US Army AH-1 Cobra Units in Vietnam Jonathan Bernstein, 2012-11-20 Bell's AH-1 Cobra was the first dedicated helicopter gunship to reach frontline service anywhere in the world. Developed as a private venture by the manufacturer, and based on the mechanics of the ubiquitous UH-1 Huey, the Cobra proved a huge success once introduced into combat with the US Army in 1966. Built as a key weapon in the Advanced Aerial Fire Support System concept of 1965, the AH-1 was one of the few aircraft to reach the combat zone after actual combat experience went into its design. The AH-1 helped reduce the losses being suffered by vulnerable troop transport helicopters by providing effective fire suppression during airmobile operations. This book explores its history, technology and crew.

Huey Cobra Gunships Chris Bishop, 2006-08-29 The Bell Huey Cobra was the very first purpose-designed helicopter gunship to become operational and to see combat. Designed in the mid-1960s as an interim solution for an armed escort and close-support weapon to support the US Army in the Vietnam War, it is still being manufactured and improved in the 21st century, making it a success far beyond the wildest dreams of its creators. In this title Chris Bishop discusses the origins of the Huey Cobra, the innovations to its design throughout the years and its major combat uses in numerous theatres, including Vietnam, the Iran-Iraq War in the 1980s, US Persian Gulf escort operations, Lebanon 1983, Panama 1989, the Gulf War 1991 and in the current conflict in Iraq.

UH-1 Huey Gunship vs NVA/VC Forces Peter E. Davies,2021-08-19 Often described as the US Army's aerial jeep the UH-1 Iroquois ('Huey') was the general-purpose vehicle that provided mobility in a hostile jungle environment which made rapid troop movement extremely challenging by any other means. Hueys airlifted troops, evacuated casualties, rescued downed pilots, transported cargo externally and enabled rapid transit of commanders in the field. Although 'vertical aviation' had only become a practical reality during the Korean War helicopters evolved rapidly in the decade before Vietnam and by 1965 the US Army and US Marines relied on them as primary combat tools. This was principally because North Vietnam's armed forces had long experience of jungle operations, camouflage and evasion. Generally avoiding set-piece pitched battles they relied on rapid, frequent strikes and withdrew using routes that were generally inaccessible to US vehicles. They commonly relied on darkness and bad weather to make their moves, often rendering them immune to conventional air attack. Gunship helicopters, sometimes equipped with Firefly searchlights and early night vision light intensifiers, were more able to track and attack the enemy. Innovative tactics were

required for this unfamiliar combat scenario and for a US Army that was more prepared for conventional operations in a European-type setting. One of the most valuable new initiatives was the UH-1C 'Huey Hog' or 'Frog' gunship, conceived in 1960 and offering more power and agility than the UH-1B that pioneered gunship use in combat. Heavily armed with guns and rockets and easily transportable by air these helicopters became available in large numbers and they became a major problem for the insurgent forces throughout the war. Covering fascinating details of the innovations in tactics and combat introduced by gunship helicopters, this book offers an analysis of their adaptability and usefulness in a variety of operations, while exploring the insurgent forces' responses to the advent of 'vertical aviation'.

The Dream Machine Richard Whittle, 2010-04-27 WHEN THE MARINES decided to buy a helicopter-airplane hybrid "tiltrotor" called the V-22 Osprey, they saw it as their dream machine. The tiltrotor was the aviation equivalent of finding the Northwest Passage: an aircraft able to take off, land, and hover with the agility of a helicopter yet fly as fast and as far as an airplane. Many predicted it would reshape civilian aviation. The Marines saw it as key to their very survival. By 2000, the Osprey was nine years late and billions over budget, bedeviled by technological hurdles, business rivalries, and an epic political battle over whether to build it at all. Opponents called it one of the worst boondoggles in Pentagon history. The Marines were eager to put it into service anyway. Then two crashes killed twenty- three Marines. They still refused to abandon the Osprey, even after the Corps' own proud reputation was tarnished by a national scandal over accusations that a commander

had ordered subordinates to lie about the aircraft's problems. Based on in-depth research and hundreds of interviews, *The Dream Machine* recounts the Marines' quarter-century struggle to get the Osprey into combat. Whittle takes the reader from the halls of the Pentagon and Congress to the war zone of Iraq, from the engineer's drafting table to the cockpits of the civilian and Marine pilots who risked their lives flying the Osprey—and sometimes lost them. He reveals the methods, motives, and obsessions of those who designed, sold, bought, flew, and fought for the tiltrotor. These stories, including never before published eyewitness accounts of the crashes that made the Osprey notorious, not only chronicle an extraordinary chapter in Marine Corps history, but also provide a fascinating look at a machine that could still revolutionize air travel.
