Horten Ho 229 Andrei Shepelev,Huib Ottens,2006 The Horten Ho 229, one of the Luftwaffe's legendary secret projects or so-called 'wonder weapons', was one of the most enigmatic aircraft designs to emerge from World War II. In some ways a precursor to the 'stealth' concept, it was clearly ahead of its time when compared to its contemporaries. The Ho 229 was planned as the first of the next generation of German jet fighters to follow on from the Messerschmitt Me262, with the intention to create a high-speed cannon-equipped fighter-bomber and reconnaissance aircraft. Development involved design bureaus such as Goering, Galland, and Lippish, and flight testing began in December 1944. This book covers the Ho 229's development and operational record in detail and includes specially commissioned photographs of a surviving prototype, J3. The authors are both acknowledged experts on Horton aircraft.

The Horten Ho 9 David Myhra,1999 Three Horten Ho 9s were constructed prior to wars end: the V1 sailplane, the twin 004B powered prototype V2, and the serial production prototype V3 by Gotha-Friedrichsroda. Myhra has taken 150 photos of these Ho 9 versions from his collection, along with several dozen digital images, and has put together a unique Ho 9 photo collection.

Horten Ho 229 Marek Murawski,2017-03-19 Aircraft described as flying wing have sparked the interest of designers since the early, pioneer years of aviation. This definition is used to describe aircraft with specific design solutions, allowing for resignation from conventional vertical and horizontal empennage and primarily from a conventional fuselage. Virtually the whole airframe comprises only the wing, housing both the cockpit and powerplant. A sub-group of flying wings is tailless aircraft, differing from the traditional designs only in lack of horizontal empennage.

The Horten Brothers and Their All-Wing Aircraft David Myhra,1998 The Horten Brothers and Their All-Wing Aircraft is the heretofore untold true story of Reimar, Wolfram, and Walter Horten's remarkable aeronautical achievements with the all-wing planform between 1933 and 1945 as told to aviation biographer David Myhra. Talking daily with Reimar Horten at his ranch at the foothills of the Andes Mountains in Argentina for two months, and also with Walter in Baden Baden, Germany, the two brothers described in detail their struggles in Nazi controlled Germany to perfect the all-wing planform. Astounding as their real-life story is of itself, the Horten brothers gave David Myhra hundreds of photographs to illustrate this new volume. In this remarkable book David Myhra tells the true story of the Horten brothers and their all-wing aircraft through the use of over 735 photos and three-view line drawings of their entire all-wing line. Most of these photos and drawings have not been available to the public until now. Even more astonishing, the Hortens, ridiculed in the mid-1930s for wasting their genius on silly all-wing aircraft, would be the only ones called on by Hermann Goring in December 1944 to build an all-wing Amerika atomic bomber and save Deutschland from certain and final destruction by the Allies through a negotiated peace settlement. The Horten Ho 18 Amerika Bomber was not meant to be. But it might have been if the war had not ended in May 1945 but, say, May 1946. This, then, is the fascinating true story of those naive boy-designers from Bonn, the Horten brothers and their silly all-wing airplanes. AUTHOR:

German Northern Theater of Operations 1940-1945 [Illustrated Edition] Earl Ziemke,2015-11-06 [Includes 23 maps and 31 illustrations] This volume describes two campaigns that the Germans conducted in their Northern Theater of Operations. The first they launched, on 9 April 1940, against Denmark and Norway. The second they conducted out of Finland in partnership with the Finns against the Soviet Union. The latter campaign began on 22 June 1941 and ended in the winter of 1944-45 after the Finnish Government had sued for peace. The scene of these campaigns by the end of 1941 stretched from the North Sea to the Arctic Ocean and from Bergen on the west coast of Norway, to Petrozavodsk, the former capital of the Karelo-Finnish Soviet Socialist Republic. It faced east into the Soviet Union on a 700-mile-long front, and west on a 1,300-mile sea frontier. Hitler regarded this theater as the keystone of his empire, and, after 1941, maintained in it two armies totaling over a half million men. In spite of its vast area and the effort and worry which Hitler lavished on it, the Northern Theater throughout most of the war constituted something of a military backwater. The major operations which took place in the theater were overshadowed by events on other fronts, and public attention focused on the theaters in which the strategically decisive operations were expected to take place. Remoteness, German security measures, and the Russians' well-known penchant for secrecy combined to keep information concerning the Northern Theater down to a mere trickle, much of that inaccurate. Since the war, through official and private publications, a great deal more has become known. The present volume is based in the main on the greatest remaining source of unexploited information, the captured German military and naval records. In addition a number of the participants on the German side have very generously contributed from their personal knowledge and experience.

Area 51 Annie Jacobsen,2011-05-17 This compellingly hard-hitting bestseller from a Pulitzer Prize finalist gives readers the complete untold story of the top-secret military base for the first time (New York Times). It is the most famous military installation in the world. And it doesn't exist. Located a mere seventy-five miles outside of Las Vegas in Nevada's desert, the base has never been acknowledged by the U.S. government – but Area 51 has captivated imaginations for decades. Myths and hypotheses about Area 51 have long abounded, thanks to the intense secrecy enveloping it. Some claim it is home to aliens, underground tunnel systems, and nuclear facilities. Others believe that the lunar landing itself was filmed there. The prevalence of these rumors stems from the fact that no credible insider has ever divulged the truth about his time inside the base. Until now. Annie Jacobsen had exclusive access to nineteen men who served the base proudly and secretly for decades and are now aged 75-92, and unprecedented access to fifty-five additional military and intelligence personnel, scientists, pilots, and engineers linked to the secret base, thirty-two of whom lived and worked there for extended periods. In Area 51, Jacobsen shows us what has really gone on in the Nevada desert, from testing nuclear weapons to building super-secret, supersonic jets to pursuing the War on Terror. This is the first book based on interviews with eye witnesses to Area 51 history, which makes it the seminal work on the subject. Filled with formerly classified information that has never been accurately decoded for the public, Area 51 weaves the mysterious activities of the top-secret base into a gripping narrative, showing that facts are often more fantastic than fiction, especially when the distinction is almost impossible to make.

Flying Tigers Daniel Ford,2023-05-01 During World War II, in the skies over Burma and China, a handful of American pilots met and bloodied the Imperial Wild Eagles of Japan and won immortality as the Flying Tigers. One of America's most famous combat forces, the Tigers were recruited to defend beleaguered China for \$600 a month and a bounty of \$500 for each Japanese plane they shot down--fantastic money in an era when a

Manhattan hotel room cost three dollars a night.This May 2023 revision has never-before-published information about Chennault's early years. Admirable, wrote Chennault biographer Martha Byrd of Ford's original text. A readable book based on sound sources. Expect some surprises. Flying Tigers won the Aviation/Space Writers Association Award of Excellence in the year of its first publication.

Fundamentals of Aircraft and Rocket Propulsion Ahmed F. El-Sayed,2016-05-25 This book provides a comprehensive basics-to-advanced course in an aero-thermal science vital to the design of engines for either type of craft. The text classifies engines powering aircraft and single/multi-stage rockets, and derives performance parameters for both from basic aerodynamics and thermodynamics laws. Each type of engine is analyzed for optimum performance goals, and mission-appropriate engines selection is explained. Fundamentals of Aircraft and Rocket Propulsion provides information about and analyses of: thermodynamic cycles of shaft engines (piston, turboprop, turboshaft and propfan); jet engines (pulsejet, pulse detonation engine, ramjet, scramjet, turbojet and turbofan); chemical and non-chemical rocket engines; conceptual design of modular rocket engines (combustor, nozzle and turbopumps); and conceptual design of different modules of aero-engines in their design and off-design state. Aimed at graduate and final-year undergraduate students, this textbook provides a thorough grounding in the history and classification of both aircraft and rocket engines, important design features of all the engines detailed, and particular consideration of special aircraft such as unmanned aerial and short/vertical takeoff and landing aircraft. End-of-chapter exercises make this a valuable student resource, and the provision of a downloadable solutions manual will be of further benefit for course instructors.
