The complete range of hardware used in land, sea and air forces throughout the world at the time of publication is covered, from tanks to rocket systems, helicopters to cruise missiles, alongside full details of size, weight and operational range. **Deformation and Failure Mechanism of Rock Tunnels under Earthquake Loading** Yujing Jiang,Xuepeng Zhang,2023-11-17 Seismic damage to rock tunnels from recent earthquakes indicates an urgent need for seismic assessment and aseismic design of underground structures. This book offers a comprehensive account of seismic performance and the response of underground structures under earthquake loading, necessary for adequate assessment and design. The book presents research methods for the rate-dependent mechanical behavior of rock and for the seismic behavior of underground structures. It describes analytical solutions to investigate the seismic response of tunnels subjected to seismic waves, toward an improved quantitative understanding of the seismic deformation and failure mechanism in both longitudinal and transversal aspects. A performance-based restoration design criterion and aseismic design are also proposed for future tunnel planning. Includes a detailed case study for the seismic performance assessment of rock tunnels under earthquake loading Explores the relationship between seismic damage to underground structures and ground deformation Covers a range of issues from mechanisms, analysis, assessment and design of both new tunnels and restoration projects The book is ideal for earthquake engineers and researchers, and will also be of interest to contractors, clients, researchers, lecturers, and advanced students working on tunnel engineering.

Democratization in Morocco Lise Storm,2007-10-29 This book explores the political games of the Moroccan democratization process in the period from independence in 1956 until 2006. By combining a great degree of political theory with empirical material on Morocco, it analyzes the strategies and actions of the various political actors and evaluates the level of democracy present in the country after the adoption of new constitutions in 1962, 1970, 1972, 1980, 1992

and 1996. Lise Storm demonstrates that in at least some instances, democratization has been more than simply a survival strategy – every so often, key figures within the political elite have taken the democratization process further than strictly needed for them to stay in power. In the case of Morocco, it has been the monarch who on more than one occasion has moved the country further towards the democratic ideal than he necessarily had to, and that sometimes even against the wishes of one or more of the established political parties. This book illustrates how the Moroccan political parties, like so many of their counterparts in the region, have become the main obstacle to further democratization as most of them have never honoured – or appear to have abandoned – the key function of political parties: popular representation. Democratization in Morocco will be a very valuable contribution to students and researchers interested in the dynamics behind the Moroccan democratization and the role of electoral politics in North African and Middle Eastern politics.

It analyses the extent of defence industries, showing that large portions of the aerospace, shipbuilding, motor vehicle and electronics industries are devoted to defence and discusses where the defence industries are located. **International Summitry and Global Governance** Emmanuel Mourlon-Druol, Federico Romero, 2014-03-05 This volume is the first detailed study of the emergence of regular and frequent heads of government meetings (summits), covering the period from the mid-1970s to the early 1990s. Summit meetings of heads of government have become 'banal' in today's world. Yet they are a relatively recent practice that took off only in the mid-1970s. The aim of the book is to explore the origins of this new feature of global governance in its historical context. Why did heads of Western governments decide to regularly meet up in the European Council and the G7? What were they aiming at? How were these meetings run and what consequences did they have? How did other actors of international relations – states as well as non-state and/or transnational actors - react to this transformation? Based on newly released archival material, *International Summitry and Global Governance* investigates the rise of regular international summitry and its impact on international relations. The volume brings together the best specialists of this new field of historical enquiry in order to explore those features of global governance in their historical context, and open up an interdisciplinary dialogue with social scientists who have studied summits from their own disciplinary perspectives. This book will be of much interest to students of international history, Cold War studies, global governance, foreign policy and IR in general.

*Toward a US-Indonesia Free Trade Agreement* Gary Clyde Hufbauer, Sjamsu Rahardja, 2007 Indonesia is the largest Muslim country in the world. This book presents a case for improved trade relations between Indonesia and the United States and recommends advancing exploratory talks toward a US-Indonesia FTA. The authors present a detailed study of the stakes involved in the various areas of the proposed negotiation and estimate the FTA's potential for trade creation, trade diversion, and welfare under different scenarios.
