Give meaning to your life. Help you connect to the One omnipotent power in the Universe. Let go of hate, anger, anxiety, depression. Understand your thoughts.

On God's Path: The Unfolding Story of Humanity

S. Craig George, 2010-06-25 On God's Path: The Unfolding Story of Humanity is an optimistic, realistic and pious view of humanity's role on the stage of creation. In this generation a variety of competing stories have been told to explain where we came from and where we are going, each story told with sincere conviction. These stories seem to turn on two centers: science and religion and they are often placed in opposition. The theme of this book is that the truths of science and religion need not be viewed as mutually exclusive, but complementary in the big picture. With significant advances in both science and theology in the recent past we have much more information to attempt to incorporate in humanity's story than ever before. More dots to connect give us a better chance of bringing into focus a much larger and more inclusive picture of where we came from and where we may be going. The story of humanity, as presented in this book, begins with the first moment of the cosmos and traces the rise of the human physically, socially and morally. It engages the reader to consider humanity's trajectory. With a Christian perspective respectful of all faiths, the author weaves the human religious impulse and the Spirit of Christ together brightly into the

tapestry of Creation. Written with the lay reader in mind, *On God's Path* presents a wide spectrum of mainstream contemporary scientific and theological ideas in surprisingly straightforward and creative ways. Part of the author's objective in this book is to challenge readers to expand their thinking about God and science and to reconsider their own roles in advancing the human story.

Fuzzy inference system-assisted human-aware navigation framework based on enhanced potential field Shurendher Kumar Sampathkumar, Daegyun Choi, Donghoon Kim, 2024-01-13 With the advent of Autonomous Mobile Robots (AMRs) in public areas such as malls and airports, their harmonious coexistence with humans is crucial. AMRs must operate in a manner that ensures human safety, comfort, and acceptability to reduce stress. This is called Human Aware Navigation. This study introduces a framework for AMR navigation that prioritizes safety and human comfort in such environments, utilizing an enhanced Potential Field approach augmented by Fuzzy Inference Systems. To achieve a smooth AMR trajectory, the framework employs these systems based on AMR, human, and obstacle information. The proposed approach is tested across various scenarios, including complex, cluttered environments that mimic practical situations. Simulation results demonstrate that AMRs using the proposed method navigate human-rich environments safely and comfortably while mitigating common issues associated with Potential Field-based approaches, such as local minima and obstacles near the goal.

Dr. Seaward includes many behavioral suggestions to enhance the health of the human spirit. He presents the material in an approachable, user-friendly manner by engaging the reader and carefully distinguishing the differences between spirituality and religion.

Dark Energy and Human Consciousness Tom Cahalan, 2014-07-22 Nobody knows how life was first

breathed into the first atom, molecule, or cell; all biologists can do is to suggest the most reasonable possibilities by analysing the oldest DNA available. Scientists postulate that life emerged from non-life via natural processes about 3.7 billion years ago. It then evolved (and continues to evolve) to higher levels of complexity based on mutation, natural selection, and time. In other words, scientists believe that life is purely a physical phenomenon. There are logical arguments, based on scientific concepts, suggesting that dark energy is a non-physical force that influences life and is the source of reason, intelligence, compassion, and love. If we acknowledge and nurture this non-physical (dark energy) aspect of our beings, it will bring balance to our minds and move us from selfishness to love, care, and compassion. Is this the path to freedom from selfishness, corruption, abuse of power, and greed; and consequently from poverty, starvation, conflict and war?

Critical Path R. Buckminster Fuller, 1982-02-15
The masterwork of a brilliant career, and an important document of the crisis now facing mankind. Today we find ourselves in the midst of the greatest crisis in the history of the human race. Technology has placed in our hands almost unlimited power at the very moment when we have run up against the limits of our resources aboard Spaceship Earth, as the crises of the late twentieth century—political, economic, environmental, and ethical—determine whether or not humanity survives. In this masterful summing up of an entire lifetime's thought and concern, R. Buckminster Fuller addresses these crucial issues in his most significant, accessible, and urgent work. Critical Path traces the origins and evolution of humanity's social, political, and economic systems from the obscure mists of prehistory, through the development of the great

political empires, to the vast international corporate and political systems that control our destiny today to show how we got to our present situation and what options are available to man. With his customary brilliance, extraordinary energy, and unlimited devotion, Bucky Fuller shows how mankind can survive, and how each individual can respond to the unprecedented threat we face today. The crowning achievement of an extraordinary career, *Critical Path* offers the reader the excitement of understanding the essential dilemmas of our time and how responsible citizens can rise to meet this ultimate challenge to our future.

Humanity First! Heli Santavuori, 2021-06-22 We are living in the era of the unification of humankind. Humanity will survive or perish together. So far, self-destruction seems more likely than survival. What is the reason for the self-destructiveness of the human species? This is the crucial question of our time. Finding an answer to this question is the most important ethical and intellectual challenge of our era. Humankind can survive only by building its internal relationships on the basis of self-knowledge. Only in this way we can live in harmony with nature. Our sole survival strategy is the knowledge of human history and human nature. This program pamphlet contains a new and original view of the world today: the change of era, the crisis of democracy, and how we can see features of the future global society already in the present. Humankind ought to come together to study and discuss the basic teachings of our history. To that end, this program provides some practical suggestions. The program relies on the lifework of the Finnish philosopher Matti Puolakka. It makes use of his text archive, notes and speeches, which he left to the New History Association for safekeeping, editing and publication. A short presentation of Puolakka's lifework and a summary of his view of the entire history, i.e. the 2.5-million-year journey of the Homo family, are attached. The program is available also on the web site of the New History Association:
