RICHARD A. FRANKS

Propaganda Postcards of the Luftwaffe James Wilson, 2007-03-30 Propaganda Postcards of the Luftwaffe focuses on the efforts of the powerful Nazi propaganda machine to promote the technical achievements and might of the then newly created German airforce. The Luftwaffe had been announced to the world in March 1935, despite the restrictions contained in the Versailles Treaty signed after the First World War denying Germany the right to develop military aircraft. All major aircraft types used by the Luftwaffe together with many lesser known, obscure and secondary types are represented in this book. There is a section covering the main figures of the Luftwaffe and the leading aces who flew the aircraft. The German Air and Propaganda ministries worked together and, using professional photographers produced quality images, which were then made available to the general public in an attempt to inspire the nation and create strong moral.

Operation Barbarossa: the Complete

Organisational and Statistical Analysis, and Military Simulation Volume IIA Nigel

Askey, 2013-11-01 Operation Barbarossa: Volume IIA concerns the Wehrmacht. All the significant German weapon systems and combat squads used in the campaign are analysed using the quantitative methodology detailed in Volume I, along with the contextual history. An assessment of each weapon system's inherent 'combat power' is provided, as well as attributes such as the relative anti-tank, anti-personnel and anti-aircraft values. Volume IIA then focuses on the detailed Kriegstarkenachweisungen (KStN, or TOE) for German land units (including those in the West), as well as the unit's actual organisation and equipment. All significant units in the German Army (Heer), Waffen SS, Luftwaffe and security forces are included; ranging from the largest panzer divisions, down to small anti-aircraft companies, military-police units, Landeschützen battalions, and rail-road and construction companies. In all cases the data is presented in detailed tables, using the weapon systems and combat squads previously analysed.

Henschel Hs 129 Denes Bernad, 2006-09 When German planners decided that they needed an aircraft dedicated to a ground-attack role to disrupt and destroy troops on the ground in World War II, the twin-engined Henschel Hs 129 (nicknamed 'Panzerknacker', meaning tank cracker) was the result of their development efforts. This book covers the Hs 129's development and operational career and also provides numerous photos and illustrations detailing its camouflage schemes.

Photos of the type in service and specially commissioned line drawings and color artworks illustrate all of the He 129's variants, including those that never left the drawing board. Many of these images are previously unpublished, making this book an essential addition to the limited range of publications available on this important aircraft type.

Aircraft of the Luftwaffe, 1935-1945 Jean-Denis G.G. Lepage, 2009-01-29 One of the most significant innovations in modern warfare has been the appearance and development of air power, a technology which demanded technical and financial investment on a whole new scale and which ultimately changed the fundamental nature of war itself. This book covers the history and development of the German air force from 1935 to 1945, with descriptions and illustrations of almost all of the Luftwaffe's airplanes, including fighters, jet fighters, dive-bombers, ground attackers, medium and heavy bombers, jet bombers, seaplanes, flying boats and carrier planes,

transport and gliders, reconnaissance and training aircrafts, helicopters, and many futuristic projects and other rarities.

The Henschel Hs 129 Richard A. Franks, 2021

Influence of Static Longitudinal Stability on the Behavior of Airplanes in Gusts H. Hoene, 1951
The equations of motion for an airplane penetrating a gust are derived using a few simplifying assumptions. Calculations of loads for different static longitudinal stability on two German airplane models, HC 45 and HS 122, are compared with flight tests. Good agreement is obtained between the trend of the flight tests and the calculated values; however no absolute comparison was possible between the flight tests and calculations.

Luftwaffe X-Planes Manfred Griehl, 2015-03-25

This illustrated WWII history reveals the full range of experimental military aircraft that the Third Reich nearly flew into combat. From jet planes and high-altitude aircraft to radar-equipped fighters configured to deliver chemical weapons, numerous secret Luftwaffe planes reached prototype stage during the Second World War. Had these innovative aircraft made it into combat, the course of the war could have gone very differently. Renowned aviation expert Manfred Griehl explores these projects through an informative and fascinating selection of images, including numerous wartime photographs. Despite the Allied authorities' ban on research, countless aircraft were designed and tested by the Luftwaffe and German manufacturers before World War II. The research went ahead at secret evaluation sites in Germany, Switzerland, Sweden and the USSR. Though this work continued after the outbreak of war, many projects were never completed, often because the developers simply ran out of time. This definitive guide reveals the remarkable range of planes that the Third Reich failed to complete.
