Dictionary of Electronics , 2012-12-06 The special interest in electronics all over the world is due to its decisive role in the scientific and technical progress now taking place in all fields of modern technology. Electronics also plays a decisive role in the development of science, providing as it does the technical basis for various scientific experiments. The role of electronics in the development of the world's culture also deserves a special mention. That is why it is hoped that the English-German French-Dutch-Russian Dictionary of Electronics, which contains some 9.000 entries and is jointly published by Kluwer Technische Boeken, B.V. (Deventer, Holland) and Ruski Yazyk Publishers (Moscow, USSR) will be favourably received. In accordance with existing international tradition, the term «electronics» covers several fields known in Soviet classification as electronics proper, radio engineering, and wire communication. The entries included in this dictionary have been selected in accordance with the international understanding of the term «electronics». One of the main difficulties encountered by the compilers was that although according to some calculations the number of terms used in special literature on electronics exceeds 50.000, the vocabulary of the dictionary had to be restricted to only 9.000 entries. Therefore this dictionary cannot claim to be comprehensive. Its purpose is to enable a wide range of specialists in various countries to find the English, German, French, Dutch, or Russian equivalents of the principal and most up-to-date terms in the field of electronics. Most attention has been paid to quantum electronics, fibre optics, optoelectronics, integrated circuit technology, radiolocation and radionavigation, pulse technique, holography, etc.

Routledge Handbook of Transnational Terrorism Nicolas Stockhammer, 2023-08-17 This handbook provides contributions by some of the world-leading experts in the field on recent phenomena and trends in transnational terrorism. Based on the methodological approach of a trend-and-key factor analysis of transnational terrorism and processed on the virtual platform Foresight Strategy Cockpit (FSC), the volume seeks to examine what potential future variants of transnational terrorism may evolve. Focusing on the latest structural developments in the sphere of politically or religiously motivated violence, the handbook considers the tactical, strategic, and not least the systemic dimension of terrorism. Divided into seven thematic sections, the handbook's contributions cover a wide range of issues, dealing among others with strategic and hybrid terrorism, the systemic dimension of extremist violence, prevalent actors, counter-narratives, the crime terror-nexus, the role of digitalization and the spiral dynamic between Islamist and right-wing terrorism. The expert contributions provide a condensed overview of current developments, structural linkages and important academic debates centering around transnational salafi-jihadi terrorism, but also right-wing terrorism and counter-terrorism. A key objective of the work is to make the effects of prevention/preemption, (de-) radicalization and (non-) intervention both transparent and assessable. As such, it contributes well-founded strategies, feasible solutions and options for policy-makers and counter-terrorism experts. This volume will be of great interest to students of terrorism and counter-terrorism, political violence and security studies.

Cut Place Extend : Berliner Ring Borrego, Ignacio, Barrera, Gabriela, Vranjakovic, Mirza, 2018-03-15 CoLab is a Collaborative Design Laboratory. Its goal is to investigate those transfers which shall exist between design strategies and new design processes employed in contemporary industry, to apply to the design practice and architectural representation, employing a collaboration model based on collective work. During this semester CoLab students had to project a continuous building along an existing transport infrastructure, the S-Bahn-Ring in Berlin. Each group had to design a slice of a common 37 km-long project. CoLab ist ein gemeinschaftliches Design-Labor, dessen Ziel es ist, jene Schnittstellen zu untersuchen, die zwischen Entwurfsstrategien und neuen Gestaltungsprozessen in der zeitgenössischen Industrie existieren, um in der Gestaltungspraxis und architektonischen Repräsentation ein auf kollektivem Arbeiten basierendes Modell anzuwenden. Ziel des dokumentierten Bachelormoduls war es, ein durchgehendes Gebäude entlang einer real existierenden Infrastruktur, dem S-Bahn-Ring in Berlin, zu entwerfen. Hierzu sollte jede Gruppe ein Stück des gemeinsamen 37 km langen Projektes entwickeln.
