Effects of Changing Business Environment on Organization Performance Utpal Chattopadhyay,Pragya Bhawsar,2017 Hindustan Machine Tools (HMT) Limited was incorporated in 1953 by the Government of India as a machine tool manufacturing company. In the later years, the company diversified into other products including watches. Its watch division, known as the HMT Watches Limited, started in 1961 with the support of Japan's Citizen Watch Company. Over the years, HMT made tremendous progress in all business dimensions to emerge as a market leader in the Indian watch industry. The company also earned the reputation of 'the time keeper of the nation' for its profound impact on the country's watch business. Hindustan Machine Tools established itself as a strong brand in the Indian market. However, post-liberalization in 1991, HMT's performance started dwindling. The policies of liberalization, privatization and globalization paved the way for the entry of many private brands, both domestic and foreign, into the Indian watch market that became hyper-competitive. The HMT management did not show enough agility to make necessary changes in its business models to cope with the changing business environment. Gradually, HMT lost its pole position to Titan Watches of the Tata Group. Hindustan Machine Tools inability to understand the needs of modern-day customers and its less-than adequate attention towards new product development made things even worse for the organization. With losses accumulating over the years, HMT became financially unviable. After several failed attempts to turn around, the government finally closed down HMT Watches in early 2016. This case portrays the long and eventful journey of HMT Watches and then analyses the major reasons behind its failure and highlights a few important strategic lessons for management students.

Allied Secret Carlton Jackson,2001 In Allied Secret, Carlton Jackson recounts the single greatest loss of American lives at sea during World War II: the sinking of the British troopship HMT Rohna on 26 November 1943 by a German guided bomb. Over one thousand American soldiers died in the disaster which was kept secret during the war for security reasons and then largely forgotten. In this book, Jackson brings the tragedy to light. In a new preface, he notes that a Rohna association was formed after his book first appeared and tells of the numerous letters he has received from survivors, victims' families, and others who knew little about the event until Allied Secret was published.

Starch in Food Malin Sjöö,Lars Nilsson,2017-11-25 Starch in Food: Structure, Function and Applications, Second Edition, reviews starch structure, functionality and the growing range of starch ingredients used to improve the nutritional and sensory quality of food. The new edition is fully updated and brings new chapters on starch and health, isolation, processing and functional properties of starch. Part One illustrates how plant starch can be analyzed and modified, with chapters on plant starch synthesis, starch bioengineering and starch-acting enzymes. Part Two examines the sources of starch, from wheat and potato, to rice, corn and tropical supplies. Part Three looks at starch as an ingredient and how it is used in the food industry, with chapters on modified starches and the stability of frozen foods, starch-lipid interactions and starch-based microencapsulation. Part Four covers starch as a functional food, investigating the impact of starch on physical and mental performance, detecting nutritional starch fractions and analyzing starch digestion. The book is a standard reference for those working in the food industry, especially to starch scientists, food researchers, post-docs, practitioners in the starch area and students. Completely revised and updated with an overview of the latest developments in isolation, processing, functional properties and health attributes of starch Reviews starch structure and functionality Extensive coverage of the growing range of starch ingredients Examines how starch ingredients are used to improve the nutritional and sensory quality of food
