**Spaceman** Mike Massimino, 2016-10-04 NEW YORK TIMES BESTSELLER • NASA astronaut Mike Massimino shares incredible true stories from space—a rare, wonderful world where science meets the most thrilling adventure. “Mike is a spaceman through and through; he tells how hard work can take you out of this world.”—Bill Nye the Science Guy Have you ever wondered what it would be like to find yourself strapped to a giant rocket that’s about to go from zero to 17,500 miles per hour? Or to look back on Earth from outer space and see the surprisingly precise line between day and night? Or to stand in front of the Hubble Space Telescope, wondering if the emergency repair you’re about to make will inadvertently ruin humankind’s chance to unlock the universe’s secrets? Mike Massimino has been there, and in *Spaceman* he puts you inside the suit, with all the zip and buoyancy of life in microgravity. Massimino’s childhood space dreams were born the day Neil Armstrong set foot on the moon. Growing up in a working-class Long Island family, he catapulted himself to Columbia and then MIT, only to flunk his first doctoral exam and be rejected three times by NASA before making it through the final round of astronaut selection. Taking us through the surreal wonder and beauty of his first spacewalk, the tragedy of losing friends in the Columbia shuttle accident, and the development of his enduring love for the Hubble Telescope—which he and his fellow astronauts were tasked with saving on his final mission—Massimino has written an ode to never giving up, revealing just what having “the right stuff” really means.

Like *Friends* before it, *The Big Bang Theory* is touted as the show for the new millennium, bringing together aspects of classic humor applied to modern predicaments, usually sexual in nature. This collection of new essays explores sexual themes in *The Big Bang Theory*, interpreted through various critical lenses. Focusing on gender issues, the contributors explore how the series deals with sexuality and the ideals of masculinity, femininity and heterosexuality.

**Exploiting Fandom** Mel Stanfill, 2019-02-15 As more and more fans rush online to share their thoughts on their favorite shows or video games, they might feel like the process of providing feedback is empowering. However, as fan studies scholar Mel Stanfill argues, these industry invitations for fan participation indicate not greater fan power but rather greater fan usefulness. Stanfill's argument, controversial to some in the field, compares the domestication of fandom to the domestication of livestock, contending that, just as livestock are bred bigger and more docile as they are domesticated, so, too, are fans as the entertainment industry seeks to cultivate a fan base that is both more useful and more controllable. By bringing industry studies and fan studies into the conversation, Stanfill looks closely at just who exactly the industry considers proper fans in terms of race, gender, age, and sexuality, and interrogates how digital media have influenced consumption, ultimately finding that the invitation to participate is really an incitement to consume in circumscribed, industry-useful ways.

*A Multimodal Study of Sarcasm in Interactional Humor* Sabina Tabacaru, 2019-10-08 The corpus-based approach to humor offers innovative and more than

plausible objectives, supported by sound arguments, which underline the need to analyze humor both verbally and non-verbally. The cognitive linguistic account of humor sets to analyze a corpus of humorous meanings in interaction and to present the elements that help to create the humorous effects: common ground, intersubjectivity, facial expressions, speakers' attitude, etc. The large corpus of examples annotated in ELAN offers a much-needed multimodal perspective of humor, which encompasses all the different techniques used by speakers. The present analysis offers inspiring insight for future research, in different fields of study: multimodality, humor, and psycholinguistics. The study reveals the need of analyzing both verbal and non-verbal elements in discourse in general and humor in particular as co-speech gestures are essential for the understanding of the message as intended by the speakers.

AN INSTANT NEW YORK TIMES BESTSELLER A USA TODAY BESTSELLER NAMED A BEST BOOK OF 2022 BY GLAMOUR Talking with Jessica, I realized how easy it had been for me to kind of put all 12 years of my time on *Big Bang Theory* under one general umbrella, as it were. The questions she asked and the information she'd reveal to me from someone else she'd interviewed forced me into a frame of mind where each season - and sometimes each episode - became its own, separate entity again. . . Frankly, it turned into a version of therapy I hadn't realized I'd needed and couldn't have known how much I'd enjoy. —Jim Parsons

That a UCLA particle physics professor would be hired to ensure scientific accuracy throughout a 30 minute CBS sitcom? Apparently, the producers and creators of the smash hit *The Big Bang Theory* did, and the show now boasts some 12 million viewers a week. And it seems that the show is also inspiring would-be and current physicists (and other scientists, too); according to the show's science consultant, Dr. David Saltzberg of UCLA, emails are received from both high school and graduate students asking him about certain scientific aspects of the show. He also notes that there was a lot of background work that the writers did prior to shooting, such as following graduate students around and exploring what a physicist's apartment might actually look like. According to Saltzberg, a real physicist's apartment was a bit too boring, so the producers had to dress up Leonard and Sheldon's apartment a little. But, the science itself was spot on. **MEET THE AUTHOR** Chris St-Jean is a Canadian teacher who has enjoyed American literature for as long as she can remember. Her daughters, ages three and seven, seem to have inherited her appreciation for books as well. She spends her free time writing short stories, hanging out with her husband and children, and working toward a black belt in karate. **EXCERPT FROM THE BOOK** Simon Helberg as Howard Wolowitz: One of Helberg's biggest passions was music until he hit the 11th grade. That's when he played a delivery part in an all-female production. Since then, he's appeared in shows like *Studio 60 on the Sunset Strip* and *Joey*, often being typecast as the geek. He got the role of Wolowitz in 2007, prior to the show's start. Kunal Nayyar as Raj Koothrappali: Nayyar is the newest to the small screen; he was born in London, England and grew up in India. He decided to pursue educational opportunities in the United States and majored in business at the University of Portland in Oregon while taking some acting classes. From there, he went to Temple University in Philadelphia and earned his Masters of Fine Arts. He is a cricket fan and had a guest starring role on *NCIS* before snagging the part on *The Big Bang Theory*... Buy a copy to keep reading!
