**Maritime Challenges and Priorities in Asia** Joshua Ho, Sam Bateman, 2013-02-15 Maritime issues are particularly important for Asian countries, where there is a high reliance on shipping routes for international trade, many difficult disputes over maritime boundaries, and the prospect of increasing tensions where maritime power might play a significant role. This book uses contributions by 17 experts to build a comprehensive survey of the maritime issues affecting Asia. It discusses the issues overall, goes on to examine the issues from the perspective of each of 14 key countries, and concludes by assessing the prospects for resolving common problems in order to preserve good order at sea.

*Naval Modernisation in Southeast Asia* Geoffrey Till, Ristian Atriandi Supriyanto, 2017-09-18 This edited volume reviews the nature and consequences of naval modernisation in Southeast Asia against the backdrop of growing tensions over the South China Sea and increasing competition between the United States and China in the region. The varying problems and challenges facing the small and medium navies of the area as they seek to grow their maritime power in response to their perceptions of strategic need are compared and contrasted. The prospects of significant destabilisation of an already volatile area - even of a potential naval arms race, are carefully analysed. There can be little doubt that naval modernisation in Southeast Asia is a key indicator of the likely future of the Asia Pacific and also illustrates the problems faced by small and medium powers in a world dominated by the great. Accordingly this book will be of much interest to students and teachers focusing on security in the Asia Pacific region as well to those concerned with naval development in general.

*China Maritime Force-Navy, Coast Guard, MSA and Maritime Militia* YU-PING SU, 2024-02-05 Introduction to 2024 most updated Chinese Naval force, including People's Liberation Army Navy, China

People's Armed Police's Coast Guard corps, MSA fleet, Maritime Militia. If you want to know this growing force who might challenge US Navy's global power, it must be Chinese. If you know nothing on Chinese Naval Force, you will certainly consider US navy as number one in the world. Once you know how powerful the Chinese naval force is today, you will worry and can not sleep. To tackle the challenge, US need to regain the uprising spirit after Pearl Harbor in 1941, do more research and then start to build ships like making hamburger, a ship a week. Pretend that China doesn't exist will not improve the situation.

**Seapower in the Post-modern World** Basil Germond,2024-05-14 In an era of increasing geopolitical tensions, disruptive technologies, and the rise of authoritarianism, the question of who masters the seas is more than ever central to the future of the international order. But while naval operations, maritime security, and ocean governance have become increasingly relevant in world politics, the concept and definition of seapower have largely been neglected by the scholarship in the

international relations field. *Seapower in the Post-modern World* fills this gap with an analysis of the naval, economic, and ideational dimensions of seapower from antiquity to today. Exploring the extent to which the permanent elements associated with seapower – such as technology, commerce, and maritime culture – transcend historical periods, Basil Germond frames contemporary seapower as a combination of components, including traditional naval power, post-modern conceptions of collective and civilian seapower, and the neo-modern phenomena of maritime territorialization and the naval arms race. By giving seapower a new conceptual definition, *Seapower in the Post-modern World* offers key analytical tools for understanding the stability of the global maritime order and seapower's contribution to global leadership more broadly.

Middle Powers and the Rise of China Bruce Gilley, Andrew O'Neil, 2014-07-08 This is the first work to examine the importance and role of middle powers in the key phenomenon of contemporary international politics, the rise of China. Middle powers have capabilities immediately below those of great powers yet exercise influence far above most other states in global trade and as allies or adversaries in regional security, arms proliferation, and global governance. The book reviews China's middle-power relations with South Korea, Malaysia, Thailand, Indonesia, Australia, South Africa, Turkey, and Brazil. Contributors address how these diverse nations are responding to a rising China, the impact of Chinese power on each, and whether these states are being attracted to China or deterred by its new power and assertiveness. The book also explores how much (or how little) China, and for comparison the US, value middle powers and examines whether or not middle powers can actually shape China's behavior.

**Now You Know Royalty** Doug Lennox, 2009-06-29 We're all familiar with the trials and tribulations of the current British Royal Family, but there are more than 25 royal families that still

wield power in the world today from Japan and Thailand to Saudi Arabia and Scandinavia. The crown prince of Q&A, Doug Lennox, is at it again, this time with a cornucopia of facts and frivolities about the escapades, excesses, and extravagances of the world's monarchies, past and present. From betrayal and beheadings to pageantry and privilege, discover the truth about life behind the castle walls. Which wife of England's Henry VIII had six fingers on one hand? What royal connection does Thomas Crapper, inventor of the flush toilet, have? What is the royal residence in Monaco known as? What royal family in the world today has ruled the longest? Who was the Hammer of the Scots? Why are members of royal families said to have blue blood? Which member of the British royal family competed at the Olympics? Where did the word czar come from? What did Marie Antoinette say before she was executed?

The Voice from China An CHEN, 2014-07-08 In short, the 24 selected and representative articles written in English by the author over the past 30-odd years, mainly published in international leading journals and now collected and compiled in this monograph, could be deemed the products of international academic debates. They record, reflect and embody the author's personal views on a number of contemporary basic issues in international economic law & the international economic order. These personal views with Chinese characteristics are deeply rooted in China's specific national situation and the common position of the world-wide weak groups, and are significantly and substantially different and independent from some existing voices from strong western powers, which is why the book bears the title "The Voice from China". On the basis of their specific themes and content, the 24 representative articles are divided into six parts: 1) Jurisprudence of Contemporary International Economic Law; 2) Great Debates on Contemporary Economic Sovereignty; 3) China's Strategic Position on Contemporary International Economic Order Issues; 4) Divergences on Contemporary Bilateral Investment Treaty; 5) Contemporary China's Legislation on Sino-Foreign Economic Issues; and 6) Contemporary Chinese Practices on International Economic Disputes (Case Analysis).

**India's Naval Strategy and Asian Security** Anit Mukherjee, C. Raja Mohan, 2015-11-19 This book examines India's naval strategy within the context of Asian regional security. Amidst the intensifying geopolitical contestation in the waters of Asia, this book investigates the growing strategic salience of the Indian Navy. Delhi's expanding economic and military strength has generated a widespread debate on India's prospects for shaping the balance of power in Asia. This volume provides much needed texture to the abstract debate on India's rise by focusing on the changing nature of India's maritime orientation, the recent evolution of its naval strategy, and its

emerging defence diplomacy. In tracing the drift of the Navy from the margins of Delhi's national security consciousness to a central position, analysing the tension between its maritime possibilities and the continentalist mind set, and in examining the gap between the growing external demands for its security contributions and internal ambivalence, this volume offers rare insights into India's strategic direction at a critical moment in the nation's evolution. By examining the internal and external dimensions of the Indian naval future, both of which are in dynamic flux, the essays here help a deeper understanding of India's changing international possibilities and its impact on Asian and global security. This book will be of much interest to students of naval strategy, Asian politics, security studies and IR, in general.

Confidence Building from the Sea Vijay Sakhuja,2001 Anything that threatens the growth of maritime enterprise almost by definition, threatens prosperity and security. The maintenance of order at sea is, therefore, crucial for all maritime estates. India, by virtue of its geography, size, large Exclusive Economic Zone, growing economy and maritime capability has always played an important role in preserving order at sea.
