Horten Ho 229 Andrei Shepelev,Huib Ottens,2006 The Horten Ho 229, one of the Luftwaffe's legendary secret projects or so-called 'wonder weapons', was one of the most enigmatic aircraft designs to emerge from World War II. In some ways a precursor to the 'stealth' concept, it was clearly ahead of its time when compared to its contemporaries. The Ho 229 was planned as the first of the next generation of German jet fighters to follow on from the Messerschmitt Me262, with the intention to create a high-speed cannon-equipped fighter-bomber and reconnaissance aircraft. Development involved design bureaus such as Goering, Galland, and Lippish, and flight testing began in December 1944. This book covers the Ho 229's development and operational record in detail and includes specially commissioned photographs of a surviving prototype, J3. The authors are both acknowledged experts on Horton aircraft.

The Horten Ho 9/Ho 229 David Myhra,2003-02-10 Horten brothers biographer David Myhra continues his efforts for a full accounting of the events surrounding the design, construction, and flight testing of the twin turbojet powered all-wing prototype Horten Ho 9 fighter/interceptor and its serial production prototype the Horten Ho 229V3.

Don't Need No Thought Control Gerd Horten,2020-06-05 The fall of the Berlin Wall is typically understood as the culmination of political-economic trends that fatally weakened the East German state. Meanwhile, comparatively little attention has been paid to the cultural dimension of these dramatic events, particularly the role played by Western mass media and consumer culture. With a focus on the 1970s and 1980s, *Don't Need No Thought Control* explores the dynamic interplay of popular unrest, intensifying economic crises, and cultural policies under Erich Honecker. It shows how the widespread influence of (and

public demands for) Western cultural products forced GDR leaders into a series of grudging accommodations that undermined state power to a hitherto underappreciated extent.

German U-Boat Losses During World War II Axel Niestlé, 2014-06-30 A deep dive into the fate of German submarines lost during the Second World War. “This has to be the best reference you can find on the subject.”—Military Modelling No other publication on this subject comes even close to including the amount of detail provided in this book. An introduction both summarizes previous works on the subject and describes the difficulties of obtaining and verifying information from either the Germans or the Allies on U-boat losses. The main part of the book lists by hull number each U-boat’s date of commissioning, its commanding officer, and the date and port of departure for its last patrol. It also gives the date, position, and cause of loss of each submarine, with complete details on Allied units involved in the sinking, the names and ranks of their commanding officers and pilots, and the number of crew killed or rescued. An appendix neatly summarizes data on the disposition of surviving U-boats at the end of the war and provides valuable statistical data on German U-boat losses. “Highly recommended for every serious scholar of the Atlantic war, and every library in naval history and the history of the Second World War.”—The Mariner’s Mirror “The level of detail is quite impressive and this edition is the result of 16 years of further research since the first edition . . . If you are seeking data on the fate of U-Boats then this book should be your ‘first place of call’—no other book has such detailed data.”—Military Archive Research

The Horten Brothers and Their All-Wing Aircraft David Myhra, 1998 The Horten Brothers and Their All-Wing Aircraft is the heretofore untold true story of Reimar, Wolfram, and Walter Horten’s remarkable aeronautical achievements with the all-wing planform between 1933 and 1945 as told to aviation biographer David Myhra. Talking daily with Reimar Horten at his ranch at the foothills of the Andes Mountains in Argentina for two months, and also with Walter in Baden Baden, Germany, the two brothers described in detail their struggles in Nazi controlled Germany to perfect the all-wing planform. Astounding as their real-life story is of itself, the Horten brothers gave David Myhra hundreds of photographs to illustrate this new volume. In this remarkable book David Myhra tells the true story of the Horten brothers and their all-wing aircraft through the use of over 735 photos and three-view line drawings of their entire all-wing line. Most of these photos and drawings have not been available to the public until now. Even more astonishing, the Hortens, ridiculed in the mid-1930s for wasting their genius on silly all-wing aircraft, would be the only ones called on by Hermann Goring in December 1944 to build an all-wing Amerika atomic bomber and save Deutschland from certain and final destruction by the Allies through a negotiated peace settlement. The Horten Ho 18 Amerika Bomber was not meant to be. But it might have been if the war had not ended in May 1945 but, say, May 1946. This, then, is the fascinating true story of those naive boy-designers from Bonn, the Horten brothers and their silly all-wing airplanes. AUTHOR:

Horten Ho 229 Marek Murawski, 2017-03-19 Aircraft described as flying wing have sparked the interest of designers since the early, pioneer years of aviation. This definition is used to describe aircraft with specific design solutions, allowing for resignation from conventional vertical and horizontal empennage and primarily from a conventional fuselage. Virtually the whole airframe comprises only the wing, housing both the cockpit and powerplant. A sub-group of flying wings is tailless aircraft, differing from the traditional designs only in lack of horizontal empennage.

The Horten Ho 9 David Myhra, 1999 Three Horten Ho 9s were constructed prior to wars end: the V1 sailplane, the twin 004B powered prototype V2, and

the serial production prototype V3 by Gotha-Friedrichsroda. Myhra has taken 150 photos of these Ho 9 versions from his collection, along with several dozen digital images, and has put together a unique Ho 9 photo collection.

The War of the Rebellion: v. 1-53 [serial no. 1-111] Formal reports, both Union and Confederate, of the first seizures of United States property in the southern states, and of all military operations in the field, with the correspondence, order and returns relating specially thereto. 1880-1898. 111 v United States. War Department,1886 Official records produced by the armies of the United States and the Confederacy, and the executive branches of their respective governments, concerning the military operations of the Civil War, and prisoners of war or prisoners of state. Also annual reports of military departments, calls for troops, correspondence between national and state governments, correspondence between Union and Confederate officials. The final volume includes a synopsis, general index, special index for various military divisions, and background information on how these documents were collected and published. Accompanied by an atlas.

Junkers Ju 287 Stephen Ransom,Peter Korrell,2008 The extraordinary Junkers Ju 287, the first truly swept-winged, jet-powered aircraft, took to the sky in August 1944, at a time when Germany was suffering sustained round-the-clock bombing by the Allied forces. The project was considered top secret and evaded Allied intelligence for many months. This exciting new book is beautifully illustrated throughout with striking photographs, several of which are previously unpublished, and contains much new and revised information on the Ju 287. It is certain to become the definitive account of this remarkable aircraft.
