F6F Hellcat vs A6M Zero-sen Edward M. Young,2014-08-20 The Grumman F6F Hellcat and Mitsubishi A6M Zero-sen were the two principal opposing fighters in the brutal aerial clashes of the Pacific War from 1943 onwards. Reminiscent of the preceding F4F Wildcat, the F6F Hellcat was designed specifically to counter the earlier A6M2 Zero-sen, the strengths and weaknesses of which became fully understood by US designers after an undamaged example was recovered in the Aleutians. The powerful Hellcat had an impressive top speed, rate of climb and armament, and it retained its predecessor's incredible ruggedness. The A6M5 Zero-sen was also born out of an earlier type, but was intended merely as a stop-gap until more modern Japanese fighters could be produced to restore performance parity with Allied aircraft. The chaotic conditions of the Japanese Aircraft industry and war economy prevented new types from being built. Featuring detailed artwork illustrating the technical specifications of these two types and the dramatic encounters between them, this volume focuses on how these iconic fighters came into being, and how they fared as they faced one another over the Pacific skies of World War II.

Hellcat Vs Shiden/Shiden-Kai Tony Holmes,2019-01-22 The last quality Japanese fighter, the Shiden/Shiden-Kai was tasked with holding the line against the massed squadrons of American aircraft in the dying days of the Pacific War.

Hellcat Barrett Tillman,2012-10-11 Largely responsible for crushing Japanese airpower wherever the American fast carrier force sailed, the Grumman F6F Hellcat was considered the most important Allied aircraft in the Pacific during 1943 and 1944. Designed for speed, range, and climb to compete with Japan's exceptional Mitsubishi A6M Zero, it succeeded not only in engaging the Zeke on equal terms but also in dictating the rules of combat. Fighters in every sense of the word, the Hellcats were credited with destroying more than five thousand Japanese aircraft, gaining outright air supremacy over the invasion beaches, and helping ensure Allied amphibious victories in the Central Pacific. Aviation historian Barrett Tillman presents the full story of the fighter plane--the men who built and tested it, the squadrons that flew it, and the heroes it created. Heavily illustrated with photographs from the pilots' own collections, this spirited, carefully documented operational history is an absolute must for anyone interested in aviation history. It is now available for the first time in paperback.

SBD Dauntless vs A6M Zero-sen Donald Nijboer,2021-10-28 The SBD Dauntless dive-bomber was a key cog in the US Navy's aerial arsenal throughout the Pacific War. Although a product of aviation design in the mid to late 1930s, the type soldiered on even as more advanced aircraft were appearing from American factories as the war progressed. Despite its classification as a dive-bomber and rather dated appearance, the SBD Dauntless could more than handle its own against the feared A6M Zero-sen – a regular opponent, especially during the first 18 months of the campaign in the Pacific. The SBD was credited with 138 victories in aerial combat (principally in 1942), 107 of which were fighters and the rest bombers. Seven SBD units claimed five or more aerial victories, with future ace Lt(jg) John Leppla of VS-2 being credited with four victories while flying from the carrier USS Lexington during the Battle of the Coral Sea in May 1942. The Zero-sen came to symbolise Japan's military prowess during the early stages of the war in the Pacific, and it quickly became the world's premier carrier-based fighter – a title it would hold well into 1943. The psychological impact of the Zero-sen was so great that all Allied fighters were judged by the standards set by it. The aviators flying the A6M in 1941-42 were amongst the most experienced fighter pilots in the world, and they claimed a significant number of the SBDs destroyed while trying to defend their carriers from attack during the Battles of Coral Sea, Midway and Santa Cruz in 1942. While one was a dive-bomber and the other a nimble fighter, both met in combat many times, with the Dauntless proving an elusive and deadly target thanks to the tenacity and skill of the pilots and gunners manning the Douglas aircraft. While the Zero-sen was credited with shooting down many SBDs, the rugged dive-bomber gave as good as it got and emerged, not surprisingly, victorious on many occasions. This book examines these aircraft in detail, exploring their history and development and contains accurate descriptions of the combats between the SBD Dauntless and Zero-sen throughout the first four carrier battles of 1942 and the Solomons Campaign.

The Price of Freedom William R. Forstchen,Ben Ohlander,2017-01-03 In Heart of the Tiger the Kilrathi empire was eradicated through the bravery of a few flying aces. Now, Captain Blair and his wing are fighting a more familiar menace—their fellow humans. Blair had settled down to the quiet life of a farmer, but he's been called back into action to fight rebels from the Border Worlds. And Captain Blair finds that dog-fighting with people is a whole different kettle of kittens than fighting an alien cat species. Those humans are tricky in ways the Kilrathi never dreamed of!
