The Archaeology of Capitalism in Colonial Contexts Sarah K. Croucher,Lindsay Weiss,2011-08-10 The Archaeology of Capitalism in Colonial Contexts: Postcolonial Historical Archaeologies explores the complex interplay of colonial and capital formations throughout the modern world. The authors present a critical approach to this topic, trying to shift discourses in the theoretical framework of historical archaeology of capitalism and colonialism through the use of postcolonial theory. This work does not suggest a new theoretical framework as such, but rather suggests the importance of revising key theoretical terms employed within historical archaeology, arguing for new engagements with postcolonial theory of relevance to all historical archaeologists as the field de-centers from its

traditional locations. Examining case studies from North America, South America, the Caribbean, Africa, Australia, the Middle East, and Europe, the chapters offer an unusually broad ranging geography of historical archaeology, with each focused on the interplay between the particularisms of colonial structures and the development of capitalism and wider theoretical discussions. Every author also draws attention to the ramifications of their case studies in the contemporary world. With its cohesive theoretical framework this volume is a key resource for those interested in decolonizing historical archaeology in theory and praxis, and for those interested in the development of modern global dynamics.

Estuarine Processes Martin Wiley,2014-05-10 Estuarine Processes, Volume II: Circulation, Sediments, and Transfer of Material in the Estuary provides information pertinent to estuarine processes and focuses on dynamic interactions at several levels of organization. This book describes the effects of physical alterations on estuarial hydraulics, dissolved and particulate material support, and on aquatic biota. Organized into six parts encompassing 27 chapters, this volume begins with an overview of the historic changes in salinity balance in the estuarial zone of the Sacramento-San Joaquin Delta. This text then reviews the effect of enlargement of artificial waterway of the Chesapeake and Delaware Canal, which has resulted in substantial alterations of the physical hydrography, biotic populations and chemical environment of the canal and its approaches. Other chapters consider the elements in a mathematical model for estuarial sediment transport. This book discusses as well sediment transport rates in coastal waters. The

final chapter deals with accurate estimates of fish abundance for models of many estuarine processes. This book is a valuable resource for ecologists, environmentalists, and scientists.

Climate Change and Marine and Freshwater Toxins Luis M. Botana,M. Carmen Louzao,Natalia Vilarino,2020-12-16 The increasingly widespread production of toxins by marine and freshwater microalgae raises serious concerns regarding seafood and drinking water safety. This book compiles studies on the influence of climate change on the spreading of toxin-producing species in aquatic systems. The chemistry and biology of toxin production is revised and an outlook on control and prevention of the toxins' impact on human and animal health is given.

The Natural Genesis (Two Volumes in One) Gerald Massey,2011-12-01 Egyptologist Gerald Massey challenged readers in *A Book of the Beginnings* to consider the argument that Egypt was the birthplace of civilization and that the widespread monotheistic vision of man and the metaphysical was, in fact, based on ancient Egyptian mythos. In *The Natural Genesis*, presented here in an omnibus edition, Massey delivers a sequel, delving deeper into his compelling polemic. In Volume I, he offers a more intellectual, fine-tuned analysis of the development of society out of Egypt. From the simplest signs (numbers, the cross) to the grandest archetypes (darkness, the mother figure), Massey carefully and confidently lays the cultural and psychosocial bricks of evolutionism. Volume II provides detailed discourse on the Egyptian origin of the delicate components of the monotheistic creed. With his agile prose, Massey leads an adventurous examination of the epistemology of astronomy, time, and Christology-and what it all means for human culture. British author GERALD MASSEY (1828-1907) published works of poetry, spiritualism, Shakespearean criticism, and

theology, but his best known works are in the realm of Egyptology, including *The Book of the Beginnings*, *The Natural Genesis*, and *Ancient Egypt: The Light of the World*.

Coastal Ecosystems in Transition Thomas C. Malone,Alenka Malej,Jadran Faganeli,2021-01-13 Explores how two coastal ecosystems are responding to the pressures of human expansion The Northern Adriatic Sea, a continental shelf ecosystem in the Northeast Mediterranean Sea, and the Chesapeake Bay, a major estuary of the mid-Atlantic coast of the United States, are semi-enclosed, river-dominated ecosystems with urbanized watersheds that support extensive industrial agriculture. *Coastal Ecosystems in Transition: A Comparative Analysis of the Northern Adriatic and Chesapeake Bay* presents an update of a study published two decades ago. Revisiting these two ecosystems provides an opportunity to assess changing anthropogenic pressures in the context of global climate change. The new insights can be used to inform ecosystem-based approaches to sustainable development of coastal environments. Volume highlights include: Effects of nutrient enrichment and climate-driven changes on critical coastal habitats Patterns of stratification and circulation Food web dynamics from phytoplankton to fish Nutrient cycling, water quality, and harmful algal events Causes and consequences of interannual variability The American Geophysical Union promotes discovery in Earth and space science for the benefit of humanity. Its publications disseminate scientific knowledge and provide resources for researchers, students, and professionals. Read a review of this book in *Marine Ecology* review of this book

Egg & Spoon Gregory Maguire,2014-09-09 In this tour de force, master storyteller Gregory Maguire offers a dazzling novel for fantasy lovers of all ages. Elena Rudina lives in the impoverished Russian countryside. Her father has been dead for

years. One of her brothers has been conscripted into the Tsar's army, the other taken as a servant in the house of the local landowner. Her mother is dying, slowly, in their tiny cabin. And there is no food. But then a train arrives in the village, a train carrying untold wealth, a cornucopia of food, and a noble family destined to visit the Tsar in Saint Petersburg — a family that includes Ekaterina, a girl of Elena's age. When the two girls' lives collide, an adventure is set in motion, an escapade that includes mistaken identity, a monk locked in a tower, a prince traveling incognito, and — in a starring role only Gregory Maguire could have conjured — Baba Yaga, witch of Russian folklore, in her ambulatory house perched on chicken legs.

Turning Point Paula Chase, 2020-09-15 When being yourself isn't good enough, who should you be? Told in dual perspectives, this provocative and timely novel for middle-school readers by Paula Chase, the acclaimed author of *So Done* and *Dough Boys*, will resonate with fans of Jason Reynolds, Rebecca Stead, and Renée Watson. Best friends Rasheeda and Monique are both good girls. For Sheeda, that means keeping her friends close and following her deeply religious and strict aunt's every rule. For Mo, that means not making waves in the prestigious and mostly White ballet intensive she's been accepted to. But what happens when Sheeda catches the eye of Mo's older brother, and the invisible racial barriers to Mo's success as a ballerina turn out to be not so invisible? What happens when you discover that being yourself isn't good enough? How do you fight back? Paula Chase explores the complex and emotional issues that affect many young teens in this novel set in the same neighborhood as her acclaimed *So Done* and *Dough Boys*. Friendship, family, finding yourself, and standing your ground are the themes of this universal story that is perfect for fans of Jason Reynolds, Rebecca Stead, and Renée Watson.
