Helmets and Body Armor in Modern Warfare Bashford Dean,1920 Published shortly World War I, this book presents the virtues and failings of helmets and body armor in warfare of the time. To this end, it brings together materials collected from all accessible sources; it shows the kinds of armor which each nation used in World War I, their strengths, and weaknesses. This publication approaches then-contemporary armor in a historical context, weighing aesthetic and practical concerns and comparing armor to well-known pieces in the Met's collection.

Modern Sports Helmets James A. Newman,2007 This wonderful new survey follows the evolution of the sports helmet from early military and aviation uses, through early motorcycle and auto racing, and to modern helmets used in a wide variety of sports today. The science of helmet design and manufacture is covered before moving into the art of the helmet. Helmets for six major sports are extensively covered: auto and motorcycle racing, bicycling, equestrian activities, skiing, football, and ice hockey. Some lesser known sports and their helmets are also included to give a fascinating and complete panorama of the field. The design innovations, both for safety and appearance, the colors, and the fascinating history will engage the reader, while nearly 600 color images will please even the most particular sports fan. For designers, players, scientists, and historians this book is a true delight.

Wehrmacht Combat Helmets 1933-45 Brian C Bell,2012-12-20 The German Stahlhelm is perhaps the most recognizable image of World War II. Manufactured in its millions, it was used or copied by many countries. It is still one of the most collected relics of the war; but despite its relative availability, prices have reached levels that challenge collectors to protect themselves by acquiring in-depth knowledge. This book, by a collector of 30 years' standing, offers a detailed masterclass in the patterns, component parts and finishes of the combat helmets used by the German Army, Navy and Air Force. It is illustrated with a superb selection of rare period photos, colour photos of collected examples, and striking colour paintings.

Review of Department of Defense Test Protocols for Combat Helmets National Research Council,Division on Engineering and Physical Sciences,Board on Army Science and Technology,Committee on Review of Test Protocols Used by the DoD to Test Combat Helmets,2014-03-31 Combat helmets have evolved considerably over the years from those used in World War I to today's Advanced Combat Helmet. One of the key advances was the development of aramid fibers in the 1960s, which led to today's Kevlar-based helmets. The Department of Defense is continuing to invest in research to improve helmet performance, through better design and materials as well as better manufacturing processes. Review of the Department of Defense Test Protocols for Combat Helmets considers the technical issues relating to test protocols for military combat helmets. At the request of the DOD Director of Operational Test and Evaluation, this report evaluates the adequacy of the Advanced Combat Helmet test protocol for both first article testing and lot acceptance testing, including its use of the metrics of probability of no penetration and the upper tolerance limit (used to evaluate backface deformation). The report evaluates appropriate use of statistical techniques in gathering data; adequacy of current helmet testing procedures; procedures for the conduct of additional analysis of penetration and backface deformation data; and scope of characterization testing relative to the benefit of the information obtained.

U.S. Combat Helmets of the 20th Century Mark A. Reynosa,1997 This book represents nearly a decade of research into the history of U.S. production combat helmets. Covered are the standard ground helmets, parachutist helmets and helmet covers. Every major production helmet version is presented in full color photographs, including detail shots and production markings. AUTHOR:

Shattered Minds Robert H. Bauman,Dina Rasor,2019-03-01 Shattered Minds is the first book to investigate how American military bureaucracies have let our troops down by failing to upgrade one of the most important pieces of personal safety equipment: the combat helmet. Two longtime employees of North Dakota defense contractor Sioux Manufacturing discovered that the required density of the Kevlar material woven into the netting of combat helmets was being shorted. After bringing their discovery to the attention of management, their boss, rather than cleaning up the illegal practice, accused them of having an adulterous affair. Both employees were fired, leading to a lawsuit and a court judgment in their favor that eventually brought the company's bad-faith practices to light. Around the same time, a separate whistleblower, a retired Navy doctor, was pulled into a bizarre struggle with Army and Marine bureaucracies when he discovered from his Marine grandson that the protective webbing inside the military helmets was inadequate. Why was the military so resistant to upgrading the most essential piece of gear to protect soldiers from traumatic brain injury? Interweaving these two whistleblower stories, Robert H. Bauman and Dina Rasor explain why the military, despite news coverage and congressional hearings on the faulty helmet, continued to do the indefensible. They also suggest how the public, the press, and military institutions can remedy the problem to give U.S. troops effective helmets when serving to protect their country.

MKII helmets of the Second World War and their use in the Italian Campaign Daniele Piselli,2020-01-06 The collecting of MKII helmets from the second world war has seen a considerable increase in interest among collectors recently. The enthusiast approaching this sector of militaria collecting for the first time has very few tools available that can at least point him in the right direction. So, taking stock of the knowledge I have acquired and with the help of various collector friends, I thought it might be useful to publish this guide on MKII helmets in the second world war and their use during the Italian Campaign. There is certainly a lot more to discover but this is a starting point. A tip, before making a purchase, always ask the opinion of other collectors because a trained eye can definitely help you in this jungle of post war use, fakes, tampering... and beautiful helmets that still know how to tell their story. A big thank you goes to Francesco Braneschi, it is also thanks to him that this research came about, to his passion and to our constant exchanges of opinion on this sector of the militaria. In an attempt to understand

something more I cannot fail to thank Marco Visani, super adviser with his infinite bibles. A thankyou also to those who contributed with their time, photographs, information, and much more: Alessandro Zentile, Antonio Bonanno, Aaron Delaney, Brendon Ellis, Cristian Rubiola, David Yeomans, Dennis van Vugt, Fabio Ortolani, Francesco Saverio Giovagnoli, Giovanni Righini , Ivo Beute, Leonardo Biserni, Mark Kozowy, Massimo Costa, Paolo Zamma, Peter Young, Steven Britton and the Boys of the Combat Road association. Thank you. And finally, thank you to Fabio Roncella for his essay on the battle of Montegabbione, our roots are in history. Buona lettura! Daniele Piselli

Helmets and Body Armor in Modern Warfare Bashford Dean,2013-09 This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1920 edition. Excerpt: ...helmet. The lateral flanges then, at least in one model, project upward and form ornamental processes suggesting the wings of the hat of Hermes! Two ornaments appear on this helmet; the first is a repousse scroll centering on the point which pivots the visor, the second is a Swiss cross embossed on the forehead. The lining is detachable by means of a clasp; it is held on a carrier made of rattan which has a circular brow-band and above it two intersecting arches; at their point of intersection a small cushion is placed which supports the main weight of the helmet. The brow-band of this carrier is provided with pads or cushions which alternate with spaces in order to insure comfort in wearing. The cushions are arranged in separate pockets and can be stuffed to fit the size of the individual head--a type of cushioning well known in the German lining. The chin-strap is also similar to the German. It is said that the cushioning of this helmet is elastic and that it resists adequately the shock of a blow. The present helmet is criticised as being badly balanced and this may well be the case; for the visor extends far in front of the helmet and would naturally cause it to tilt forward when in use. Also, it is noted that the perforations of the visor are so numerous that while tending to restore the balance of the helmet, they notably diminish its value as a defense. The ornaments on this helmet are also regarded as undesirable. A model embodying suggestions for a Swiss helmet is said to have been made by M. Dunand in December, 1916. It was sent to Switzerland and on February 17 it was returned to the French inventor. Shortly thereafter, the helmet described above appeared as the design of Charles le Platenier of La Chaux de Fonds. Be this as it...

Jet Age Flight Helmets Alan R. Wise,Michael S. Breuninger,1996 This new photo documentation is the first book ever to cover in detail the history and development of military flight helmets from the post-World War II era to the present, and includes over 120 different helmets and their associated equipment such as oxygen masks, boom microphones, inner helmets etc. U.S. Air Force, Army, Navy, Marine Corps, and Coast Guard flight helmets discussed range from standard fighter, bomber, transport and helicopter models, to high-altitude, special purpose and experimental types. Foreign helmets covered include British, French, German, Swedish, Canadian, and rarely documented Polish, Chinese and Soviet/Russian models. Also covered is an extensive selection of U.S. and Soviet/Russian space helmets. Extensively researched this book contains over 1000 images, most in color, and includes multiple-view photographs as well as detail views. Specific details of each helmet include manufacturer, proper designation, unique features, accessories, periods of use, branch of service(s), and aircraft in which it was used--selected export users are also included. Mike Breuninger is also the author of United States Combat Aircrew Survival Equipment: World War II to the Present-A Reference Guide for Collectors. Alan Wise is also the author of MIG Pilot Survival: Russian Aircrew Survival Equipment and Instruction.

Wings James Dack,Christopher Dack,2012 A coffee table book, conversation piece, nostalgic remembrance, and illustrated history of vintage helmets all in one, Wings: An Illustrated Celebration of Michigan Wolverine Helmets was created by the brother team of Michigan alumnus Christopher Dack, photographer, and James Dack, avid helmet collector. This book is the first to celebrate the history of the University of Michigan's famed winged helmet, a design recognizable even to casual football fans across the country, a design that has become a symbol of the winningest football program in America. Fans, alumni, and helmet collectors will enjoy 40 pages of intriguing facts and original photos, including a complete, eight-page gallery of game-used Wolverine helmets from the 1940s to present. True blue fans and helmet collectors alike will appreciate the illustrated sidebars shedding light on little-known facts about the history of the helmet design that Bo Schembechler himself called the most distinct in the country. *Autograph seekers will appreciate the white inside cover and back cover, a perfect spot for the signature of your favorite player or coach.
