Lock On Francois Verlinden,1992-06-01

Mil Mi-24 Hind Gunship Alexander Mladenov,2012-07-20 With its distinctive double-cockpit design, the Mi-24 'Hind' is arguably the most recognizable war machine of the Cold War, and has achieved near-legendary status in the annals of military history. The first Soviet helicopter to function as both a gunship and an assault transport, it served extensively in Afghanistan, and is now employed by militaries across the world. Written by an expert on the 'Hind', an drawing on manufacturing and military sources, this book presents the Mi-24 in all of its brutal glory, from design and development to deployment and combat. Also included are a number of color plates showing the distinct paint schemes employed by various nations in a range of theaters/ theatres and for different armies.

Quarterly Review of Military Literature ,1984

AK2918 - ACES HIGH HIND SPECIAL , As an addendum to the regular Aces High Magazine issue devoted to the military helicopters, we offer you a special publication focused on one of the most famous military helicopters used around the world, the Mil Mi-24 Hind. Using the large 1/35 scale kit as the example, our editor Daniel Zamarbide guides you through the processes of construction, detailing, painting and weathering of a model of this legendary helicopter. The finished model is presented on a vignette containing a vehicle and figures, which creation is also thoroughly described. To enhance your understanding of the subject, we also include a concise article dealing with the history and development of the Mil Mi-24, attractive colour profiles, and a

comprehensive walkaround chapter, which comprises numerous photos of different variants of the Hind. In the last chapter you will read about finishing yet another Mil Mi-24 kit in a very special livery

Risk and Insurance Søren Asmussen,Mogens

Steffensen,2020-04-17 This textbook provides a broad overview of the present state of insurance mathematics and some related topics in risk management, financial mathematics and probability. Both non-life and life aspects are covered. The emphasis is on probability and modeling rather than statistics and practical implementation. Aimed at the graduate level, pointing in part to current research topics, it can potentially replace other textbooks on basic non-life insurance mathematics and advanced risk management methods in non-life insurance. Based on chapters selected according to the particular topics in mind, the book may serve as a source for introductory courses to insurance mathematics for non-specialists, advanced courses for actuarial students, or courses on probabilistic aspects of risk. It will also be useful for practitioners and students/researchers in related areas such as finance and statistics who wish to get an overview of the general area of mathematical modeling and analysis in insurance.
