

Helicopter Gunship

Richard C Knott

Gunship Pilot Robert F. Hartley,2015-02-24 It was 1968 and Robert Hartley was on his first combat mission in Vietnam as copilot of a helicopter gunship. As he and his platoon leader flew over the A Shau Valley, a Chinook helicopter engulfed in flames suddenly came into view. Hartley noticed tiny black smoking objects exiting the tail ramp of the aircraft. Seconds later, he realized those objects were men escaping the flames and plunging to their deaths. It was in that moment that he silently wondered, “How the hell did I get here?” Mr. Hartley was still wet behind the ears when he was tossed into the cauldron of America’s most unpopular war as an attack helicopter gunship pilot. As he shares a gripping, birds-eye view of battles that took him from the Demilitarized Zone in the north to the Mekong Delta in the south, Mr. Hartley compellingly details how he learned to rely on his superior training and equipment to follow through with his mission to kill the enemy and save the lives of his fellow soldiers below. Gunship Pilot provides an unforgettable glimpse into two combat tours of duty in Vietnam as a helicopter pilot soaring high above rice paddies and jungles attempts to fulfill his duty of protecting America’s warriors on the ground.

Helicopter Gunships Wayne Mutza,2010 U.S. Army aviators pioneered the first helicopter gun platforms in the early 1950s. Today, helicopter gunships are the most unique element of rotary-wing aviation, redefining the term close air support. As the ultimate development of the military helicopter, these largely U. S.-designed-and-built aircraft reign supreme as the premier attack platforms of modern aerial warfare. Helicopter Gunships begins with the Vietnam War as the ultimate proving ground that first utilized helicopter gunships and saw the development of other rotary-wing weapons systems as well. This book also explores fascinating post-war programs like the experimental Comanche, Blackhawk, and Apache. Through in-depth research and exclusive high-quality photos, noted author and helicopter expert Wayne Mutza examines in vivid detail the numerous weapon systems mated with a surprisingly wide variety of helicopters. Attention is also given to helicopter gunships developed by other Free World countries and Communist nations.

Stingers Fred Allen,2021-08-06 The author presents this book based on his personal experiences in the Vietnam War. His intent is to portray his perspective as an 18-year-old Stinger Gunship Crew Chief/Door Gunner. He wants the reader to experience what it is like to kill dozens of enemy combatants and collateral, non-combatants. How to live with the frequent near-death experiences and the constant high probability of being killed. Endure the frequent loss of fellow soldiers in combat. Witness a young soldier losing all sense of humanity as he transforms into a warrior that thrives on killing. The real life incidents portray a platoon of Huey UH-1C gunships, called the Stingers and its elite, motivated crews.As a component of U.S. Army assault helicopter companies, the guns protected the Huey slicks as they inserted or extracted infantry troops from landing and extraction zones. The gunships regularly conducted search and kill missions. They were often scrambled to provide lifesaving protection for infantry units threatened by enemy forces. Gunship crews were among the most lethal pilots, crew chiefs and door gunners in Army aviation. Some gunship crew chiefs had over 400 hundred personal kills.An intense warrior mentality was crucial to mission success and survival. Killing was a way of life in the guns.One of the most decorated and experienced aviation combat units in the Vietnam War was the Stingers' parent, the 116th Assault Helicopter Company, known as the Hornets.Follow the operational strategy as Army Command reassigns the Hornets from III Corps, near Saigon to Chu Lai in I Corps under the command of the 23rd Infantry Division, known as Americal.Experience the rapid increase of lethal enemy encounters. Americal imposed severe constraints on the Stingers in the aftermath of the My Lai massacre. The Stingers and slick platoons of the 116th fight on. The young combat veteran becomes short with just a few months left in his tour of duty. Americal reassigns the 116th to Quang Tri, one of the most dangerous places in Vietnam. War news headlines are articulated in real-time to frame the author's story.

Russian Gunship Helicopters Yefim Gordon,Dmitriy Komissarov,2013-11-04 Features;* Profiles of iconic types such as the Mil MI-24 'Hind', the Mil-28 and the Kamov Ka-52 'Alligator'.* Summary of design histories and careers* Colour reference for paint schemes * Critical review of available kits* Over 180 colour and black and white illustrations, including 20 full colour side-views and a range of various 3-view line-drawings. With profiles of a host of exciting designs, accompanied by a descriptive narrative history of the various types, this volume combines practical information with reflective historical analysis, making for a visually rich volume providing modellers with all they need to know about the most exciting Russian Gunship helicopter designs and associated model kits.This edition deals primarily with the three principal attack helicopter types of the present-day Russian Army;The Mil MI-24 'Hind' otherwise known as 'the Flying Crocodile' has been produced in large numbers with many versions and variants produced. It has been supplied to a host of countries and seen considerable combat action in conflicts both in the Soviet Union and abroad. It still forms the backbone of army aviation in Russia and remains at the forefront of national exposure.The Mil-28 is a more contemporary type and is broadly the equivalent of the McDonnell Douglas AH-64 Apache. The Kamov Ka-52 'Alligator' NATO name 'Hokum-B' also features. This helicopter is in service with the Army and is entering service also with the Russian Navy. Well-illustrated histories and structural analyses are supplemented with detailed descriptions of the various plastic scale model kits which have been released, along with commentary concerning their accuracy and available modifications and decals. This level of detail and insight is sure to prove invaluable to a wide community of model-makers, both at home and overseas.

Fire from the Sky Richard C Knott,2016-02-15 Fire from the Sky is the first complete history of the most decorated Navy squadron of the Vietnam War. Richard C. Knott tells the dramatic history of the HAL-3 Seawolves, the U.S. Navy's first and only helicopter gunship squadron of the Vietnam War. The squadron was established “in country” to support the fast, pugnacious river patrol boats of the brown water navy. Flying combat-worn Hueys borrowed from the Army, the mission of the Seawolves quickly expanded to include rapid response air support to any friendly force in the Delta needing immediate assistance. The Seawolves inserted SEALs deep into enemy territory, and extracted them, often despite savage enemy opposition. They rescued friendly combatants from almost certain capture or death, and evacuated the wounded when Medevac helicopters were not available.

UH-1 Huey Gunship vs NVA/VC Forces Peter E. Davies,2021-08-19 Often described as the US Army's aerial jeep the UH-1 Iroquois ('Huey') was the general-purpose vehicle that provided mobility in a hostile jungle environment which made rapid troop movement extremely challenging by any other means. Hueys airlifted troops, evacuated casualties, rescued downed pilots, transported cargo externally and enabled rapid transit of commanders in the field. Although 'vertical aviation' had only

become a practical reality during the Korean War helicopters evolved rapidly in the decade before Vietnam and by 1965 the US Army and US Marines relied on them as primary combat tools. This was principally because North Vietnam's armed forces had long experience of jungle operations, camouflage and evasion. Generally avoiding set-piece pitched battles they relied on rapid, frequent strikes and withdrew using routes that were generally inaccessible to US vehicles. They commonly relied on darkness and bad weather to make their moves, often rendering them immune to conventional air attack. Gunship helicopters, sometimes equipped with Firefly searchlights and early night vision light intensifiers, were more able to track and attack the enemy. Innovative tactics were required for this unfamiliar combat scenario and for a US Army that was more prepared for conventional operations in a European-type setting. One of the most valuable new initiatives was the UH-1C 'Huey Hog' or 'Frog' gunship, conceived in 1960 and offering more power and agility than the UH-1B that pioneered gunship use in combat. Heavily armed with guns and rockets and easily transportable by air these helicopters became available in large numbers and they became a major problem for the insurgent forces throughout the war. Covering fascinating details of the innovations in tactics and combat introduced by gunship helicopters, this book offers an analysis of their adaptability and usefulness in a variety of operations, while exploring the insurgent forces' responses to the advent of 'vertical aviation'.

Gunship Academy Richard G. Sheffield, Richard Sheffield, 1988

Mil Mi-24 Hind Gunship Alexander Mladenov, 2012-07-20 With its distinctive double-cockpit design, the Mi-24 'Hind' is arguably the most recognizable war machine of the Cold War, and has achieved near-legendary status in the annals of military history. The first Soviet helicopter to function as both a gunship and an assault transport, it served extensively in Afghanistan, and is now employed by militaries across the world. Written by an expert on the 'Hind', an drawing on manufacturing and military sources, this book presents the Mi-24 in all of its brutal glory, from design and development to deployment and combat. Also included are a number of color plates showing the distinct paint schemes employed by various nations in a range of theaters/ theatres and for different armies.

Gunship Ace Al J. Venter, 2012-01-19 "Spotlights the career of a fascinating modern warrior, while also shedding light on some of the conflicts that have raged throughout the world" (Tucson Citizen). A former South African Air Force pilot who saw action throughout the region from the 1970s on, Neall Ellis is the best-known mercenary combat aviator alive. Apart from flying Alouette helicopter gunships in Angola, he fought in the Balkan war for the Islamic forces, tried to resuscitate Mobutu's ailing air force during his final days ruling the Congo, flew Mi-8s for Executive Outcomes, and piloted an Mi-8 fondly dubbed "Bokkie" for Colonel Tim Spicer in Sierra Leone. Finally, with a pair of aging Mi-24 Hinds, Ellis ran the Air Wing out of Aberdeen Barracks in the war against Sankoh's vicious RUF rebels. As a "civilian contractor," Ellis has also flown helicopter support missions in Afghanistan, where, he reckons, he had more close shaves than in his entire previous four decades. From single-handedly turning the enemy back from the gates of Freetown to helping rescue eleven British soldiers who'd been taken hostage, Ellis's many missions earned him a price on his head, with reports of a million-dollar dead-or-alive reward. This book describes the full career of this storied aerial warrior, from the bush and jungles of Africa to the forests of the Balkans and the merciless mountains of Afghanistan. Along the way the reader encounters a multiethnic array of enemies ranging from ideological to cold-blooded to pure evil, as well as examples of incredible heroism for hire.

Combat Helicopters Jerry Scutts, 1989-09 Flying gunships of the United States are one of the most potent weapons of conventional warfare. Their history and development are described in detail.

Huey Cobra Gunships Chris Bishop, 2006-08-29 The Bell Huey Cobra was the very first purpose-designed helicopter gunship to become operational and to see combat. Designed in the mid-1960s as an interim solution for an armed escort and close-support weapon to support the US Army in the Vietnam War, it is still being manufactured and improved in the 21st century, making it a success far beyond the wildest dreams of its creators. In this title Chris Bishop discusses the origins of the Huey Cobra, the innovations to its design throughout the years and its major combat uses in numerous theatres, including Vietnam, the Iran-Iraq War in the 1980s, US Persian Gulf escort operations, Lebanon 1983, Panama 1989, the Gulf War 1991 and in the current conflict in Iraq.

United States Military Helicopters Michael Green, 2017-10-30 The helicopter came on the scene too late to play other than a minor role in the Second World War but by the Korean conflict the Bell H-13 Sioux, OH-23 Raven, and Sikorsky H-19 Chickasaw were in service. It was in Vietnam that the US military helicopters really came into their own and the best known were the Bell UH-1 Iroquois (known as the Huey), the Boeing CH-47 Chinook, and the massive CH-53 Mojave. The USAF combat search and rescue Jolly Green Giant was indispensable. Attack helicopters have evolved from the early Huey Cobra or Snake and the Boeing AH-64 Apache in the late 80s to when the Sikorsky UH-60 series became the military general purpose chopper. All these formidable aircraft and many more are covered in detail in this superbly illustrated and comprehensive book.

Introduction to Kiribati Gilad James, PhD, 2020-11-30 Kiribati is a small, low-lying island nation located in the central Pacific Ocean. It spans an area of approximately 3.5 million square kilometers and consists of 33 atolls and islands, with the majority of its land area located less than two meters above sea level. Due to its vulnerability to rising sea levels and the devastating impacts of climate change, Kiribati has been described as a bellwether for the impacts of global warming on low-lying island nations. The population of Kiribati is estimated to be around 119,500, with the majority of the population living on the main island of South Tarawa. Kiribati is a diverse nation, with a varied cultural heritage and a mix of Christianity and traditional beliefs. Its economy is largely based on subsistence agriculture and fishing, although the government has recently introduced policies aimed at attracting foreign investment and developing industries such as tourism and mining. Kiribati has also faced numerous challenges, including the loss of land to erosion, overfishing, and limited access to healthcare and education.

Helicopters David Baker, 1987 Discusses helicopter designs, how helicopters fly, and their many military uses.

Coming All the Way Home Fred McCarthy, 2021-07-16 In 1968, twenty-one-year-old Fred McCarthy transitioned from the monastic life of a seminary student to that of a U.S. Army helicopter gunship commander in Vietnam. Despite preparation from a family tradition of decorated combat service, a strong sense of patriotism, a love for aviation, and a desire for adventure, he got far more than he bargained for. Written after 50 years of reflection, reading, and study, this memoir tells both a universal story about war, adventure, and perseverance and, also shares the intensely personal experience of the Vietnam War and its legacy for those who fought in

it. McCarthy describes many of his missions, reflects on the nature of being a combat helicopter pilot, and processes the experience through his poetry, letters home, and reflective analysis.

Shockwave: An Australian Combat Helicopter Crew in Vietnam Peter Haran,2004

Chopper Ops Mack Maloney, The most technically-advanced, armed cargo plane ever created has vanished and a specialized team of elite helicopter pilots has been sent into Saudi Arabia to retrieve it. They are the Chopper Ops, and they have only one chance to succeed.

US Army AH-1 Cobra Units in Vietnam Jonathan Bernstein,2012-11-20 Bell's AH-1 Cobra was the first dedicated helicopter gunship to reach frontline service anywhere in the world. Developed as a private venture by the manufacturer, and based on the mechanics of the ubiquitous UH-1 Huey, the Cobra proved a huge success once introduced into combat with the US Army in 1966. Built as a key weapon in the Advanced Aerial Fire Support System concept of 1965, the AH-1 was one of the few aircraft to reach the combat zone after actual combat experience went into its design. The AH-1 helped reduce the losses being suffered by vulnerable troop transport helicopters by providing effective fire suppression during airmobile operations. This book explores its history, technology and crew.

Mil Mi-24 Hind Attack Helicopter Yefim Gordon,Dmitriï Komissarov,2001 The Russian-built Mil Mi-24 is one of the best known and most prolific combat helicopter in the world. This volume includes an introductory explanation of the concept and a detailed development history of the helicopter. Descriptions of existing versions include test beds.

Combat Helicopters Jay Schleifer,1996 Presents a history of military helicopters with descriptions of some notable models from the U. S. Air Force.
