

Hughes Aim 4g Super Falcon

John William Ransom Taylor

Convair Martyn Chorlton,2018-07-15 A fascinating, lavishly illustrated look at an iconic aircraft manufacturer of the Convair aircraft.

A Compendium of Armaments and Military Hardware (Routledge Revivals) Christopher Chant,2014-06-03 First published in 1987, The Compendium of Armaments and Military Hardware provides, within a single volume, the salient technical and operational details of the most important weapons. The complete range of hardware used in land, sea and air forces throughout the world at the time of publication is covered, from tanks to rocket systems, helicopters to cruise missiles, alongside full details of size, weight and operational range. The book's main strength lies in the detail it gives of armament and associated ammunition capabilities, and of the sensors and other electronics required for the weapons to be used effectively. A key title amongst Routledge reference reissues, Christopher Chant's important work will be of great value to students and professionals requiring a comprehensive and accessible reference guide, as well as to weapons 'buffs'.

Supersonic Eagles W. D. Becker,2012 Following the Second World War, major advancements in aviation technology allowed the development of jet aircraft with capabilities undreamt of only a few years earlier. During the 1950s, the US Air Force placed six new jet fighters into service, which became known as the Century Series Fighters. In this publication the histories of the F-100 Super Sabre, F-101 Voodoo, F-102 Delta Dagger, F-104 Starfighter, F-105 Thunderchief, and the F-106 Delta Dart are related.
