The Last Warlord Brian Glyn Williams,2013-09-01 The Last Warlord tells the story of the brotherhood forged in the mountains of Afghanistan between elite American Green Berets and Dostum that is told in the movie 12 Strong: The Declassified True Story of the Horsesoldiers The Last Warlord tells the spellbinding story of the legendary Afghan warlord Abdul Rashid Dostum, a larger-than-life figure who guided US Special Forces to victory over the Taliban after 9/11. Having gained unprecedented access to General Dostum and his family and subcommanders, as well as local chieftains, mullahs, elders, Taliban prisoners, and women's rights activists, scholar Brian Glyn Williams paints a fascinating portrait of this Northern Alliance Uzbek commander who has been shrouded in mystery and contradicting hearsay. In contrast to sensational media accounts that have mythologized the bear of a man with a gruff laugh who some Uzbeks swear, has on occasion frightened people to death, Williams carefully chronicles Dostum's rise from peasant villager to Uzbek leader and skilled strategist who has fought a long and bitter war against the Taliban and Al Qaeda fanatics that have sought to repress his people. Also revealed is Dostum's surprising history as a defender of women's rights and religious moderation. In riveting detail The Last Warlord spotlights the crucial Afghan contribution to Operation Enduring Freedom: how the CIA contacted the mysterious warrior Dostum to help US Special Forces wage a covert war in the mountains of Afghanistan, how respect and even friendship quickly grew between the Afghan and American fighting men, and how Dostum led his nomadic people charging into war the same way his ancestors had—on horseback. The result was one of the most decisive campaigns in the entire war on terror. The Last Warlord shows that, far from serving as an exotic backdrop for American heroics, it was these horse-mounted descendents of the Mongol warrior Genghis Khan that allowed the American military to overthrow the Taliban regime in a matter of weeks. .

He recounts the temptation he had with his boss which eventually led to his being fired from his post. He concludes by saying that it was better to resist temptation than do something that could jeopardize his reputation and get him into trouble.

Man-made Catastrophes and Risk Information Concealment Dmitry Chernov, Didier Sornette,2015-10-27 This book discusses the risks of information concealment in the context of major natural or industrial disasters – offering detailed descriptions and analyses of some 25 historical cases (Three Mile Island nuclear accident, Bhopal disaster, Challenger Space Shuttle explosion, Chernobyl nuclear disaster, Deepwater Horizon oil spill, Fukushima-Daiichi nuclear disaster, Enron's bankruptcy, Subprime mortgage crisis, Worldwide Spanish flu and SARS outbreaks, etc.) and applying these insights to selected on-going cases where such information concealment is suspected. Some successful examples of preventive anti-concealment practice are also presented. In the book, the term 'concealment' is used to represent the two distinct behaviors uncovered in the investigations: (i) facts and information about an organization and its functioning being hidden from those that need them – here the concealment can be due to various factors, such as complexity and miscommunication, to name but two – and (ii) the conscious and deliberate action of keeping important information

secret or misrepresenting it. This second meaning makes up a surprisingly important part of the evidence presented. Accordingly, emphasis has been put on this second aspect and the approach is more pragmatic than academic, remaining focused on evidence-based practical and useful factors. It raises awareness and provides valuable lessons for decision-makers, risk specialists and responsible citizens alike. This work is also intended as a fact-based reference work for future academic and scholarly investigations on the roots of the problem, in particular regarding any psychological or sociological modeling of human fallibility.
