ICO: Castle of the Mist Miyuki Miyabe,2011-08-16 When a boy named Ico grows long curved horns overnight, his fate has been sealed—he is to be sacrificed in the Castle in the Mist. But in the castle, Ico meets a young girl named Yorda imprisoned in its halls. Alone they will die, but together Ico and Yorda might just be able to defy their destinies and escape the magic of the castle. Understand Cryptocurrency Ico's: Learning the Basics Dale Michelson,2017-07-22 The idea of a Cryptocurrency was first actualized in the late 1990's as an electronically and anonymously controlled funding system. As the idea grew traction, the concept, with all its possibilities, became more widely accepted and is now referred to as Cryptocurrency. This currency is privately monitored and controlled and as such is often viewed as an alternative currency. The leading Cryptocurrency to be globally launched was the Bitcoin of 2009. To date, there are approximately 200 forms of cryptocurrencies available for purchase on the market. Cryptocurrencies are largely funded through a medium referred to as Initial Coin Offerings or ICO's. Investors opt to utilize ICO's as they are largely unregulated and as such minimize the rigors usually associated with these ventures. ISO's are designed to ensure that initial as well as large scale investors are rewarded with a compensation package. The first recorded ICO was in 2013 for the Mastercoin cryptocurrency.

ICO Hunter: How to Find Your Pathway Into the Jungle of Initial Coin Offering' Manos Paraskevas,2018-02-16 The most interesting part with the Cryptocurrencies is the creation of a new category of business funding, which is the ICO - Initial Coin Offering. ICO has similarities with IPO - Initial Public Offering, but one huge difference: There is not a legal framework which a company has to follow for the ICO. That will definitely change in the future, but for now they are a lot of companies/scammers who are taking advantage of this gap and trying to make some money. Using fancy words for example Blockchain, public ledger, decentralized, Bitcoin etc..... they are in a position to rise millions of dollars, without the obligation to provide a product at the end. It is amazing how many companies are created in daily basis and trying to secure funding through ICO. They promise that they will solve one of our problems using Blockchain and in return they are giving us tokens for reward. Tokens which can worth 10 or 100 times more in a few years or nothing in a few months. They are excellent articles and books in the market, which explain the difference between utility and security tokens, which market you should invest (online storage, VR, real estate, financial transactions) or which characteristics you need to check to spot a scam ICO (white paper, development and engineering team, marketing, timeline, reputation). In this book I am presenting all the links, which can be used to spot a life time opportunity and can give you up to 10,000 returns of your initial investment. Have in mind that a lot of people are buying ICO due to the discount and then when the ICO hit the exchanges, they dump it as fast as possible. Also the majority of these ICO won't be there in the next 5 years. That does not necessary mean that all of them are scams. An ICO has a start-up company behind and a lot of things can go wrong for example bad management, delivery delays, lack of resources. Always play the long term game and it is better to invest in a few ICOs and wait,

instead of just simple be part of the 'pump and dump' process (FYI: That is considered illegal in most countries, most likely you won't belong to the 'whales' group and you will lose money and fate into the crypto market).
