IA: Initiate John Darryl Winston,2017-03-07 Everyone has secrets... What if you didn't know your own? One young man with latent supernatural abilities plus one street gang hell-bent on recruiting him equals...IA: Initiate. The most important thing in the world to thirteen-year-old orphan "Naz" Andersen is keeping his little sister safe from the streets of a Chicago/Detroit-like urban ghetto known as the Exclave. Naz tries to stay out of the way at his foster parents' home, but he walks in his sleep. He is unable to keep the fact that he hears voices from his therapist. He attempts to go unnoticed at school and in the streets of the Exclave but attracts the attention of friends and bullies alike. Naz is ordinary, or so he thinks. He harbors a secret of which he is unaware. A seemingly random act of gang violence propels Naz on a path that leads to discoveries about his supernatural abilities, abilities that will ultimately decide whether he lives or dies. Now he must navigate his turbulent surroundings and face the full force of the world around him. The only way he can survive is to discover the supernatural world within.

AI and IA Ted Peters,2019-09-01 Will advances in AI (Artificial Intelligence) or IA (Intelligence Amplification) lead to the extinction of the human race as we know it? Or, will superintelligence lead to utopia? In this collection of thoughtful essays, we must first get clear on the question: is artificial intelligence actually intelligent or not? Only with an affirmative answer could our techies proceed toward their goal: the creation of a superintelligence that leads through transhumanism to a posthuman entity that would replace today's human. Should today's moderately intelligent human species voluntarily go extinct to make way for a more intelligent species to succeed us in evolutionary history? These scientific questions are addressed in this volume in light of their theological, ethical, and social implications.

Ia Antigens David Ferrone,2019-07-23 The purpose of this book is to provide the reader with a ready source of information regarding Ia antigens in several animal species. The significance role played by the gene products of I regions in cell-cell interactions has stimulated interest in the characterization of Ia antigens. Through the effort of several investigations much information about the functional and structural properties of Ia antigens has been accumulated in recent years.

Mochlos IA Jeffrey S. Soles,2003-12-31 Mochlos is a Minoan town set on a fine harbour at the eastern side of the Gulf of Mirabello, in northeast Crete. It was first inhabited during the Neolithic period, and it had an important Minoan settlement during most of the Bronze Age. Mochlos I, to be published in three volumes, presents the results of the excavations in the Neopalatial levels of the Artisans' Quarter, and at the farmhouse at Chalinomouri. The Artisans' Quarter consisted of a series of workshops with evidence for pottery manufacture, metalworking, and weaving. Chalinomouri, a semi-independent farmhouse with strong connections to the nearby island settlement at Mochlos, was engaged in craftwork and food processing as well as agriculture. This volume, Mochlos IA, presents the process of excavation and the architecture; volume IB presents the pottery, and volume IC will publish the small finds.

A LM IA Ceramic Kiln in South-central Crete Joseph W. Shaw,2001 This volume presents an in-depth study of the Late Minoan IA cross-draft kiln found in excavations at Kommos, Crete. The kiln is of a type popular during the Neopalatial period, and its good state of preservation has allowed the authors to speculate about its original internal layout and use, as well as about the roof that covered it. Much of the large quantity of pottery found associated with the kiln is analyzed in detail, allowing for the first time the study of the shapes, decoration, and technical characteristics of vases known to have been fired in a specific LM IA kiln. The book presents an integrated program of analytical techniques used to illustrate the range of firing temperatures, the compositional similarities and differences in the clays used, and aspects of the firing process and the upper kiln structure. Offered here is a valuable contribution to our knowledge of the technology and organization of ceramic production at the beginning of the Late Minoan period, which will form a basis for studies of pottery provenience and exchange.

AI*IA 99:Advances in Artificial Intelligence Associazione italiana per l'intelligenza artificiale. Congress,2000-03-29 This book constitutes the thoroughly refereed post-conference proceedings of the 6th Congress of the Italian Association for Artificial Intelligence, AI*IA 99, held in Bologna, Italy, in September 1999. The 33 revised full papers presented were carefully reviewed and selected for inclusion in the book from a total of 64 congress submissions. The papers are organized in topical sections on knowledge representation; automated reasoning; temporal and qualitative reasoning; machine learning, data mining, and theory revision; natural language processing and web interfaces; multi-agent systems; perception and robotics; and planning and scheduling.

Information Architecture for the World Wide Web Louis Rosenfeld,Peter Morville,2002 Today's web sites and intranets are larger, more valuable, and more complex than ever before, and their users are busier and less forgiving. Designers, information architects, and web site managers are required to juggle vast amounts of information, frequent changes, new technologies, and corporate politics, making some web sites look like a fast-growing but poorly planned city -roads everywhere, but impossible to navigate. A well-planned information architecture has never been as essential as it is now. Information Architecture for the World Wide Web, Second Edition, shows how to use both aesthetics and mechanics to create distinctive, cohesive web sites that work. Most books on web development concentrate either on the graphics or on the technical issues of a site. This book focuses on the framework that holds the two together. By applying the principles outlined in this completely updated classic, you'll build scalable and maintainable web sites that are easier to navigate and more appealing to your users. Using examples and case studies, Information Architecture for the World Wide Web will help you: Develop a strong, cohesive vision for your site that makes it both distinctive and usable; Organize your site's hierarchy in ways that are meaningful to its users and that minimize the need to re-engineer the site; Create navigation systems that allow users to move through the site without getting lost or frustrated; Accurately label your site's content; Organize your site in a way that supports both searching for specific items and casual browsing; Configure search systems so that users' queries actually retrieve meaningful results; Manage the process

of developing an information architecture, from selling the concept to research and conceptual design to planning and production. The world will be a better place when web designers read this book. It's smart, funny, and artfully distills years of the authors' hard-won experience. Information Architecture for the World Wide Web tackles political/organizational challenges as well as content, structure, and user interface. This is not design-lite, but a deep treatment of fundamental issues of information presentation that advances the state of the art. It's light years ahead of the competition. -Bonnie Nardi, Co-author of Information Ecologies- Using Technology with Heart

*AI*IA 2011: Artificial Intelligence Around Man and Beyond* Roberto Pirrone, Filippo Sorbello, 2011-09-12 This book constitutes the refereed proceedings of the 12th International Conference of the Italian Association for Artificial Intelligence, AI*IA 2011, held in Palermo, Italy, in September 2011. The 31 revised full papers presented together with 3 invited talks and 13 posters were carefully reviewed and selected from 58 submissions. The papers are organized in topical sections on machine learning; distributed AI: robotics and MAS; theoretical issues: knowledge representation and reasoning; planning, cognitive modeling; natural language processing; and AI applications.
