Landing Together Kathleen H. Hicks, Mark F. Cancian, Andrew Metrick, John Schaus, 2016-07-26 This study examines ally- and partner-nation investments in amphibious capabilities, how those capabilities will impact demand for U.S. forces, and the range of U.S. amphibious fleet composites to meet the changing demand.

Arming Asia Richard Bitzinger, 2016-12-19 Bitzinger examines the phenomenon of attempted self-reliance in arms production within Asia, and assesses the extent of success in balancing this independence with the growing requirements of next-generation weapons systems. He analyzes China, India, Japan, South Korea, and Southeast Asia. The overarching question in the book is whether self-reliance is a strategically viable solution for development and manufacturing of arms. Given the ever-changing dynamics and increasing demand for sophisticated next-generation weaponry, will these countries be able to individually sustain their domestic defense industries and constantly update their technologies? This is the first book to analyze arms production from a regional perspective.

Strategic Asia 2010-11: Asia's Rising Power and America's Continued Purpose Ashley J. Tellis, Andrew Marble, Travis Tanner, 2010-09-29 Strategic Asia 2010-11: Asia's Rising Power and America's Continued Purpose marks the tenth anniversary edition of NBR's Strategic Asia series and takes stock of the Strategic Asia region by providing an integrated perspective on the major issues that influence stability in the region. In this volume, leading experts examine Asia's performance in nine key functional areas to provide a continent-wide net assessment of the core trends and issues affecting the region.

Arms Control [2 volumes] Robert E. Williams Jr., Paul R. Viotti, 2012-05-15 Set against a backdrop of terrorism, rogue states, non-conventional warfare, and deteriorating diplomacy, this encyclopedia offers a comprehensive, multidisciplinary, up-to-date reference on the recent history and contemporary practice of arms control and nonproliferation. Arms Control: History, Theory, and Policy features in-depth, expert analysis and information on the full spectrum of issues relating to this critical topic. The first major reference on arms control in over a decade, the two-volume set covers historical context, contemporary challenges, and emerging approaches to diplomacy and human rights. Noted experts provide a full spectrum of perspectives on arms control, offering insightful analysis of arms-control agreements and the people and institutions behind them. Volume 1 provides an accessible historical overview of the subject and a more detailed conceptual analysis of the foundations of arms control. Volume 2 covers the contemporary and practical issues of arms control, focusing on global issues that arms control advocates have been forced to address with varying degrees of success: a burgeoning international trade in conventional weapons; a closely related flood of small arms and light weapons used to fuel intrastate conflicts and even genocide; and the spread of nuclear weapons to potentially unstable regions of the world.

Catapult Aircraft Leo Marriott, 2006-09-21 During World War I, the navies of the opposing forces discovered the value of aerial reconnaissance and many experiments were made to allow larger warships to carry one or sometimes two aircraft aboard. In the early days these were float planes that were lowered by crane into the sea and then lifted back aboard upon their return. This was a lengthy affair and when a speedy departure was necessary, time was of the essence. A new system was devised so that a powerful catapult system and a short ramp could, with the added speed of the ship, get an aircraft airborne in a fraction of the time previously required. Thus was born a highly specialised type of aircraft. This book includes all the major designs that went to war in the First and Second World Wars and includes aircraft used by all the combatants. It looks at how the aircraft evolved and how the warships were modified to accommodate the aircraft and the catapult system. The use of these fixed-wing aircraft was abandoned when the invention of the helicopter was made in the early post WW II years.

Seaforth World Naval Review 2014 Conrad Waters, 2013-11-07 Since its launch in 2009 this annual has rapidly established a reputation as an authoritative but affordable summary of all that has happened in the naval world in the previous twelve months. It combines the standing features of regional surveys with one-off major articles on noteworthy new ships and other important developments. Besides the latest warship projects, it also looks at wider issues of importance to navies, such as aviation and electronics, and calls on expertise from around the globe to give a balanced picture of what is going on and to interpret its significance. Special features for this year include a survey of current and future torpedo developments, an in-depth study of the Royal New Zealand Navy, a look at how the Royal Navy is coping after the Strategic Defense and Security Review, plus analyses of significant new warship classes: the Japanese Hyuga class DHH concept, the USNS Spearhead Joint High-Speed Vessels, Danish Iver Huitfeldt class frigates, and German AIP technology as demonstrated in the recent Type 212A submarines. For anyone with an interest in contemporary naval affairs, whether an enthusiast or a defence professional, this annual has become required reading.

China's Military Modernization, Japan's Normalization and the South China Sea Territorial Disputes Zenel Garcia, 2019-03-21 This book assesses the Sino-Japanese strategic competition in the context of the South China Sea (SCS) territorial disputes. The South China Sea territorial disputes are quickly becoming the most significant security problem in East and Southeast Asia. Two major powers, China and Japan, have interests in the region and are pursuing different strategies that can significantly impact the outcome of the disputes. Utilizing Securitization Theory, this study evaluates the Sino-Japanese strategic competition through political narratives that galvanize the military and economic policies that are transforming the region. It highlights how these narratives, so closely bounded to the political legitimacy of current governments and supported by provocative policies, have resulted in a co-constitutive pattern of enmity and securitization, thus making it increasingly difficult to resolve the disputes.

Japanese Battleships 1897-1945 R A Burt, 2015-06-26 This photographic archive contains some 125 stunning images of the battleships of the Imperial Japanese Navy, many unfamiliar, some very rare. They constitute an archive that is pretty much without equal in publications in the West. The period covered is from the launch of Japan's first real contemporary battleship, Yashima, built by Armstrong's on the Tyne, up to the final destruction of her fleet in the Pacific in 1945. During that time Japan built up the third largest navy in the world and, before the First World War, it was Britain that armed her at sea. All her dreadnoughts saw action in the Second World War, and of all these numerous ships only Nagato survived the conflict. She was to become a target in the Bikini A-bomb tests in 1946 just as the ships were lost, so were the majority of photographic records, and relatively few images have come down to us. This selection from R A Burt's archive,

represents therefore a remarkable portrayal of these ships, and the large format of the book combined with the quality of many of the images ensures that it offers the reader maximum detail and visual impact. Extended captions and ship specifications enhance its reference value and it is destined to become a 'must-have' volume for enthusiasts and modellers and for all those with an interest in the Second World.

Imperial Japanese Navy Battleships 1941-45 Mark Stille, 2012-05-20 The Imperial Japanese Navy of World War II surpassed the Allied and Axis fleets in innovation and technology. This title covers the 12 Japanese battleships that saw service between 1941 and 1945, including the mighty Yamato. Each class is considered in light of its design and construction, its armament and wartime modifications. The author, Mark Stille, uses primary sources and dramatic photographs to tell the story of these mighty battleships at war, including their major engagements during the raid at Pearl Harbor and the battle of Midway. The first English language book to include photographs from the prestigious Fukui Collection, this investigation will fascinate any naval enthusiast.

The Global Arms Trade Andrew T. H. Tan, 2014-05-22 The Global Arms Trade is a timely, comprehensive and in-depth study of this topic, a phenomenon which has continued to flourish despite the end of the Cold War and the preoccupation with global terrorism after 11 September 2001. It provides a clear description and analysis of the demand for, and supply of, modern weapons systems, and assess key issues of concern. This book will be especially useful to scholars, policy analysts, those in the arms industry, defence professionals, students of international relations and security studies, media professionals, government officials, and those generally interested in the arms trade.

The World Sea Power Guide David Wragg, 2012-10-24 Compiled by the author of Janes Air Forces of the World, this book is a must for naval experts and enthusiasts. In one volume the reader will find the composition and details of all naval elements of a staggering 137 nations armed forces including paramilitary organizations as the US Coast Guard Service. The book starts with an introduction based on the situation today and the response of the leading maritime powers. This is an interesting period with considerable uncertainty for the Royal Navy following the Strategic Defense Review. Many other countries, including Australia and Spain are boosting their naval strength to achieve strategic reach, while piracy has become a major problem in at least four different areas of the world. In each case, the history is followed by details of current fleet sizes, composition and deployments.

Security and Conflict in East Asia Andrew T. H. Tan, 2015-04-24 Security and Conflict in East Asia provides a timely and comprehensive analysis of the sources and implications of conflict on the Korean peninsula and in the People's Republic of China and Japan, the three biggest economies in the world. This analysis provides the building blocks for effective solutions to manage these tensions more effectively, and is a vital resource to those seeking a clearer understanding of conflict in the most pivotal region in the world. In the context of increasingly tense China-US strategic rivalry, the ever-present potential for conflict on the Korean peninsula and over Taiwan, the absence of effective regional institutions and regimes, the emerging arms race in the region, the rise in nationalism and the absence of crisis management mechanisms, there are many good reasons why the high potential exists for miscalculation and misperception sparking a regional conflict. Given the presence of nuclear-armed powers in East Asia, namely, China, North Korea and the USA, it is also possible that any regional conflict could escalate into a nuclear conflict involving the world's three largest economies: the USA, China and Japan. The security of, and any conflict in, East Asia thus has tremendous implications for global security. The Handbook is divided into four parts. The introductory section includes chapters which set the context, explain the history of international relations in East Asia and examine the phenomenon of regional arms race. The second section is made up of a series of chapters focusing on China, examining China's military modernization, its relationship with the USA and the various

territorial disputes in which it has been involved. The third section focuses on Japan and North and South Korea, looking at the security challenges facing Japan and the Korean peninsula. A concluding section examines the future role of China and the USA in East Asia, as well as the prospects for managing security in the region. The contributing authors are all experts in their respective fields, and all share an abiding concern over developments in East Asia. Their contributions aim to assist in a better understanding of the issues, to suggest possible solutions, and draw attention to the need for diplomacy, confidence-building measures, crisis management mechanisms and other measures to prevent conflict. This volume will be of use to government institutions involved in foreign policy, intelligence and defence, reference libraries, universities, research institutes, and non-governmental organisations. It will also appeal to analysts, researchers, journalists, policy advisers, students, academics and the general reader. Scholarly analysis is yet to catch up and currently there are no other comprehensive works examining conflict in East Asia in the context of the current tensions.

Seaforth World Naval Review 2015 Conrad Waters, 2014-11-05 Now in its seventh year, this annual has established an international reputation as an authoritative but affordable summary of all that has happened in the naval world in the previous twelve months. It combines regional surveys with one-off major articles on noteworthy new ships and other important developments. Besides the latest warship projects, it also looks at wider issues of importance to navies, such as aviation and electronics, and calls on expertise from around the globe to give a balanced picture of what is going on and to interpret its significance. The 2015 edition looks in detail at the French Navy and the Bangladesh and Myanmar navies, while significant ships include the Montford Point class mobile landing platforms, the Samuel Becket offshore patrol vessels, and the Skjold class fast attack craft. There are technological reviews dealing with naval aviation by David Hobbs, and current mine warfare developments by Norman Friedman, while warship recycling is discussed by Ian Buxton. Intended to make interesting reading as well as providing authoritative reference, there is a strong visual emphasis, including specially commissioned drawings and the most up-to-date photographs and artists' impressions. For anyone with an interest in contemporary naval affairs, whether an enthusiast or a defence professional, this annual has become required reading.

US Standard-type Battleships 1941-45 (2) Mark Stille, 2015-12-20 This book completes an authoritative two-part study on the Standard-type US battleships of World War II – ships that were designed to fight a different type of war than the one that unfolded. It gives precise technical details of the design history and features of the Tennessee, Colorado and the unfinished South Dakota and Lexington classes, whilst providing an operational history of the former two. Written by a leading expert on the US Navy in World War II and augmented by contemporary photographs and specially commissioned illustrations, this is the other half of the story of the US Standard-type battleships – from the terrible damage they sustained at Pearl Harbor to their support of the war-winning landings of the US Marine Corps and US Army.

Small Navies Michael Mulqueen, Deborah Sanders, Ian Speller, 2016-04-01 Whilst maritime studies tend to reflect the dominance of large navies, history shows how relatively small naval forces can have a disproportionately large impact on global events. From Confederate commerce raiders in the nineteenth century, to Somali pirates today, even the most minor of maritime forces can become a key player on a global stage. Examining a broad range of examples, this volume addresses the roles and activities of small navies in the past and the present at the national, regional and international level. In particular, it focusses on the different ways in which such forces have identified and addressed national and international security challenges and the way in which they interact with other navies and security agencies. In addition the collection also investigates the relationship of such

navies with non-governmental organisations, institutions and bodies in pursuit of broader maritime goals, be they political, financial or environmental. Adopting an interdisciplinary approach drawing on the best new research from the fields of international relations, security studies, strategic studies and maritime history, the book examines the diversity of experience amongst different smaller navies and also establishes areas of similarity. Divided into two sections, part one begins with a number of chapters that are theoretical in nature, whilst part two provides case studies that offer a more regional focus, including analysis of the challenges facing contemporary navies and historical case studies designed to reveal the experience of small navies over time. By adopting an approach that combines historical considerations with analysis of current events, the collection offers a unique perspective on the role that small navies have played in wider nautical affairs and their continued impact upon global maritime strategies.

Global Security Watch—Japan Andrew Lee Oros, Yuki Tatsumi, 2010-09-02 This book offers a comprehensive overview of Japan's national security institutions and policy today, including a detailed discussion of Japan's regional security environment and its alliance with the United States in the context of the Democratic Party of Japan's rise to power in August 2009. 2010 marks the 50th anniversary of the revision of the U.S.-Japan Security Treaty, making Japan one of the United States's longest and most important military allies. Over 40,000 US troops are based in Japan, as is the only U.S. aircraft carrier based outside the United States, the USS George Washington. Japan possesses one of the world's largest economies and strongest military forces, and as a result, its national security policies and institutions are highly significant—not just to America, but to the rest of the global community as well. This book provides an overview of Japan's transformation into one of the world's most capable military powers over the past 150 years. Particular attention is paid to developments in the past decade, such as the 2009 change in the controlling political party and Japan's responses to new global security threats.

Classroom of the Elite (Light Novel) Vol. 7 Syougo Kinugasa, 2020-10-22 The end of the second semester is near, and Ryuen's manhunt for Class D's mastermind is only getting more aggressive. When he and his goons decide to torture an answer out of Karuizawa, Ayanokouji decides it's finally time to step forward—if, that is, Karuizawa doesn't break under the pressure first!

The Military Balance 2012 The International Institute for Strategic Studies (IISS), 2020-03-26 The Military Balance is the International Institute for Strategic Studies annual assessment of the military capabilities and defense economics of 170 countries worldwide. It is a useful resource for those involved in security policy making, analysis and research. The book is a region-by-region analysis of the major military and economic developments.

China's Power and Asian Security Mingjiang Li, Kalyan M. Kemburi, 2014-11-27 One of the most significant factors for contemporary international relations is the growth of China's economic, military, and political power. Indeed, few analysts would dispute the observation that China's power has strongly influenced the structure of the international system, major-power strategic relations, international security, the patterns of trans-border economic activities, and most importantly, the political and security dynamics in Asia in the twenty-first century. This book maps the growth of China's political, economic, and military capabilities and its impact on the security order in Asia over the coming decades. While updating the emerging power dimensions and prevailing discourse, it provides a nuanced analysis of whether the growth of Chinese power is resulting in Beijing becoming more assertive, or even aggressive, in its behavior and pursuit of national interests. It also examines how the key Asian countries perceive and react to the growth of China's power and how US rebalancing would play out in the context of Beijing's political, economic, and military power. China's Power and Asian Security will be of huge interest to student and

scholars of Asian politics, Chinese politics, security studies and international security and international relations more generally.
