Woleaian-English Dictionary Ho-min Sohn, Anthony F. Tawerilmang, 2019-03-31 This was the first dictionary compiled for the language spoken on Woleai Atoll in the Caroline Islands. The dictionary contains some 6,200 Woleaian entries and an English-Woleaian finder list of about 4,000 entries. The Woleaian entries are based on an alphabetic system of orthography developed by the authors. Each entry also contains, where appropriate, the following parts: loan source, alternant forms, part of speech or word-class, grammatical notes, definitions, phrase examples, sentence examples, synonyms, antonyms, and cross-references.

The Fukushima Dai-Ichi Accident Peter Bernard Ladkin, Christoph Goeker, Bernd Sieker, 2013 In March 2011, following a strong earthquake, a tsunami rolled over the protective seawall of the Fukushima Dai-Ichi nuclear power plant in Japan and flooded it. The cooling systems were taken out, following a scenario described by a sociologist four years previously. How is it that a sociologist predicted an accident mechanism that engineers had somehow missed? System safety engineers and sociologists gathered together in Bielefeld, Germany, in August 2011, to discuss this and other phenomena. This book is the result of that gathering. *** The authors of the chapters in this book are truly outstanding scholars, whose expertise, intellectual prowess, and wisdom about disasters such as that which occurred at Fukushima cannot be questioned. -- Journal of Sociology & Social Welfare, September 2014 (Series:

Practices of the Sentimental Imagination

Jonathan Zwicker, 2020-03-23 The history of the book in nineteenth-century Japan follows an uneven course that resists the simple chronology often used to mark the divide between premodern and modern literary history. By examining the obscured histories of publication, circulation, and reception of widely consumed literary works from late Edo to the early Meiji period, Jonathan Zwicker traces a genealogy of the literary field across a long nineteenth century: one that stresses continuities between the generic conventions of early modern fiction and the modern novel. In the literature of sentiment Zwicker locates a tear-streaked lens through which to view literary practices and readerly expectations that evolved across the century. Practices of the Sentimental Imagination emphasizes both qualitative and quantitative aspects of literary production and consumption, balancing close readings of canonical and noncanonical texts, sophisticated applications of critical theory, and careful archival research into the holdings of nineteenth-century lending libraries and private collections. By exploring the relationships between and among Japanese literary works and texts from late imperial China, Europe, and America, Zwicker also situates the Japanese novel within a larger literary history of the novel across the global nineteenth century.

Bloody Mary, Vol. 8 Akaza Samamiya, 2017-09-05

Unable to bear the shocking truth that Maria reveals to him, Mary loses consciousness and disappears inside of himself, which allows "Mary" to surface to take his place. "Mary" heads out alone, while Maria, along with Shinobu and Hydra, confront a trio of vampires. Bathed in blood, "Mary" gradually succumbs to madness... -- VIZ Media

Calcareous Algae and Stromatolites Robert

Riding,2012-12-06 This volume provides a comprehensive overview of calcareous algae and stromatolites. It contains reviews by leading specialists of major groups, together with accounts of floras through time. It deals with marine and non-marine, benthic and planktic, and modern as well as ancient examples. As the first multi-authored review of the field ever published in English, it is an essential reference text for this complex field. It is designed for both postgraduate researchers and professional scientists who require up-to-date and authoritative information on these long-ranging organisms and fabrics which are of wide evolutionary, environmental and sedimentary significance.

Stem Cells Thomas C.G. Bosch,2008-04-03 Much of our knowledge of stem cells has been inferred from studies of remarkable few species. The ability to manipulate stem cells in “model” organisms such as the mouse and a few other vertebrate species has driven our understanding of basic biology of stem cells. The power and efficiency of studying model organisms, however, comes at a cost since a few species, obviously, do not reflect nature’s true diversity. Unfortunately, although all multicellular organisms seem to rely on stem cells, and although this seems to be a question of key importance for understanding the evolution of animal life, little is known about stem cells in early-branching taxa. “Stem Cells: From Hydra to

Man" illustrates that there is more than human and mouse stem cells to learn from. Reflecting an enormous growth in the knowledge of stem cells in various organisms, the book presents the conceptual language and the nature of questions, as well as a summary of the advances in our understanding of stem cells from a comparative point of view that has resulted from the development of new technology and the development of novel model organisms over the past few decades. As such this book is largely a horizon analysis of a frontier rather than a retrospective. It presents an integrative approach to animal stem cells and covers the major contributions, tools and trends in a newly emerging field: comparative stem cell biology.

International Catalogue of Scientific Literature, 1909

The Zoological Record, 1909 Indexes the world's zoological and animal science literature, covering all research from biochemistry to veterinary medicine. The database provides a collection of references from over 4,500 international serial publications, plus books, meetings, reviews and other non-serial literature from over 100 countries. It is the oldest continuing database of animal biology, indexing literature published from 1864 to the present. Zoological Record has long been recognized as the unofficial register for taxonomy and systematics, but other topics in animal biology are also covered.
