Occupied City David Peace,2010 A fierce, exquisitely dark novel that plunges us into post-World War II Occupied Japan in a Rashomon-like retelling of a mass poisoning (based on an actual event), its aftermath, and the hidden wartime atrocities that led to the crime. On January 26, 1948, a man identifying himself as a public health official arrives at a bank in Tokyo. There has been an outbreak of dysentery in the neighborhood, he explains, and he has been assigned by Occupation authorities to treat everyone who might have been exposed to the disease. Soon after drinking the medicine he administers, twelve employees are dead, four are unconscious, and the “official” has fled . . . Twelve voices tell the story of the murder from different perspectives. One of the victims speaks, for all the victims, from the grave. We read the increasingly mad notes of one of the case detectives, the desperate letters of an American occupier, the testimony of a traumatized survivor. We meet a journalist, a gangster-turned-businessman, an “occult detective,” a Soviet soldier, a well-known painter. Each voice enlarges and deepens the portrait of a city and a people making their way out of a war-induced hell. *Occupied City* immerses us in an extreme time and place with a brilliantly idiosyncratic, expressionistic, mesmerizing narrative. It is a stunningly audacious work of fiction from a singular writer. From the Hardcover edition.

Knowledge-based Intelligent Information Engineering Systems & Allied Technologies Norio Baba,L. C. Jain,Robert J. Howlett,2001 The annual Kes International Conference in Knowledge-based Intelligent Information Engineering Systems and Allied Technologies has become an event that is held in high regard by the intelligent systems community. The proceedings of the fifth conference

represents a comprehensive survey of research on the theory and application of knowledge-based intelligent systems including topics such as: generic intelligent techniques - artificial neural networks, machine learning fuzzy and neuro-fuzzy techniques, and artificial life; applications of intelligent systems - condition monitoring, fault diagnosis, image processing, and high voltage systems; and allied technologies - communications, the Internet and web-based technologies, e-commerce, and computer pets. The proceedings should be of interest to those in the intelligent systems field, such as engineers, researchers and students.

Hunter-gatherers in a Changing World Victoria Reyes-García, Aili Pyhälä, 2016-11-15 This book compiles a collection of case studies analysing drivers of and responses to change amongst contemporary hunter-gatherers. Contemporary hunter-gatherers' livelihoods are examined from

perspectives ranging from historical legacy to environmental change, and from changes in national economic, political and legal systems to more broad-scale and universal notions of globalization and acculturation. Far from the commonly held romantic view that hunter-gatherers continue to exist as isolated populations living a traditional lifestyle in harmony with the environment, contemporary hunter-gatherers – like many rural communities around the world – face a number of relatively new ecological and social challenges to which they are pressed to adapt. Contemporary hunter-gatherer societies are increasingly and rapidly being affected by Global Changes, related both to biophysical Earth systems (i.e., changes in climate, biodiversity and natural resources, and water availability), and to social systems (i.e. demographic transitions, sedentarisation, integration into the market economy, and all the socio-cultural change that these and other factors trigger). Chapter 10 of this book is open access under a CC BY 4.0 license.

The rise and fall of Japan's LDP Ellis S. Krauss, Robert J. Pekkanen, 2010-11-04 After holding power continuously from its inception in 1955 (with the exception of a ten-month hiatus in 1993-1994), Japan's Liberal Democratic Party (LDP) lost control of the national government decisively in September 2009. Despite its defeat, the LDP remains the most successful political party in a democracy in the post-World War II period. In *The Rise and Fall of Japan's LDP*, Ellis S. Krauss and Robert J. Pekkanen shed light on the puzzle of the LDP's long dominance and abrupt defeat. Several questions about institutional change in party politics are at the core of their investigation: What incentives do different electoral systems provide? How do politicians adapt to new incentives? How much does structure determine behavior, and how much opportunity does structure give politicians to influence outcomes? How adaptable are established political organizations? The electoral system Japan established in 1955 resulted in a half-century of one-party democracy. But as

Krauss and Pekkanen detail, sweeping political reforms in 1994 changed voting rules and other key elements of the electoral system. Both the LDP and its adversaries had to adapt to a new system that gave citizens two votes: one for a party and one for a candidate. Under the leadership of the charismatic Koizumi Junichiro, the LDP managed to maintain its majority in the Japanese Diet, but his successors lost popular support as opposing parties learned how to operate in the new electoral environment. Drawing on the insights of historical institutionalism, Krauss and Pekkanen explain how Japanese politics functioned before and after the 1994 reform and why the persistence of party institutions (factions, PARC, koenkai) and the transformed role of party leadership contributed both to the LDP's success at remaining in power for fifteen years after the reforms and to its eventual downfall. In an epilogue, the authors assess the LDP's prospects in the near and medium term.

Advances in Swarm Intelligence Anupam Biswas, Can B. Kalayci, Seyedali Mirjalili, 2022-10-01
Swarm Intelligence (SI) has grown significantly, both from the perspective of algorithmic development and applications covering almost all disciplines science and technology. This book emphasizes the studies of existing SI techniques, their variants and applications. The book also contains reviews of new developments in SI techniques and hybridizations. Algorithm specific studies covering basic introduction and analysis of key components of these algorithms, such as convergence, balance of solution accuracy, computational costs, tuning and control of parameters. Application specific studies incorporating the ways of designing objective functions, solution representation and constraint handling. The book also includes studies on application domain specific adaptations in the SI techniques. The book will be beneficial for academicians and researchers from various disciplines of engineering and science working in applications of SI and other optimization problems.

Identity Change and Foreign Policy Linus Hagstrom, 2015-10-05 Identity has become an explicit focus of International Relations theory in the past two to three decades, with one case attracting and puzzling many early identity scholars: Japan. These constructivist scholars typically ascribed Japan a 'pacifist' or 'antimilitarist' identity – an identity which they believed was constructed through the adherence to 'peaceful norms' and 'antimilitarist culture'. Due to the alleged resilience of such adherences, little change in Japan's identity and its international relations was predicted. However, in recent years, Japan's foreign and security policies have begun to change, in spite of these seemingly stable norms and culture. This book seeks to address these changes through a pioneering engagement with recent developments in identity theory. In particular, most chapters theorize identity as a product of processes of differentiation. Through detailed case analysis, they argue that Japan's identity is produced and reproduced, but also transformed, through the drawing of boundaries between 'self' and 'other'. In particular, they stress the role of emotions and identity entrepreneurs as catalysts for identity change. With the current balance between resilience and change, contributors emphasize that more drastic foreign and security policy transformations might loom just beyond the horizon. This book was originally published as a special issue of *The Pacific Review*.

Treatment of Nerve Injury and Entrapment Neuropathy Y. Hirasawa, 2012-12-06 Peripheral nerve injury and entrapment neuropathy often are complicated by injury to adjacent tissue such as bone, joints, blood vessels, and tendons. Clinicians who provide primary care in these areas require extensive knowledge of methods for treating wounds and nerve injuries. The most important element

in the treatment of peripheral nerve injury is appropriate surgical repair or functional reconstruction; postoperative physical and occupational therapy are also necessary. This book summarizes current topics in Japan and other countries in the field of surgical nerve repair, including selection of treatment methods for peripheral nerve paralysis, practical issues in surgery, and aspects of postoperative care. The importance of evidence-based medicine is emphasized, with appropriate therapy decided on the basis of objective data. The book has a broad appeal to include general clinicians, clinical trainees, and allied health-care professionals.

Diagram Genus, Generators, and Applications Alexander Stoimenow, 2018-09-03 In knot theory, diagrams of a given canonical genus can be described by means of a finite number of patterns (generators). Diagram Genus, Generators and Applications presents a self-contained account of the canonical genus: the genus of knot diagrams. The author explores recent research on the combinatorial theory of knots and supplies proofs for a number of theorems. The book begins with an introduction to the origin of knot tables and the background details, including diagrams, surfaces, and invariants. It then derives a new description of generators using Hirasawa's algorithm and extends this description to push the compilation of knot generators one genus further to complete their classification for genus 4. Subsequent chapters cover applications of the genus 4 classification, including the braid index, polynomial invariants, hyperbolic volume, and Vassiliev invariants. The final chapter presents further research related to generators, which helps readers see applications of generators in a broader context.

Transforming Asian Economy and Business Administration Katsuhiko Hirasawa, Tsuyako Nakamura, Yutaka Takakubo, 2022-05-19 Are there any countries now days that do not use products and parts made in Asia? In this sense Asia is a production base that supports the world economy.

The entry of multinational corporations into Asian countries has been carried out from early on. But, it was the collapse of the socialist planned economy that clinched the expansion of MNEs into Asia. The collapse of the socialist planned economy was accompanied by the introduction of the market economy in the countries with the socialist planned economy. The ideology of neo-liberalism, with emphasis on the market economy, became the principle for the reconstruction of these countries. Against the backdrop of this global standard, the activities of MNEs in Asian countries have advanced. Accompanying this, the construction of an economic structure based on the MNEs has progressed there. This is the emergence of so-called Asian capitalism. However, the spread of COVID-19 and its countermeasures appear to be transforming this global order. As is well known, the spread of COVID-19 and its countermeasures are suppressing international human exchanges and logistics advanced by globalization and promoting the restructuring of local economies. In this context, the way of business activities in Asian countries probably defines the future world order. Based on this awareness of the issues, this book deals with various problems of the economy and business management, especially human resources, in Asian countries.

Fishery Management in Japan Yohoji Asada, Yutaka Hirasawa, Fukuzo Nagasaki, 1983

Management of fisheries encompasses inter-action between societal customs, fugitive resources and technology. Fisheries management in Japan consists of two basic types of management techniques: the use of fishing rights for delineating ownership over sedentary species in littoral zones and licensing systems where management regulations restrict the number and size of fishing vessels. Biological considerations are discussed and the coordination mechanisms required are described for blending resource characteristics with Japanese societal customs. An appraisal is given of the management measures adopted.

Acute Blood Purification Hiromichi Suzuki, Hiroyuki Hirasawa, 2010-01-01 Acute organ damage and the ensuing multiple organ failure are the result of a pathophysiological process involving various cytokines. Once activated, these proteins cannot be eliminated even when the kidneys function at their maximum capacity. To counteract this mechanism, researchers in Japan have developed an innovative concept employing blood purification to remove the overwhelming cytokines. This book describes the use of hemodiafiltration to inhibit the cytokine storms which cause serious organ damage in patients with septic shock. Moreover, the technical construction of the blood purification system, which includes various machines, devices, membranes, fluids, etc., is explained in detail. Finally, leading experts discuss the concept of continuous renal replacement therapy as the standard care in critically ill patients with severe acute kidney injury. Describing the current state of acute blood purification, this publication provides new impulses and opens new avenues in the treatment of acute organ damage.

Oxygenic Photosynthesis: The Light Reactions Donald R. Ort, Charles F. Yocum, 2006-04-11 Structure and function of the components of the photosynthetic apparatus and the molecular biology of these components have become the dominant themes in advances in our understanding of the light reactions of oxygenic photosynthesis. Oxygenic Photosynthesis: The Light Reactions presents our current understanding of these reactions in thylakoid membranes. Topics covered include the photosystems, the cytochrome b6-f complex, plastocyanin, ferredoxin, FNR, light-harvesting complexes, and the coupling factor. Chapters are also devoted to the structure of thylakoid membranes, their lipid composition, and their biogenesis. Updates on the crystal structures of cytochrome f, ATP synthase and photosystem I are presented and a section on molecular biology and evolution of the photosynthetic apparatus is also included. The chapters in this book provide a

comprehensive overview of photosynthetic reactions in eukaryotic thylakoids. The book is intended for a wide audience, including graduate students and researchers active in this field, as well as those individuals who have interests in plant biochemistry and molecular biology or plant physiology.
