**No Separate Refuge** Sarah Deutsch,2023-09-15 Long after the Mexican-American War brought the Southwest under the United States flag, Anglos and Hispanics within the region continued to struggle for dominion. From the arrival of railroads through the height of the New Deal, Sarah Deutsch explores the cultural and economic strategies of Anglos and Hispanics as they competed for territory, resources, and power, and examines the impact this struggle had on Hispanic work, community, and gender patterns. This book analyzes the intersection of culture, class, and gender at disparate sites on the Anglo-Hispanic frontier--Hispanic villages, coal mining towns, and sugar beet districts in Colorado and New Mexico--showing that throughout the region there existed a vast network of migrants, linked by common experience and by kinship. Devoting particular attention to the role of women in cross-cultural interaction, No Separate Refuge brings to light sixty years of Southwestern history that saw Hispanic work transformed, community patterns shifted, and gender roles critically altered. Drawing on personal interviews, school census and missionary records, private letters, and a wealth of other records, Deutsch traces developments from one state to the next, and from one decade to the next, providing an important contribution to the history of the Southwest, race relations, labor, agriculture, women, and Chicanos. This thirty-fifth anniversary edition reflects on its place in the history of the Anglo-Hispanic borderland, class, and gender.

**Intelligent Multimedia Processing with Soft Computing** Yap Peng Tan, Kim-Hui Yap, Lipo Wang,2004-10-20 Soft computing represents a collection of techniques, such as neural networks, evolutionary computation, fuzzy logic, and probabilistic reasoning. As - posed to conventional hard computing, these techniques tolerate impre- sion and uncertainty, similar to human beings. In the recent years, successful applications of these powerful methods have been published in many dis- plines in numerous journals, conferences, as well as the excellent books in this book series on Studies in Fuzziness and Soft Computing. This volume is dedicated to recent novel applications of soft computing in multimedia processing. The book is composed of 21 chapters written by experts in their respective fields, addressing various important and timely problems in multimedia computing such as content analysis, indexing and retrieval, recognition and compression, processing and filtering, etc. In the chapter authored by Guan, Muneesawang, Lay, Amin, and Lee, a radial basis function network with Laplacian mixture model is employed to perform image and video retrieval. D. Androutsos, P. Androutsos, Plataniotis, and Venetsanopoulos investigate color image indexing and retrieval within a small-world framework. Wu and Yap develop a framework of fuzzy relevance feedback to model the

uncertainty of users' subjective perception in image retrieval.
