**The Chinese HEART in a Cognitive Perspective** Ning Yu, 2009-02-26 This book is a cognitive semantic study of the Chinese conceptualization of the heart, traditionally seen as the central faculty of cognition. The Chinese word *xin*, which primarily denotes the heart organ, covers the meanings of both heart and mind as understood in English, which upholds a heart-head dichotomy. In contrast to the Western dualist view, Chinese takes on a more holistic view that sees the heart as the center of both emotions and thought. The contrast characterizes two cultural traditions that have developed different conceptualizations of person, self, and agent of cognition. The concept of heart lies at the core of Chinese thought and medicine, and its importance to Chinese culture is extensively manifested in the Chinese language. Diachronically, this book traces the roots of its conception in ancient Chinese philosophy and traditional Chinese medicine. Along the synchronic dimension, it not only makes a systematic analysis of conventionalized expressions that reflect the underlying cultural models and conceptualizations, as well as underlying conceptual metaphors and metonymies, but also attempts a textual analysis of an essay and a number of poems for their metaphoric and metonymic images and imports contributing to the cultural models and conceptualizations. It also takes up a comparative

perspective that sheds light on similarities and differences between Western and Chinese cultures in the understanding of the heart, brain, body, mind, self, and person. The book contributes to the understanding of the embodied nature of human cognition situated in its cultural context, and the relationship between language, culture, and cognition.

*Embodiment in Cross-Linguistic Studies*, 2023-09-04 The book explores the conceptualization of the 'heart' as it is represented in 19 languages, ranging from broadly

studied to endangered ones. Being one of the most extensively utilised body part name for figurative usages, it lends itself to rich polysemy and a wide array of metaphorical and metonymical meanings. The present book offers a rich selection of papers which observe the lexeme 'heart' from diverse perspectives, employing primarily the frameworks of cognitive and cultural linguistics as well as formal methodologies of lexicology and morphology. The findings are unique and novel contributions to the research of body-part semantics, embodied cognition and metaphor analysis, and in general, the investigation of the interconnectedness of language, culture, cognition and perception about the human body.

The Body in Language Matthias Brenzinger, Iwona Kraska-Szlenk, 2014-07-17 The Body in Language provides theoretical reflections on grammaticalization, lexical semantics, philosophy, multimodal communication as well as on cognitive linguistics in general. Case studies discuss the embodiment in a wide range of languages and from diverse cultures on various continents.

**Dominator of the Stars** Ku SeDeCha, 2021-04-14 In the vast universe, 100 races coexisted. A mutated blood spirit allowed Mu Qing to rise up from earth to fight against the bug clan. The purple bamboo forest attracted millions of thunder tribulations, and the black Kun Peng flapped its wings, crushing countless powerhouses. There was only one Imperial Lord in the starry sky!

*Culture, Body, and Language* Farzad Sharifian, René Dirven, Ning Yu, Susanne Niemeier, 2008-11-03 One of the central themes in cognitive linguistics is the uniquely human development of some higher potential called the mind and, more particularly, the

intertwining of body and mind, which has come to be known as embodiment. Several books and volumes have explored this theme in length. However, the interaction between culture, body and language has not received the due attention that it deserves. Naturally, any serious exploration of the interface between body, language and culture would require an analytical tool that would capture the ways in which different cultural groups conceptualize their feelings, thinking, and other experiences in relation to body and language. A well-established notion that appears to be promising in this direction is that of cultural models, constituting the building blocks of a group's cultural cognition. The volume results from an attempt to bring together a group of scholars from various language backgrounds to make a collective attempt to explore the relationship between body, language and culture by focusing on conceptualizations of the heart and other internal body organs across a number of languages. The general aim of this venture is to explore (a) the ways in which internal body organs have been employed in different languages to conceptualize human experiences such as emotions and/or workings of the mind, and (b) the cultural models that appear to account for the observed similarities as well as differences of the various conceptualizations of internal body organs. The volume as a whole engages not only with linguistic analyses of terms that refer to internal body organs across different languages but also with the origin of the cultural models that are associated with internal body organs in different cultural systems, such as ethnomedical and religious traditions. Some contributions also discuss their findings in relations to some philosophical doctrines that have addressed the relationship between mind, body, and language, such as that of Descartes.

**Metaphor in Culture** Zoltán Kövecses,2005-02-07 To what extent and in what ways is metaphorical thought relevant to an understanding of culture and society? More specifically: can the cognitive linguistic view of metaphor simultaneously explain both universality and diversity in metaphorical thought? Cognitive linguists have done important work on universal aspects of metaphor, but they have paid much less attention to why metaphors vary both interculturally and intraculturally as extensively as they do. In this book, Zoltán Kövecses proposes a new theory of metaphor variation. First, he identifies the major dimension of metaphor variation, that is, those social and cultural

boundaries that signal discontinuities in human experience. Second, he describes which components, or aspects of conceptual metaphor are involved in metaphor variation, and how they are involved. Third, he isolates the main causes of metaphor variation. Fourth Professor Kövecses addresses the issue to the degree of cultural coherence in the interplay among conceptual metaphors, embodiment, and causes of metaphor variation.
