Kevin Jackson

The Hovercraft Ashley Hollebone,2012-08-01 The hovercraft was first created in 1959, when Sir Christopher Cockerell came up with a prototype that crossed the English Channel. The SRN1, the first ever hovercraft, is now proudly housed by the Science Museum and this very British invention enjoys an active role in many arenas, from travel, leisure cruising and racing to lifesaving and transporting goods. This detailed book delves into the history of the hovercraft, from the early days of its development through to the commercial and military applications of the craft. It looks into the exciting world of hovercraft leisure, cruising and racing from amateur to Formula 1, and also explores the important role the hovercraft plays in rescues whether on water or delivering aid around the world in places that helicopters can't reach. Finally, it details the types of hovercraft in use today, and what the future holds. The hovercraft is more than a product of 1960s Britain: it is one that has pushed the boundaries of transport as we look into the future and we have the back-story culture of Britain to thank for its invention.

Hovercraft Sarah Tieck,2011-01-01 Put readers in the pilot's seat of a hovercraft! With vibrant graphics, action-packed photographs, and engaging text, this book will get readers excited about the fast, thrilling world of hovercraft. Readers will learn how powerful hovercraft move over land and water to be used in war, for rescue work, and for racing and recreation. A comprehensive diagram displays the main parts of a hovercraft. Simple, straightforward text breaks down complicated engine workings for readers. Safety measures and hovercraft history are also discussed. Features include a table of contents, fast facts, a glossary with phonetic spellings, and an index. Big Buddy Books is an imprint of ABDO Publishing Company.

Hovercraft Story Ashley Hollebone,2012-02-29 Motoring journalist Ashley Hollebone reveals for the first time the full story behind the hovercraft, a wonderful British invention that was

created in a back shed from a rusty food tin and an old hair dryer – simple yet remarkable! Christopher Cockerell’s 1950s invention has found a multitude of uses across numerous arenas, from cross-Channel ferries and leisure cruising to racing at up to 80mph; it has modernised travel and has an impressive safety record, yet despite this little has been written about this, one of the most innovative modes of transport. This colourful book decisively redresses the balance and comprehensively reveals the history of the hovercraft, through photographs and diagrams, making it an invaluable addition to every enthusiast’s library.

Hovercrafts Aaron Sautter, 2007 Fire up a hovercraft and sail right over land, water, and everything in between. Find out how these powerful vehicles hover up to 9 feet above almost any surface. From rugged off-road racing to daring ocean rescue missions, the action never stops!

Hovercraft Matt Scheff, 2015-01-01 This title offers readers cool facts about hovercrafts, including what they’re made of, what they can do, and how they are used. The title also a photo diagram, glossary, and an additional resources section. Aligned to Common Core Standards and correlated to state standards. SportsZone is an imprint of Abdo Publishing, a division of ABDO.

Kinetic Contraptions Curt Gabrielson, 2010 The two dozen contraptions found in this handy resource can move across the land, over the sea, and through the air and can be assembled primarily from low-cost or free recycled materials, batteries, and a single motor. Some of the projects include constructing a hovercraft out of a Styrofoam plate, two corks, and binder clips; building a double-paddlewheeler out of paint stirrers, plastic bottles, and a pair of disposable knives; and turning bamboo

skewers, checkers, and a drinking straw into a three-wheeled motorcycle. Each project is clearly explained through materials and tools lists, step-by-step instructions with photographs, and scientific background on the concepts being explored. Budding engineers will get experience working with tools, testing simple circuits, modifying and improving their designs, and building unique contraptions of their own.

How to Build a Hovercraft Stephen Voltz,Fritz Grobe,2013-11-05 From the Coke and Mentos fountain makers who found initial fame via Maker Faire and YouTube (more than 150 million views!) comes this collection of DIY science projects guaranteed to inspire a love of experimentation. Fritz Grobe and Stephen Voltz, also known as EepyBird, share their favorite projects: a giant air vortex cannon, a leaf blower hovercraft, a paper airplane that will fly forever, and many more. Each experiment features instructions that will take users from amateur to showman level—there's something here for all skill levels—alongside illustrations, photographs, and carefully explained science. *How to Build a Hovercraft* is guaranteed to

engage curious minds and create brag-worthy results!

Hovercraft Technology, Economics and Applications J.R. Amyot, 2013-10-22 The amphibious versatility, marine speed and low footprint pressure have given the hovercraft a role in specialized applications. Among them are search and rescue, emergency medical services, military and arctic operations, icebreaking, patrol, law enforcement, ferries, and recreational activities such as racing. To meet these demands, the hovercraft has undergone considerable development since its inception. A comprehensive and timely review of the analysis, design, operation, economics and applications of hovercraft is presented in this volume by a team of highly qualified experts. The topics covered range from first principles to the state-of-the-art, with extensive references to current literature. The overall presentation is intended not to exceed the final year level of undergraduate engineering. The introduction and summary sections of all chapters are intended to give a qualitative grasp of the material covered without having to read all the technical portions. In varying degrees, the volume will appeal to managers, decision-support staff, operators, technologists, undergraduate students, and anyone entering the hovercraft field or seeking an introduction to it. It will also be of interest to design engineers, researchers and graduate students. Thus, this volume can serve as an up-to-date reference on several important aspects of hovercraft for a wide range of readers.

If Hovercraft Can Go Anywhere, How Did We End Up Here? Russ Bagley,John Barker,2018-05-01 If Hovercraft Can Go Anywhere, How Did We End Up Here? tells the stories of two hovercraft fixers who gave up some of the best years of their lives to repair and commission hovercraft all over the world. Unfortunately, the places that need hovercraft are tough, rugged, god-forsaken and not in the least bit glamorous - just like John and Russ, in fact. Whether impounded in the docks, in pieces in a hanger or strapped to a stranded lorry, as John once put it, There's always a bloody hovercraft waiting to be fixed.
