The Better Angels of Our Nature Steven Pinker, 2012-09-25

Faced with the ceaseless stream of news about war, crime, and terrorism, one could easily think this is the most violent age ever seen. Yet as bestselling author Pinker shows in this startling and engaging new work, just the opposite is true.

SUMMARY - The Better Angels Of Our Nature: Why Violence Has Declined By Steven Pinker Shortcut

Edition, 2021-05-31 * Our summary is short, simple and pragmatic. It allows you to have the essential ideas of a big book in less than 30 minutes. *By reading this summary, you will discover why and how violence has followed a downward trajectory over the centuries. As surprising as it may seem, our era is indeed the least violent period that humanity has known. *You will also discover that : human history has been marked by extreme violence; the decline of violence is real in all its aspects, from wars to homicides to the treatment of minorities; the progress of human societies is notably linked to the development of states, trade and civilization; the human being is made up of a set of violent and pacifying tendencies that his environment more or less allows him to develop. *Violence seems to be omnipresent today and it is difficult to admit that violent acts are on the decline. Yet this is indeed the case: we are experiencing a unique period of world peace, and the risks of suffering aggression have never been so low. Our level of tolerance has evolved accordingly, and the violence that is still present strikes us and leaves its mark on people's minds. Throughout history, human beings have made immense progress in their relationship to violence. *Buy now the summary of this book for the modest price of a cup of coffee!

Shaping the Developing World Andy Baker, 2021-01-07

Why are some countries rich and others poor? Colonialism, globalization, bad government, gender inequality, geography, and environmental degradation are just some of the potential answers to this complex question. Using a threefold framework of the West,

the South, and the natural world, *Shaping the Developing World* provides a logical and intuitive structure for categorizing and evaluating the causes of underdevelopment. This interdisciplinary book also describes the social, political, and economic aspects of development and is relevant to students in political science, international studies, geography, sociology, economics, gender studies, and anthropology. The Second Edition has been updated to include the most recent development statistics and to incorporate new research on topics like climate change, democratization, religion and prosperity, the resource curse, and more. This second edition also contains expanded discussions of gender, financial inclusion, crime and police killings, and the Middle East, including the Syrian Civil War.

Public Relations, Cooperation, and Justice Charles

Marsh, 2017-04-21 Modern approaches to public relations cluster into three camps along a continuum: conflict-oriented egoism, e.g. forms of contingency theory that focus almost exclusively on the wellbeing of an entity; redressed egoism, e.g. subsidies to redress PR's egoistic nature; and forms of self-interested cooperation, e.g. fully functioning society theory. *Public Relations, Cooperation, and Justice* draws upon interdisciplinary research from evolutionary biology, philosophy, and rhetoric to establish that relationships built on cooperation and justice are more productive than those built on conflict and egoistic competition. Just as important, this innovative book shuns normative, utopian appeals, offering instead only empirical, materialistic evidence for its conclusions. This is a powerful, multidisciplinary, and well-documented analysis, including specific strategies for the enactment of PR as a quest for cooperation and justice, which aligns the discipline of public relations with basic human nature. It will be of interest to scholars and advanced students of public relations and communication ethics.

Pragmatic Nonviolence: Working toward a Better World

Andrew Fitz-Gibbon, 2020-12-29 Drawing on the philosophy of

nonviolence, the American pragmatist tradition, and recent empirical research, Pragmatic Nonviolence demonstrates that, rather than being merely theoretical, nonviolence is a truly practical approach toward personal and community well-being.

Gangri Langtso (The college journal) 2015 [Men-Tsee-Khang-ཀམ་ཐུ་བཟུང་མཆོག་] English Editorial Board,2015-03-23

EDITOR'S NOTE - 'If you think you are too small to make a difference try sleeping with a mosquito.' - H.H.The 14th Dalai Lama With these words let's try to make a difference by contributing little by little to make a better world and to offer our best in our college's magazine. After a long hiatus we finally present our Gangri-Langtso 2015. This edition we are offering is a special edition.This year we are dedicating our magazine to our Kind and Compassionate spiritual leader H.H.The Dalai Lama in honour of his grand 80th birthday. We are including some of his inspiring quotes which illuminate like a light in the darkness and articles to offer our gratitude to him. Our magazine is a mix of updates, creative expressions and talented work of the students. As student editors, our time has been a period of joy, learning, satisfaction and accomplishment combined with the challenge of creating a good book. These beautiful memories will last forever and they are truly meaningful and worth holding onto. We have experienced self growth alongside the development of this magazine. We thoroughly enjoyed editing, collecting and putting together the articles here. One can see the laughter, joy and struggle of students from this institution in the pictures. This year we are privileged to have had great opportunity to learn the knowledge based on Buddhism, during a two day programme by H.E. Tromthok rinpoche. Medical students studied anatomy and physiology and diagnosis by doctors from Emory University and astro.students studied introduction to astrophysics from Sir Sidhu la. We also marked the success of the 2nd International Body, Mind and Life Conference which was started with the blessing of

His Holiness the 14th Dalai ma. This year's greatest achievement was the visit of the honourable Health Minister of Himachal Pradesh on our institute's founding anniversary. It's been a wonderful experience to work alongside a team of great minds and wonderful personalities and this magazine would not have been possible without the commitment, creativity and hardwork from all the members of the editorial team headed by our dignified advisors Dr Namdol Lhamo, Dr Pema Tsetso and TASP Tenzin Loden who has always guided us at every step of the way, with ever lasting patience and constant encouragement. Our sincere gratitude goes to our beloved advisors for their persistent support and guidance. A magazine or any kind of work is a product of a team work. From the director who provided us the opportunity and administrator with the financial support and students for the essays and advisors and editors to the printing press. These all contribute to our magazine and for which we are truly grateful. I would like to thank our friends for their creative articles which serves as the heart of the magazine. The magazine usually serve as a memento as we can carry it with us as we move on to our different chapters of our lives. We hope that this magazine will hold a treasured and cherished place by our readers. Tenzin Saldon 19th medical batch Editor

Summary of Sapiens: A Brief History of Humankind by Yuval Noah Harari Peter Cuomo, 2021-10-25 Complete summary of Yuval Noah Harari's book Sapiens A genetic mutation 70,000 years ago gave humans (Homo sapiens) the ability to imagine and believe things that aren't true, which, Harari argues, had a profound impact on humanity's ability to cooperate in large groups. The Cognitive Revolution is one of the key turning points in human history that Harari examines in great detail. There are also references to the Agricultural Revolution (10,000 years ago) and the Industrial Revolution (300 years ago), both of which saw humanity migrate from foraging in the wild to farming in more permanent communities.

Manga Cultures and the Female Gaze Kathryn

Hemmann,2020-03-31 The female gaze is used by writers and readers to examine narratives from a perspective that sees women as subjects instead of objects, and the application of a female gaze to male-dominated discourses can open new avenues of interpretation. This book explores how female manga artists have encouraged the female gaze within their work and how female readers have challenged the male gaze pervasive in many forms of popular media. Each of the chapters offers a close reading of influential manga and fancomics to illustrate the female gaze as a mode of resistant reading and creative empowerment. By employing a female gaze, professional and amateur creators are able to shape and interpret texts in a manner that emphasizes the role of female characters while challenging and reconfiguring gendered themes and issues.

Methods for the Study of Literature as Cultural Memory, 2022-06-08 In this volume collaborators from different universities all over the world explore a wide variety of methods for the study of literature as cultural memory. In literature, the past may be (re)constructed in various ways and in very diverse forms. This immediately raises the question as to how one can describe and inventory the various discourses and metadiscourses of historical representation. In what sense can the rhetoric of literary historiography itself contribute to literature's function as cultural memory? Which methods of analysis are most appropriate for describing specific text types or genres as cultural memory? What have been the pragmatic uses and the ethical merits of the stability and continuity that literature has often provided for European, American, Asian and African cultures? What are the

dilemmas they create for our teaching at the end of the twentieth century? To all these questions, a wide range of scholars here tries to find answers. In thorough and highly original contributions, they not only address theoretical problems, but also engage themselves in practical analyses of specific works.

Ecosystems of California Harold Mooney, Erika

Zavaleta, 2016-01-19 This long-anticipated reference and sourcebook for California's remarkable ecological abundance provides an integrated assessment of each major ecosystem type's distribution, structure, function, and management. A comprehensive synthesis of our knowledge about this biologically diverse state, *Ecosystems of California* covers the state from oceans to mountaintops using multiple lenses: past and present, flora and fauna, aquatic and terrestrial, natural and managed. Each chapter evaluates natural processes for a specific ecosystem, describes drivers of change, and discusses how that ecosystem may be altered in the future. This book also explores the drivers of California's ecological patterns and the history of the state's various ecosystems, outlining how the challenges of climate change and invasive species and opportunities for regulation and stewardship could potentially affect the state's ecosystems. The text explicitly incorporates both human impacts and conservation and restoration efforts and shows how ecosystems support human well-being. Edited by two esteemed ecosystem ecologists and with overviews by leading experts on each ecosystem, this definitive work will be indispensable for natural resource management and conservation professionals as well as for undergraduate or graduate students of California's environment and curious naturalists.

The "New Man" in Radical Right Ideology and Practice, 1919-45

Matthew Feldman,Jorge Dagnino,Paul Stocker,2018-01-25 Bringing together an expert group of established and emerging scholars, this book analyses the pervasive myth of the 'new man' in various fascist movements and far-right regimes between 1919 and 1945. Through a series of ground-breaking case studies focusing on countries in Europe, but with additional chapters on Argentina, Brazil and Japan, *The New Man in Radical Right Ideology and Practice, 1919-45* argues that what many national forms of far-right politics understood at the time as a so-called 'anthropological revolution' is essential to understanding this ideology's bio-political, often revolutionary dynamics. It explores how these movements promoted the creation of a new, ideal human, what this ideal looked like and what this things tell us about fascism's emergence in the 20th century. The years after World War One saw the rise of regimes and movements professing totalitarian aims. In the case of revolutionary, radical-right movements, these totalising goals extended to changing the very nature of humanity through modern science, propaganda and conquest. At its most extreme, one of the key aims of fascism – the most extreme manifestation of radical right politics between the wars – was to create a 'new man'. Naturally, this manifested itself in different ways in varying national contexts and this volume explores these manifestations in order to better comprehend early 20th-century fascism both within national boundaries and in a broader, transnational context.
