Survival Knives James Morgan Ayres, 2018-11-20 Some survival guides explain the basics of how to make primitive tools. But do you know how to actually successful hunt with spear, throwing stick, bola, or primitive bow? Making tools that you do not know how to hunt with will not get you to meat. If you're hunting with primitive weapons, especially crude survival weapons you've made in the field under actual survival conditions, you must adapt your strategy to the weapons available or go hungry. Author James M. Ayres grew up in the Midwest hunting squirrels, rabbits, and other small game with bows, spears, atlatls, and bolas he made myself. He has hunted with bow, spear, net, and other primitive weapons with the Lacandon in Yucatán, the Igorots in the Philippines, the K'iche' in Guatemala, the Sasak in Indonesia, and others. In Survival Knives, he shares his knowledge so you, too, can survive using such tools and weapons. It's not enough to have a knife and know how to make basic hunting weapons. That's craftsmanship—not survival. Nor is it enough simply to have a knife when trapped in an emergency situation, like a collapsed building. You need to know how to conserve your knife and use it properly to escape so that it will not break and you are not injured. Learn how to use survival knives, and how to use the tools and weapons you can make with the knife—not only in wilderness, but also in urban areas, foreign countries, and disaster zones such as earthquakes, floods, fires, and civil insurrections.

The Knife Man Wendy Moore,2007-12-18 The vivid, often gruesome portrait of the 18th-century pioneering surgeon and father of modern medicine, John Hunter. When Robert Louis Stevenson wrote his gothic horror story of Dr. Jekyll and Mr. Hyde, he based the house of the genial doctor-turned-fiend on the home of John Hunter. The choice was understandable, for Hunter was both widely acclaimed and greatly feared. From humble origins, John Hunter rose to become the most famous anatomist and surgeon of the eighteenth century. In an age when operations were crude, extremely painful, and often fatal, he rejected medieval traditions to forge a revolution in surgery founded on pioneering scientific experiments. Using the knowledge he gained from countless human dissections, Hunter worked to improve medical care for both the poorest and the best-known figures of the era—including Sir Joshua Reynolds and the young Lord Byron. An insatiable student of all life-forms, Hunter was also an expert naturalist. He kept exotic creatures in his country menagerie and dissected the first animals brought back by Captain Cook from Australia. Ultimately his research led him to expound highly controversial views on the age of the earth, as well as equally heretical beliefs on the origins of life more than sixty years before Darwin published his famous theory. Although a central figure of the Enlightenment, Hunter's tireless quest for human corpses immersed him deep in the sinister world of body snatching. He paid exorbitant sums for stolen cadavers and even plotted successfully to steal the body of Charles Byrne, famous in his day as the "Irish giant." In

The Knife Man, Wendy Moore unveils John Hunter's murky and macabre world—a world characterized by public hangings, secret expeditions to dank churchyards, and gruesome human dissections in pungent attic rooms. This is a fascinating portrait of a remarkable pioneer and his determined struggle to haul surgery out of the realms of meaningless superstitious ritual and into the dawn of modern medicine.
