Military Modernisation in Southeast Asia after the Cold War Shang-Su Wu, 2024-04-01 Southeast Asian countries represent a wide range of approaches to military modernisation due to their great diversity in politics, economies, geography and other factors. Bounded by the Pacific and Indian Oceans and located between China and India is the setting for the geostrategic impacts of military modernisation in Southeast Asian countries. Differing from previous research focused on military acquisition, this book additionally covers retention of assets and carefully examines the ageing issues that affect readiness and capabilities. In doing so, it provides a comprehensive view of military modernisation. This book also compares each country's situation in the region in terms of military strength and security challenges to elaborate on the geostrategic impacts of military modernisation. The ten cases of military modernisation in the post-Cold War context provide rich content for readers to explore the evolution of military modernisation in developing countries after 1991. This book sheds light on security studies of Southeast Asia and is a useful resource for academic researchers, policy-makers and defence practitioners.

Covert Shores H. Sutton, 2016-05-05 2nd Edition. Until now, the underwater craft employed by the World's Special Forces have been known only to a select few. Covert Shores is the first complete and documented insight into the little-known world of the mini-sub, Swimmer Delivery Vehicles (SDVs) and other underwater vehicles used by the U. S. Navy SEALs, Special Boat Service, Spetsnaz and more. Operating under a blanket of secrecy, these craft have remained hidden and unrecorded in a way that no other class of military vehicles has. Covert Shores reveals the craft, units, missions and tactics of this unseen world. Spanning from 1776 to the present day, and covering activities in many countries including US, Great Britain, Italy, Israel, Russia, France, Germany, Yugoslavia and Sweden, this book is filled with tales of the ingenuity, resourcefulness, experimentation and cunning of those involved in the design and operations of these expert craft. A must-read for all military enthusiasts. 274 pages 8.5x11 full color with over 100 original color illustrations. Foreword by Larry Bond

Balochistan Francesca Marino, 2020-11-28 A time will come when children can play in the streets without the fear of being abducted, women in their homes can be sure that their husbands and sons will return, and young women will no longer feel afraid to go to their university or workplace. I hope that dawn will break one day on a free and peaceful land. Balochistan is an account of the trials and tragedies suffered by this region, which has been forcefully annexed to Pakistan against the will of its people. The area is of fundamental strategic and geopolitical importance not only to Islamabad and to the Chinese CPEC project, but also to the numerous players that act as avatars of the powers in the long-running 'Great Game'. What is woefully ignored is that the lives of the locals are under stake. The Baloch people have long been trying to draw international attention to what is happening to them and their homeland. However, the world has turned a blind eye to the ethnic and cultural genocide carried out so far. Starting from the history of Balochistan and the wrongs done to its people, along with detailed interviews with the lead actors in this struggle, acclaimed journalist Francesca Marino attempts to lend a voice to the Baloch people and speak for themselves about one of the most reprehensible and inexplicable silences of our times.

Chinese History in Geographical Perspective Yongtao Du, Jeff Kyong-McClain, 2013-01-30 The authors in this volume believe that long-term, profound, and sometimes tumultuous changes in the last five hundred years of the history of China have been no less geographical than social, political, or economic. From the dialectics of local-empire relations to the imperial state's persistent array of projects for absorbing and transforming ethnic regions on the margins of empire; from the tripling of imperial territories in the Qing to the disputes over the identity of the former "outer zones" in the early Republican era; and from the universalistic imagination of "all-under-heaven" to the fraught processes of re-drawing a new set of nation-state boundaries in the twentieth century, the study of the dynamics of geography, broadly conceived, promises to provide insight into the contested development of the geographical entity which we, today, call 'China.'

Monk in a Merc Ashok Panagariya,2021-06-28 Could we find happiness and attain mental peace without relinquishing our material goals? What if we could understand why we behave and act the way we do? How does our brain really trick us into many of the decisions we make every day? What if we could actually train our brain and improve our ability to lead a more meaningful life-not only for ourselves but also for society? In this brilliantly engaging read, Ashok Panagariya blends his life experiences with modern science and Indic philosophy to tackle these questions and shares tools that anyone can acquire to become a better 'brain-manager'. He delves deeply into the human mind, showing what makes the brain unique and the remarkable intrinsic capacity it holds to influence our lives. He does all this while making us acutely aware of the role luck and chance play in how we eventually shape up. Monk in a Merc is an insightful read for anyone looking to achieve eternal happiness and peace while still enjoying all that life offers-material wealth and professional success. It turns the table on the conventional understanding of monkhood, which seeks renunciation of material pursuits in search of a spiritual quest.
