**The Human Cannonball** Halli Villegas,2005-01-01

**On the Trail of the Last Human Cannonball** Byron Rogers,2013-03-14 From “a great journalist of the older school,” travel essays chronicling the author’s search for incredible stories about extraordinary people (The Guardian). Byron Rogers’ latest collection of travel pieces follows the winning formula of his previous book, *An Audience with an Elephant*, as he goes in search of a remarkable array of quirky, whimsical, and singular individuals. But in addition to meeting a pensioner on a holiday who decided to swim across the Amazon, this book sees Rogers meeting a number of undeniably famous people. But as one might expect, Rogers’ encounters with celebrity have their own unexpected outcomes. Burt Lancaster rants to him about transsexuality, Rita Hayworth is most worried about her neighbor’s TV aerial, and a retired star of the silent screen turns out to live in Henley-on-Thames. “It is with the delicacy and determination of an archaeologist—and the wit of a publican and far-sightedness of a dreamer—that Rogers excavates people and places.” —Daily Telegraph “A wonderful writer. Droll, poignant and dreamy.” —New Statesman

*Extraordinary Jobs in Leisure* Alecia T. Devantier,Carol A. Turkington,2006 Ever wonder who wrangles the animals during a movie shoot? What it takes to be a brewmaster? How that play-by-play announcer got his job? What it is like to be a secret shopper? The new.

The Human Cannonball's Last Thought J. Thomas Sparough,2013-10 This collection of more than two dozen, funny, circus poems is hilariously illustrated. There is a laugh on these pages for everyone, from toddler to grandparent and everyone in between. And yet the collection is more than funny. It is easy to fall in love with the characters and animals on these pages. Sparough's clever, and often surprising, poems are matched beautifully with Griffin's intricate, tender and sometimes outrageous images. This writer-illustrator pair has created a circus world, which crowds of people will go back to time and time again.

**Complex Numbers and Vectors** Les Evans,2006 *Complex Numbers and Vectors* draws on the power of intrigue and uses appealing applications from navigation, global positioning systems, earthquakes, circus acts and stories from mathematical history to explain the mathematics of vectors and the discoveries of complex numbers. The text includes historical and background material, discussion of key concepts, skills and processes, commentary on teaching and learning approaches, comprehensive illustrative examples with related tables, graphs and diagrams throughout, references for each chapter (text and web-based), student activities and sample solution notes, and an extensive bibliography.

**Human Cannon** Edward Bond,1985 The struggle against Fascism in Spain through the stories of the village community of Estarobon.

*Human Cannon* Edward Bond,1989

The Show Won't Go On Jeff Abraham,Burt Kearns,2019-09-03 There has never been a show business book quite like *The Show Won't Go On*, the first comprehensive study of a bizarre phenomenon: performers who died onstage. From the comedy magician who dropped dead on live television to the amateur thespian who expired during a play called *The Art of Murder*, the book is a celebration of lives both famous and obscure, as well as a dramatic and accurate recounting of events leading to the moments they died doing what they loved. *The Show Won't Go On* covers almost every genre of entertainment and is full of unearthed anecdotes, exclusive interviews, colorful characters, and ironic twists. With dozens of heart-stopping stories, it's the perfect book to dip into on any page.

**Hands-On Science Mysteries for Grades 3 - 6** James Robert Taris,Louis James Taris,2006-08-18 In *Hands-On Science Mysteries for Grades 3-6*, the authors connect science to real-world situations by investigating actual mysteries and phenomena, such as the strange heads on Easter Island, the ghost ship *Mary Celeste*, and the “Dancing Stones” of Death Valley. The labs are designed to encourage the development of science inquiry, in which students will observe, take notes, make diagrams, interpret data, and arrive at solutions, and include extensions for further investigation.

Obligations of the Harp Arthur Saltzman,2009-07-20 There is never a dull phrase in Arthur Saltzman's OBLIGATION01 General/trade OF THE HARP, his fourth book of essays. The writing in these twenty-five pieces is by turns wry and satirical, sensually descriptive, playfully punning-but always nuanced and illuminating. Reference points range from Kobe Bryant to John Updike, from geology to Jewish ritual.

**Physics Notes: Physical Quantities and Motion** Daniel Wilson,2020-09-14 Welcome to Physics Notes: Physical Quantities and Motion. This book is the first in a series of books that when combined will cover all physics subject areas at pre-university standard. This book covers the topics that are absolutely fundamental to all areas of physics: physical quantities, units of measurement (Système International, SI), vectors and vector addition.

Motion is a really good context for consolidating those fundamental concepts. Motion quantities (distance, speed, displacement, velocity and acceleration) are defined and explained. Graphs of motion introduce graphical analysis. Projectile motion introduces motion in two dimensions. The link between acceleration and force is explained leading eventually to an introduction to more complex types of motion involving drag and terminal velocity.
