with dozens of advanced designs that never reached the prototype or production stages. Many of these operational and paper projects advanced the pace and influenced the direction of aircraft development in the decades following World War II, with many of the German engineers responsible for these innovations seamlessly continuing their roles in the United States and the USSR. Modellers have had a long fascination for the Luftwaffe's jet arsenal and secret weapons of fact and fiction and this new Osprey Masterclass will explore the Luftwaffe jets and rocket planes that saw service at the end of World War II.

The Jet Race and the Second World War S. Mike Pavelec,2007-02-28 In the 1930s, as nations braced for war, the German military build up caught Britain and the United States off-guard, particularly in aviation technology. The unending quest for speed resulted in the need for radical alternatives to piston engines. In Germany, Dr. Hans von Ohain was the first to complete a flight-worthy turbojet engine for aircraft. It was installed in a Heinkel-designed aircraft, and the Germans began the jet age on August 27, 1939. The Germans led the jet race throughout the war and were the first to produce jet aircraft for combat operations. In England, the doggedly determined Frank Whittle also developed a turbojet engine, but without the support enjoyed by his German counterpart. The British came second in the jet race when Whittle's engine powered the Gloster Pioneer on May 15, 1941. The Whittle-Gloster relationship continued and produced the only Allied combat jet aircraft during the war, the Meteor, which was relegated to Home Defense in Britain. In America, General Electric copied the Whittle designs, and Bell Aircraft contracted to build the first American jet plane. On October 1, 1942, a lackluster performance from the Bell Airacomet, ushered in the American jet age. The Yanks forged ahead, and had numerous engine and airframe programs in development by the end of the war. But, the Germans did it right and did it first, while the Allies lagged throughout the war, only rising to technological prominence on the ashes of the German defeat. Pavelec's analysis of the jet race uncovers all the excitement in the high-stakes race to develop effective jet engines for warfare and transport.

Allied Jet Killers of World War 2 Stephen Chapis,Andrew Thomas,2017-12-28 Allied fighter pilots began encountering German jets - principally the outstanding Me 262 fighter - from the autumn of 1944. Stunned by the aircraft's speed and rate of climb, it took USAAF and RAF units time to work out how to combat this deadly threat as the Luftwaffe targeted the medium and heavy bombers attacking targets across the Reich. A number of high-scoring aces from the Eighth Air Force (Drew, Glover, Meyer, Norley and Yeager, to name but a few) succeeded in claiming Me 262s, Me 163 and Ar 234s during the final months of the campaign, as did RAF aces like Tony Gaze and 'Foob' Fairbanks. The exploits of both famous and little-known pilots will be chronicled in this volume, detailing how they pushed their P-47s, P-51s, Spitfires and Tempests to the limits of their performance in order to down the Luftwaffe's 'wonder weapons'.
