Ranks of Bronze David Drake, 2001-08-01 They were Roman soldiers^{3/4} and they were still alive because there were no better killers in the galaxy. The Galactics need fighters who could win battles without the aid of technology. That's why, when Rome's legions suffered disaster at Carrhae, secretive alien traders were waiting to buy them on the Persian slave market. Now, virtually immortal, the Romans fight strange enemies on stranger worlds; and though they win every battle, the spoils of victory never include freedom. If the legionaries are ever to return to Earth, it must be through the beam weapons and force screens of their ruthless alien owners. But no matter the odds, two thousand years is a long time; the Romans are coming home. At the publisher's request, this title is sold without DRM (Digital Rights Management).

Being and Time Martin Heidegger, A new 2024 translation of Martin Heidegger's major work Being and Time (Sein und Zeit), originally published in 1927 in multiple publications. This edition contains a new afterword by the Translator, a timeline of Heidegger's life and works, a philosophic index of core Heideggerian concepts and a guide for terminology across 19th and 20th century Existentialists. This translation is designed for readability and accessibility to Heidegger's enigmatic and dense philosophy. Complex and specific philosophic terms are translated as literally as possible and academic footnotes have been removed to ensure easy reading. Being and Time presents a complex philosophical discourse on the nature of being (Sein) and time (Zeit), focusing in particular on the temporal-existentialist concept of Dasein, a term that combines the German words for to be (sein) and there (da). This classic philosophic work examines the traditional metaphysical understanding of being, arguing that this understanding, typically based on the idea of a constant presence, fails to account for the temporal and existential dimensions of being. Heidegger proposes that an understanding of being requires an analysis of Dasein, which is characterized not only by its existence, but also by its being in the world and its temporal existence. The concept of Dasein is central to the his argument, emphasizing that Dasein is always already situated in a world, and its understanding of being is shaped by its temporal existence. This perspective challenges traditional metaphysical notions of being as static and unchanging, proposing instead that being is fundamentally temporal and connected to human existence and understanding. As the title suggests, Heidegger sees the question of Being as indistinguishable from Time, arguing that Newtonian conceptions of time as a series of now-points are inadequate for understanding the being of Dasein. His Ontochronology argues that the existential and ontological analysis of Dasein reveals a more fundamental concept of time, one that is integral to the structure of Being itself. The text further elaborates on the idea of thrownness and several other existentialist themes. Thrownness is one of the three conditions that signifies Dasein's immersion in the world, where it finds itself already entangled in a web of relations and meanings. This thrownness, combined with Dasein's inherent being-toward-death, underscores the existential condition of human beings, framing their existence as a continual engagement with their own finitude and the possibilities of their being. Heidegger posits that understanding the nature of being requires a fundamental rethinking of both being and time, dogmatically stating that the true nature of being can only be grasped through an understanding of the temporality that characterizes the existence of being.

The Ghost Brigades John Scalzi,2007-04-01 The Ghost Brigades are the Special Forces of the Colonial Defense Forces, elite troops created from the DNA of the dead and turned into the perfect soldiers for the CDF's toughest operations. They're young, they're fast and strong, and they're totally without normal human qualms. The universe is a dangerous place for humanity—and it's about to become far more dangerous. Three races that humans have clashed with before have allied to halt our expansion into space. Their linchpin: the turncoat military scientist Charles Boutin, who knows the CDF's biggest military secrets. To prevail, the CDF must find out why Boutin did what he did. Jared Dirac is the only human who can provide answers -- a superhuman hybrid, created from Boutin's DNA, Jared's brain should be able to access Boutin's electronic memories. But when the memory transplant appears to fail, Jared is

given to the Ghost Brigades. At first, Jared is a perfect soldier, but as Boutin's memories slowly surface, Jared begins to intuit the reason's for Boutin's betrayal. As Jared desperately hunts for his father, he must also come to grips with his own choices. Time is running out: The alliance is preparing its offensive, and some of them plan worse things than humanity's mere military defeat... River of Stars Guy Gavriel Kay, 2013-04-02 "River of Stars is a major accomplishment, the work of a master novelist in full command of his subject."—Michael Dirda, in The Washington Post "Game of Thrones in China."—Salon.com Ren Daiyan was still just a boy when he took the lives of seven men while guarding an imperial magistrate. That moment on a lonely road changed his life in entirely unexpected ways, sending him into the forests of Kitai among the outlaws. From there he emerges years later—and his life changes again, dramatically, as he circles toward the court and emperor, while war approaches Kitai from the north. Lin Shan is the daughter of a scholar, his beloved only child. Educated by him in ways young women never are, gifted as a songwriter and calligrapher, she finds herself living a life suspended between two worlds. Her intelligence captivates an emperor—and alienates women at the court. But when her father's life is endangered by the savage politics of the day, Shan must act in ways no woman ever has. In an empire divided by bitter factions circling an exquisitely cultured emperor who loves his gardens and his art far more than the burdens of governing, dramatic events on the northern steppe alter the balance of power in the world, leading to events no one could have foretold, under the river of stars.

Under Heaven Guy Gavriel Kay, 2010-04-27 Award-winning author Guy Gavriel Kay evokes the dazzling Tang Dynasty of 8th-century China in an masterful story of honor and power. It begins simply. Shen Tai, son of an illustrious general serving the Emperor of Kitai, has spent two years honoring the memory of his late father by burying the bones of the dead from both armies at the site of one of his father's last great battles. In recognition of his labors and his filial piety, an unlikely source has sent him a dangerous gift: 250 Sardinian horses. You give a man one of the famed Sardinian horses to reward him greatly. You give him four or five to exalt him above his fellows, propel him towards rank, and earn him jealousy, possibly mortal jealousy. Two hundred and fifty is an unthinkable gift, a gift to overwhelm an emperor. Wisely, the gift comes with the stipulation that Tai must claim the horses in person. Otherwise he would probably be dead already...
