Unknown to Rocky, Anastasia—renamed Lilith—has ability, programming, and functionality far beyond the capability of normal computers. Performing complex reasoning, in-depth planning while executing strategic moves, and showing a frightening artificial intelligence along with enhanced learning capability, Lilith displays alarming abilities and powers. Can Rocky solve the real purpose of Satan's App?

Dead Spoken Here Hoody Brown,2023-08-12 Huck looked at the dead woman's picture, smiling with eyes full of hope. This was drastically different from the way detectives found her, laid out on the floor dead with her fractured neck. Well, you going to help me or what? Bear asked. With a failed marriage and house fire finally behind him, all he wanted was some sense of normalcy. Now here was Bear asking him to make room for more ghosts. Gift or curse, he didn't know. In fact, he still didn't completely understand it. He wasn't even sure if he could see all ghosts or just ones he was supposed to - whatever that meant. What do you think? Huck replied. Bear smiled. I knew I could count on you.

Say Nothing Philip Warner,2009-11 Famous footballer Byron Fullard returns to his parents' home in Cumbria looking forward to indulging his passions for running and history and to spending time with his best friend, Johnny Hampson. His only concern is Johnny's uncertain relationship with the beautiful but enigmatic Nicky Reed, whose deep bond with Simon, one of her twin brothers, borders on the obsessive. But Simon's apparent suicide is the catalyst for the kind of spiralling violence that might be expected in Manchester, where Byron plays for the mighty Manchester United, but never in tranquil Cartmel, nestling as it has for centuries in the shadow of its glorious Priory. Johnny's father, Ed, a detective in the local police force, struggles to understand the mayhem suddenly consuming the quiet backwater as he desperately tries to discover the murderer before more lives are lost. A secret room, a selfish mother, family rivalries, a hooded stranger and Nicky's extraordinary behaviour all stretch Ed's imagination to its limits before he solves the case in dramatic style....or does he? Only echoes from the past and some startling revelations can bring final resolution and enable Cartmel to resume its ancient peace and beauty.

The Boy in the Hoody Alex crossfield,2019-12-08 A 17-year-old boy, wearing a torn and badly burnt school clothes, was crawling away from something in desperation. He is trying his best to turn his body around, but his efforts were futile as both of his legs, and his right arm was dismembered. His body was also severely burnt as he's trying his best to move away using one hand. All hopes that he had was lost as the being that he was running away from is slowly walking closer in front of him. His eyes were blurry while shedding blood instead of tears and his ears were not working anymore due to being severely burnt. He couldn't do anything but to cry in horror.

Theatre, Performance and Change Stephani Etheridge Woodson,Tamara Underiner,2017-12-01 This book works to 'make change strange' from and for the field of theatre and performance studies. Growing from the idea that change is an under-interrogated category that over-determines theatre and performance as an artistic, social, educational, and material practice, the scholars and practitioners gathered here (including specialists in theatre history and literature, educational theatre, youth arts, arts policy, socially invested theatre, and activist performance) take up the question of change in thirty-five short essays. For anyone who has wondered about the relationships between theatre, performance and change itself, this book is an essential conversation starter.

Punch Needle Toys Caro Bello,2023-07-04 Welcome to Punch Needle Toys, a collection of cute and cuddly toys made using punch needle embroidery. Punch needle embroidery is a technique usually used to create homewares such as cushion covers and wall hangings, but this unique collection includes designs and instructions is for 20 adorable and original punch needle toys. These punch

needle plushies are part toy, part cushion, due to the simple outline shapes. Designer and author, Caro Bello, has created a fun collection of 20 distinctive animals including Bruno the Beaver, Enrique the Elephant, and Felipe the Fox. Each of the characters has their own style and Caro uses a variety of traditional and modern punch needle stitches to create their very individual outfits. Enrique, for example, is wearing a pair of bright yellow underpants as he likes to relax while he works from home. Gaspar Giraffe is an undercover spy who wears a hidden camera beneath his bowtie and Helena Hen looks harmless in her folk-chic shawl but is actually an underground activist working for the chick rights movement. The toys are made flat and then joined and stuffed to bring them to life. There are step-by-step instructions and photography explaining how to get started with punch needle embroidery. Caro explains everything from which tools and materials to choose, through to techniques for how to do the different stitches (both traditional and modern) that are used in the projects and how to transfer the embroidery designs onto the fabric. There is also general advice about how to hold the needle correctly, choosing colours and techniques for fixing errors. Caro explains the four golden rules of needle punch embroidery to ensure that you get the best results from your stitching. And there is advice about special finishing techniques to create different looks including tufting, brushing and pompom, as well as the best techniques to sew and fill the toys when you've finished the embroidery. The toys are cleverly designed with details on the front and back and the templates have been included at full-size, so you don't need to worry about enlarging them. There is a clear 'embroidery placement' diagram for each of the toys showing which stitches are used on each animal.

Forensic DNA Trace Evidence Interpretation Duncan Taylor,Bas Kokshoorn,2023-05-30 Forensic DNA Trace Evidence Interpretation: Activity Level Propositions and Likelihood Ratios provides all foundational information required for a reader to understand the practice of evaluating forensic biology evidence given activity level propositions and to implement the practice into active casework within a forensic institution. The book begins by explaining basic concepts and foundational theory, pulling together research and studies that have accumulated in forensic journal literature over the last 20 years. The book explains the laws of probability - showing how they can be used to derive, from first principles, the likelihood ratio - used throughout the book to express the strength of evidence for any evaluation. Concepts such as the hierarchy of propositions, the difference between experts working in an investigative or evaluative mode and the practice of case assessment and interpretation are explained to provide the reader with a broad grounding in the topics that are important to understanding evaluation of evidence. Activity level evaluations are discussed in relation to biological material transferred from one object to another, the ability for biological material to persist on an item for a period of time or through an event, the ability to recover the biological material from the object when sampled for forensic testing and the expectations of the prevalence of biological material on objects in our environment. These concepts of transfer, persistence, prevalence and recovery are discussed in detail in addition to the factors that affect each of them. The authors go on to explain the evaluation process: how to structure case information and formulate propositions. This includes how a likelihood ratio formula can be derived to evaluate the forensic findings, introducing Bayesian networks and explaining what they represent and how they can be used in evaluations and showing how evaluation can be tested for robustness. Using these tools, the authors also demonstrate the ways that the methods used in activity level evaluations are applied to questions about body fluids. There are also chapters dedicated to reporting of results and implementation of activity level evaluation in a working forensic laboratory. Throughout the book, four cases are used as examples to demonstrate how to relate the theory to practice and detail how laboratories can integrate and implement activity level evaluation into their active casework.
